03 MAY 2022

Honourable T. Sophonea
Minister of Finance
P.O. Box 395
Maseru – 100

Honourable Minister,

**AUDIT REPORT ON THE CONSOLIDATED FINANCIAL
STATEMENTS OF THE GOVERNMENT OF LESOTHO FOR THE
YEAR ENDED 31ST MARCH 2021**

I submit my report on the Consolidated Financial Statements of the Government of Lesotho for the year ended 31st March, 2021 in accordance with Section 117 (4) of the Constitution of Lesotho and Section 27 of the Audit Act 2016.

Please arrange to lay the report before Parliament in terms of the above Sections of the Constitution and the Act as well as Section 37 of the Public Financial Management and Accountability Act 2011.

Yours faithfully,

**MONICA M. BESETSA (MS)
ACTING AUDITOR-GENERAL**

OVERVIEW

Pursuant to the provisions of Section 117(4) of the Constitution of Lesotho and Section 27 of the Audit Act 2016, I am pleased to present my report on the output of the audit of the Consolidated Financial Statements of the Government of Lesotho for the year ended 31 March 2021.

This Report contains a summary of the most significant audit observations that in my opinion may have significant impact on finances, resources and service delivery; or if not corrected, may adversely affect financial governance and controls. These audit observations were communicated and discussed with the Accountant-General, respective Chief Accounting Officers of Ministries concerned, and Heads of Statutory Bodies.

The main objectives of this report are to:

- Draw the attention of Parliament, Government and other decision makers to matters arising from carrying out my oversight role as the Auditor-General;
- Comment and provide information on various financial management and reporting, governance and administrative issues;
- Highlight some matters of recurring nature and make some observations on the status of action taken; and
- Maintain an official record in terms of reports on matters arising and audit findings made in various entities for future reference.

My role is to provide assurance to the Parliament and other stakeholders that the consolidated financial statements on Pages 13-76 prepared by the Minister of Finance and the Accountant-General properly present the budget allocations, expenditure, revenue and other government's financial activities and the financial position for the year under review.

a) Financial highlights on the Consolidated Financial Statements for the year ended 31 March 2021:

- **Revenue** - the total receipts amounted to M20.233 billion, which included Government revenue of M17.610 billion and capital receipts of M2.623 billion. The major source of Government revenue was from direct taxes at M6.703 billion and SACU receipts of M8.980 billion.

- **Government expenditure** totalled M20.983 billion comprising of recurrent expenditure of M17.157 billion and development expenditure of M3.826 billion. Recurrent expenditure included mainly Compensation of Employees (M7.345 billion), Goods and services (M3.822 billion), Transfers (M3.339 billion), Debt service (M2.589 billion) and Acquisition of financial and non-Financial Assets (M36 million).
- **Public Debt** has decreased from M19.320 billion as at 31 March 2020 to M18.250 billion as at 31 March 2021, representing a decrease of 6%. Domestic debt amounted to M3.481 billion and external debt was M14.769 billion as at 31 March 2021.
- **Total outstanding balance of loans** made by Government to State-Owned Enterprises and other entities for specific purposes consistent with its development policy objectives amounted to M960 million at 31 March 2021, which was a decline of M24 million from the figure of M984 million outstanding as at 31 March 2020.
- **The outstanding guaranteed loans** by the Government of Lesotho issued to State-Owned Enterprises, public officials and businesses amounted to M345 million as at 31 March 2021. There was an increase of M51 million from the previous year's figure of M294 million.
- **Payment arrears** have reached M545 million as at 31 March 2021, representing an increase of 12% over the previous year's figure of M488 million.
- **Accounts receivable** by Government amounted to M416 million as at 31 March 2021 which is an increase of M311 million over previous year's figure of M105 million.
- There was a **cash increase** of M2.899 billion from the previous year's figure of M8.724 billion to M11.623 billion as at 31 March 2021.

b) Non-compliance with legislations regulating reporting responsibilities:

a) Performance reporting

Section 34 (1) of the Public Financial Management and Accountability (PFMA) Act 2011 requires a spending unit of Government to prepare quarterly and annual reports which should include details of the programme results achieved, including the impact of new policies implemented in that year and in the previous years, and set out the performance indicators used to assess the programme. Section 34 (9) further requires that a minister responsible for a spending unit should present an annual report to Parliament within four months of the end of the financial year to which it relates.

There has been non-compliance to the requirements of PFMA Act, as ministers responsible for spending units have not presented annual reports to Parliament.

b) Submission of financial statements of statutory bodies and GOL funded projects

The Legislations establishing statutory bodies specify a period after the closure of the financial year to submit their financial statements for audit. Although most of the statutory bodies are now up to date, I still have concerns with those having a backlog and encourage them to comply with the legislation.

In my last year's report, I stated my dissatisfaction brought by the Projects funded by the Government of Lesotho, which do not prepare financial statements. The situation remains the same during the year under review.

c) Tabling of audit reports for statutory bodies and Development Projects

In terms of Section 44(1) of PFMA Act 2011, the minister responsible for a public enterprise should present audited public enterprise annual reports to Parliament within six months of the end of the financial year to which they relate.

Section 28 of the Audit Act 2016 requires the Auditor-General to report on examination and audit of accounts of spending units, statutory bodies and projects; and send such reports to the appropriate minister who should present the report to Parliament.

When I submit reports to the appropriate ministers, I also remind them to comply with the requirements of PFMA Act 2011 and Audit Act 2016 by presenting reports to Parliament. Nonetheless, such reports have not yet been presented to Parliament.

3. Recurring issues

I have repeatedly raised audit queries on the following issues, which have not been resolved:

a) Unexplained differences on cash balances

Since financial year 2009/10, there have always been unexplained differences between cash balances reported in the Consolidated Statement of Cash Receipts and Payments and cash balances reported in the Notes to the financial statements.

b) Irregular treatment of advances from the Contingencies Fund

The Accountant-General has not operated advance account since April 2009 and Advance warrants from the Contingencies Fund are irregularly treated as release warrants and thereby increasing approved funds by Parliament with unapproved funds. This also makes it difficult to determine as to whether the funds were applied for intended purposes.

c) Omission of balances of Below-The-Line accounts

The Government is yet to take my advice of presenting the issue of un-reconciled balances of Below-The-Line accounts before Parliament for decision-making, as this will always form basis for qualification of accounts if not addressed. These accounts have not been reconciled since 1978 and the possibility of ever reconciling them is non-existent as supporting documents, which were not available then, cannot be available now. The officers with first hand information, who failed to perform reconciliation, may no longer be available due to deaths, health issues, etc.

d) Regularisation of excess expenditure

It is the duty of the Chief Accounting Officer to ensure that his ministry plans and monitors expenditure so as to avoid making payments in excess of the funds available at any given time.

Despite the requirements of Section 112 (3)(b) of the Constitution that if in respect of any financial year it is found that any moneys have been expended for any purpose in excess of the amount appropriated to that purpose by the Appropriation Act, a statement of excess showing the sums spent shall be laid before both Houses of Parliament; no Statements of Excess have been presented to Parliament for request of regularisation of excess expenditure incurred.

Furthermore, I am not aware of any surcharge imposed by the Minister of Finance on the Chief Accounting Officers who have incurred in excess expenditure over the authorised provision for a head of expenditure. This contravened Section 27 (6) of the PFMA Act 2011 that empowers him to impose a surcharge of M1,000 or the amount of the excess, whichever is the lesser amount, on the person who was Chief Accounting Officer for that head at that time.

e) Accountability of Centralised Items Vote

I have raised a concern in my last reports about the accountability of the Centralised Items Vote (Head 30) under recurrent expenditure. Parliament allocates budget to this vote and the Ministry of Finance makes reallocations from this vote to requesting ministries.

In contrast with advances from the Contingencies Fund, there is no legislation governing administration of Head 30- Centralised Items and therefore legal accountability of funds under this head could not be established.

In conclusion, I wish to express my heartfelt gratitude to the staff of my office for the hard work and dedication displayed during the audit of these consolidated financial statements; it is only through their great efforts that it has been possible for me to deliver on the constitutional mandate. I also wish to thank the staff of the Ministry of Finance; in particular the Accountant-General and her staff whose cooperation and assistance have facilitated the accomplishment of my statutory duties. My appreciation also goes to the Chief Accounting Officers and their staff in providing information requested by my office.

LESOTHO**

**AUDIT CERTIFICATE
ON THE CONSOLIDATED FINANCIAL STATEMENTS
OF THE GOVERNMENT OF LESOTHO FOR THE
YEAR ENDED 31 MARCH 2021**

ADVERSE OPINION

I have audited the consolidated financial statements of the Government of Lesotho (the Government) set out on pages 13–76, which comprise the consolidated statement of cash receipts and payments as at 31 March 2021, and consolidated statement of budget and actual amounts for the year then ended, statement of consolidated entities and notes to consolidated financial statements including a summary of significant accounting policies.

In my opinion, because of the significance of the matters discussed in the Basis for Adverse Opinion paragraph, the accompanying consolidated financial statements do not present fairly the financial position of the Government as at 31 March 2021, and its financial performance and its cash flows for the year then ended in accordance with International Public Sector Accounting Standards (IPSAS).

BASIS FOR ADVERSE OPINION

1. CASH BALANCES

- 1.1 The Consolidated Statement of Cash Receipts and Payments shows that the Government had cash balance of M11.620 billion as at 31 March 2021. However, Note 15 to the financial statements reflects M5.463 billion held in 383 accounts at various banks, resulting in an unexplained shortfall of M6.157 billion.

- 1.2 According to Note 15 to the consolidated financial statements, there were 383 bank accounts totalling M5.463 billion as at 31 March 2021. On 31 March 2020 there were 374 accounts amounting to M5.311 billion and therefore there was an increase of 9 accounts to the tune of M152 million. On the contrary, the Consolidated Statement of Cash Receipts and Payments reflect unsubstantiated cash increase of M 2.865 billion.
- 1.3 Even though there was an improvement on the maintenance of register for bank accounts, still, I could not put reliance on it, as the number of accounts per bank confirmations was 383 whereas the register reflected 366. There were instances where some bank accounts were reflected in the register but not in the bank confirmations and vice versa. In addition, one bank has provided inconsistent information in terms of confirmation of balances and closed accounts. Therefore, I could not confirm the number of bank accounts and the balances thereon as at 31 March 2021.

2. NON-COMPLIANCE WITH INTERNATIONAL PUBLIC SECTOR ACCOUNTING STANDARDS UNDER CASH BASIS OF ACCOUNTING

- 2.1 The financial statements do not consolidate all government-controlled entities. State owned enterprises, autonomous institutions and other extra budgetary funds are not fully consolidated.
- 2.2 Centrally managed bank account balances were not fully reconciled as at 31 March 2021.
- 2.3 The financial statements disclose a small number of accrual items, which had not been cleared at the reporting date such as accounts payable, advances, provisions, third party trusts and deposits.

3. OMISSION OF BELOW-THE- LINE ACCOUNTS

The balances of Below-The-Line accounts as at 31 March 2009 have not been brought forward since 1 April 2009. This omission has misstated the consolidated financial statements of the Government of Lesotho for twelve (12) years.

4. REGULARITY OF EXPENDITURE

4.1 The issue of regularising a transfer of M450 million per Minister's directive from the Trust Monies Account into the Consolidated Fund, for onward transfer to Recurrent Expenditure Account in 2016/17 has not been resolved. The transfer has not yet been regularised through Supplementary Appropriation Act contrary to the requirements of Section 112(2) of the Constitution of Lesotho and Section 24(4)(b) of the Public Financial Management and Accountability (PFMA) Act 2011 that issues from the consolidated fund to voted heads of expenditure should be through Appropriation Act.

4.2 Four (4) voted heads have recorded excess expenditure; three (3) heads on recurrent expenditure and one head on development expenditure. Contrary to the requirements of Section 112(3)(b) of the Constitution of Lesotho and the PFMA Act 2011, the Statement of Excess has not been presented before Parliament for regularisation of excess expenditure.

I have conducted my audit in accordance with the International Standards of Supreme Audit Institutions (ISSAIs). My responsibilities under those standards are further described in the Auditor's Responsibilities for the audit of the Consolidated Financial Statements section of my report. I am independent of the Government in accordance with the ethical requirements that are relevant to my audit of the consolidated financial statements and I have fulfilled my other ethical responsibilities in accordance with these requirements. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my adverse opinion.

RESPONSIBILITIES OF MANAGEMENT AND THOSE CHARGED WITH GOVERNANCE FOR THE CONSOLIDATED FINANCIAL STATEMENTS

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IPSAS, and for such internal controls as management determines necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Those charged with governance are responsible for overseeing the Government's financial reporting process.

AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS

My objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes my opinion. Reasonable assurance is a high level of assurance, but not a guarantee that an audit conducted in accordance with ISSAIs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISSAIs, I exercise professional judgment and maintain professional scepticism throughout the audit. I also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Government's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

I communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that I identify during my audit.

I also provide those charged with governance a statement that I have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on my independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, I determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. I describe these matters in my audit report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, I determine that a matter should not be communicated in my report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

LESOTHO

I. REPORT BY THE MINISTER OF FINANCE

Per the Section 35 of the Public Financial Management and Accountability Act, as the Minister of Finance, I am mandated to produce and submit to the Auditor General, the Consolidated Financial Statements for the year 2020/2021, in line with International Public Sector Accounting Standards (IPSAS) for audit. Consolidated Financial Statements are produced mainly to meet accountability and transparency objectives of the Government. They are intended to present the extent to which Ministries, Departments and Agencies have performed throughout the year and how they have complied with their budgets as approved by Parliament.

The budget I presented for the 2020/21 financial year was aimed at revitalizing the economy by accelerating investment and job creation. The budget was intended to promote inter-ministerial collaboration to fight poverty, malnutrition and enhance service delivery at local level. It is worth noting that funds had to be reallocated for purposes of medical treatment and mitigation of the COVID-19 pandemic. To this date, the country still sustains the hard negative effects of the pandemic.

Despite the challenges experienced due to COVID-19 pandemic, key achievements of this budget were ample fund for investment spending on construction sector through Ministry of public works, energy sector, health sector and water sector and agricultural and food security sector.

We have been supported during these trying times by our development partners in the various areas where they assisted the Government of Lesotho to extend service delivery to the citizenry. The other most important area is improving the public financial management agenda, with focus on improving the quality of the GOL financial reporting. These are the International Monetary Fund (IMF), European Union (EU), the World Bank and the African Development Bank.

Finally, my gratitude extends to the Accountant General and her team for her dedication, hard work and professionalism in compiling these Consolidated Financial Statements for the Financial Year 2020/2021 during the unusual times. They are continuously setting the bar higher in compiling and complying with the law and the International Public Sector Accounting Standards. I therefore commit to providing Treasury Department the continued support in striving to ensure that our financial reporting is reliable, relevant and on-time.

Honourable Thabo Sophonea MP
Minister of Finance

02 May 2022

LESOTHO

II. REPORT BY ACCOUNTANT GENERAL

A. TREASURY MANDATE

Treasury is a department within the Ministry of Finance, headed by the Accountant General. PFMAA Section 35 together with Treasury Regulations Section 95 provide that the Accountant General shall prepare the Consolidated Financial Statements for Government. The Accountant General is also expected to provide technical guidance to spending units in the preparation of financial statements.

B. COMPLIANCE ON PUBLIC FINANCE LEGAL FRAMEWORK

The Treasury is also charged with responsibility to enhance compliance to the public financial laws. The Treasury has strengthened the compliance of the Laws and enforcement of the Internal Controls by rigorous Inspectorate function. To ensure that this is a success, the Lesotho Mounted Police Service has dedicated a team which works with Treasury to enforce compliance. There are a number of cases in the courts of law where officers are suspected to have misappropriated funds.

I am happy to report that during 2020/21 financial year the State won a case against four (4) former public officers. The officer worked at the Leribe Sub Accountancy and had misappropriated public funds amounting to M767,085.33 (seven hundred and sixty seven maloti and eighty five Maloti thirty three Lisente. Other cases are still pending in the courts of law as shown below. There are also ongoing inspections across the government ministries.

The cases are listed here below:

Inspection/ Investigation Cases

Cases	Period	Status	Remarks
Pensions Unit – Maseru	November & December 2020	Pending	Inspection ongoing
Ministry of Home Affairs - Maseru	January 2021	On-going	Inspection ongoing
Ministry of Agriculture (SADP)	February 2021	On- going	Inspection ongoing

Ministry of Finance (Stores)	March 2021	Part heard	Court proceedings continuing
Ministry of Police - Headquarters			Missing receipt book
Lephoto & Others RCI/63/10/15	October 2015	Finalized in court	Judgement delivered
Mpho Damane & Matiisetso Theoha RCI/110/05/16	May 2016	Pending judgment	
Teboho Seilane & Others RCI/31/06/17	June 2017	Pending in court	
Thato Mathaba & Others RCI/45/08/17	August 2017	Pending judgment	
Mamolemo Mohlomi RCI/57/12/17	December 2017	Pending judgment	
Mampoi Makhetha & Others RCI/132/03/17	March 2017	Pending in court	
Mahlomohang Mokete RCI/27/01/18	January 2018	Pending in court	

C. GENERAL COMMENTARY

The consolidated financial statements are produced annually to give the electorate, taxpayers, Members of Parliament and development partners (local and international), clear information on the financial performance and position of government.

The statements are required by law. Section 35 of the Public Financial Management and Accountability Act, 2011 requires the Ministry of Finance to prepare the Government's consolidated financial statements in accordance with International Public Sector Accounting Standards (IPSAS) and to submit them to the Auditor General for audit within five months of the end of the financial year to which they relate. The Treasury Regulations of 2014 delegates the responsibility for preparing the consolidated financial statements to the Accountant General and requires her to direct how the IPSAS are to be applied.

In 2016, the Treasury evaluated its annual reporting practices against the requirements of the cash-basis IPSAS, established the gaps and developed a roadmap for achieving compliance. The preparation of the FY2018/19 consolidated financial statements continues the journey that commenced with the 2015/16 statements and introduces several quality enhancements, including the reporting of the movements in financial assets and liabilities as well as, opening and closing cash balances. The 2019 update to the roadmap also takes account of a 2017 revision to the cash-based IPSAS that relaxed the requirements for consolidating the financial information from all government-controlled entities and third-party transactions.

In preparing these consolidated financial statements I am indebted to the Treasury financial reporting team which has worked tirelessly over the past months to guide, verify and consolidate the financial information. I am grateful for the active engagement of the Chief Accounting Officers and their finance staff and for their diligence in preparing the Spending Unit annual reports. I am also appreciative of the valuable inputs provided by other Treasury units and Ministry of Finance departments.

The remainder of my report is organized as follows: Section B aims to provide a narrative on the government's financial performance and position for the year ended 31 March 2021 whilst Section C seeks to explain the main issues, pressures and risks that are faced by the Treasury and the plans to address them.

Based on the information provided by the Chief Accounting Officers, and to the best of my knowledge, the Consolidated Financial Statements as set out on pages 19 to 27 reliably present the FY2020/21 cash flows and financial performance of the Government of Lesotho.

D. COMMENTARY ON CONSOLIDATED FINANCIAL STATEMENTS

Introduction

These financial statements consolidate information from the annual reports prepared and submitted by the CAOs in respect of the Spending Units, projects and other funds for which they are accountable. The statements include the financial performance information reported by the 36 central government ministries, departments, constitutional bodies and other Spending Units; the ten district councils; and 7 centrally operated spending heads administered by the Ministry of Finance. The coverage is the same as that of the national budget.

The consolidated financial statements for the year ended 31st March 2021 comprise the following four statements: (a) Consolidated Receipts and Payments; (b) Consolidated Budget versus Actual Comparison; (c) Accounting Policies; and (d) Consolidated Entities. Notes to the consolidated financial statements assist readers in gaining a fuller understanding of Government's financial performance and position. They provide the reader with additional analysis of amounts included in the two face statements and include information on the Government's financial assets, liabilities and contingent

liabilities. More detailed information relating to a Spending Unit can be found in the respective CAO reports. The remainder of this commentary highlights the key features of the Government's FY2020/21 financial performance.

National Strategic Development Plan

The Government of Lesotho has a commitment to transform Lesotho to a producer and export driven economy through the implementation of the National Strategic Development Plan II (NSDP). The NSDP advocates for participation of citizens in the development of the country. It also aspires for sustainable growth that will reduce poverty. The strategic direction is therefore provided by the NSDP for growth and development. It is expected that the NSDP provides basis for resource allocation and that all national development programmes be aligned with it, which could later be translated into improved service delivery to the citizen and accountability to the all the stakeholders.

The Ministry of Development Planning (MDP) is charged with the responsibility to oversee the implementation and evaluation of the effectiveness of the NSDP. According to the report from the Chief Accounting Officer of the MDP, NSDP implementation progress is either limited or regressing. The MDP has also noted that ministries have introduced new strategic objectives that they are pursuing at the expense of the NSDP II interventions. The conclusion that can be drawn therefore, is that the resources are not dedicated for the implementation of the NSDP as per the expectation.

Budget and Cash Management Challenges

Budget Reconciliation

The revised Expenditure Budget, after taking into account the Supplementary Appropriation (2020/2021) Bill, 2020/2021 budget was M28.807 billion from the original budget of M23.789 billion. The total budget includes both appropriated and statutory (which is unappropriated) expenditure. The statutory budget was M4.626 billion and was revised to M5.256. The Appropriation was revised with M4.387 billion.

Contingency Fund budget was originally M100 million and was revised with M1.184 billion to M1.284 billion. According to the data provided per the Contingency Fund Management Report, M677 million was utilized for recurrent expenditure budget whereas M294 million was for capital. M213 million of the Contingency Fund remained unallocated. It should be noted that much of the increase to the Contingency Fund was attributed to the reallocation from ministries rather than additional funds.

Recurrent Revenue Budget remained at the originally budgeted amount of M17.103 billion. The originally budgeted amount for capital receipts from external sources was M2.914 billion which was composed of M858 million for Grants and M2.056 billion for Loans. Budget for capital receipts

The Supplementary Appropriation Bill 2020/21 which is meant to formalize the above changes has been submitted to Parliament for enactment.

Budget Deficit

The appropriated budget projected a Consolidated Fund unfunded deficit of M 6.687 billion, whilst it increased to M7.718 billion after the budget revision. It was not clear how the deficit would be funded however the practice is it gets funded by additional borrowing. Increased recurrent expenditures, under-performance of revenue collections and difficulties in raising domestic borrowing were slightly offset by under-spending on development expenditures. The actual deficit was M611million. The financial performance of each component is as follows.

Cash Management Challenges

The 2020/21 budget deficit was higher than the ability to raise funds to close the gap between receipts and expenditure. There were also no clear measures to fund the deficit. It is also to be noted that the expenditure occurred whilst revenue was being collected and most of the time revenue was low and slow and on the other hand expenditure rate was higher. The situation was aggravated by the lockdowns due to the COVID-19 pandemic. Availing cash for the 2020/21 was quite a hurdle which has spilled over to 2021/21 financial year.

Overall Budget Performance

Revenues

The overall revenue collection (excluding loans and project grants) for FY2020/21 was M18.055 billion which is M952 million more than the revenue budget. The revenue budget for 2020/21 was M12 million higher than the FY2019/20 of M 17.114billion. The collection increased to M18.055 by 17% from the 2019/20 collection. Figure 1 illustrates the revenue deposits against the main sources of revenue received during the year and the comparative collection rates against the approved budgets. The over collection has attributed to reasons including but not limited to under budgeting, unanticipated auction of machinery for Ministry of Agriculture, increase of prices for services provided by the Ministry of Transport etc.

Figure 1: FY2020/21 Revenues

Southern Africa Customs Union (SACU) receipts of M 8.981 billion during FY2020/21 as per budget. These receipts were higher than the M 6.226 billion received in the previous year. Actual tax revenues of M 6.708 billion (compared to FY2019/20 of M 7.320) decreased slightly.

Figure 2 provides the trend in revenue receipts and especially illustrates the significance, volatility and increase in the SACU receipts.

Figure 2: FY2020/21 Revenue Trends

Expenditures

The total originally approved expenditure budget for FY2020/21 was M23.789 billion of which M18.084 billion (76%) was allocated to recurrent and M5.604 (24%) for capital expenditure towards achieving the government's infrastructure and other development objectives. The recurrent provision can be further broken down between the appropriated amounts for release to Spending Units of M 13.458 billion and the statutory/centralized budgets of M4.726 billion managed by the Ministry of Finance for pensions, debt servicing, statutory salaries and related expenses and the Contingency Fund.

It should be noted that the expenditure budget has been revised to M28.807 billion of which M20.418 billion has been allocated to recurrent expenditure, whilst M7.104 billion for capital expenditure. The Contingency Fund was revised to M1,284million, of which a balance of M213 million was still held on 31 March 2021. The revision of the expenditure is yet to be approved by Parliament, in accordance with Supplementary Appropriation (2020/2021) Bill.

Figure 3 illustrates the proportional split between expenditures and relative execution rates between the three main expenditure categories.

Figure 3: FY2020/21 Aggregate expenditure

Recurrent expenditures

I have not been able to analyse the recurrent expenditure because the information provided does not match the revised budget data. Figure 4 will therefore remain attended.

Figure 4: FY2021/21 Recurrent Expenditures

Capital Expenditures

Overall project expenditure was M3.827 billion against the budget of M7.105 billion representing an execution rate of 54%. **Figure 5** illustrates that the implementation rate varied considerably across the three funding categories, ranging from 52% of domestic resources to 89% and 45% for grant and loan funded expenditures, respectively.

Physical progress of the capital projects generally lagging behind scheduled timeframe due to various reasons as stipulated in the Annual Progress Report as submitted by the Chief Accounting Officer of the MDP. It is also evident that on foreign debt the execution is low.

Figure 5: FY2020/21 Capital Expenditures

81% of the capital expenditure budget is accounted for by eleven Spending Units (Public Works, Water, Local Government, Finance, Energy, Development Planning, Trade and Industry, Health, Home Affairs and Agriculture). Project execution rates varied across these agencies ranging from 0% for Development Planning to 96% for Home Affairs.

Financing

Total stock of public debt decreased during FY2020/21 from M 19.320 billion to M18.250 billion as illustrated in Figure 6. The decrease is attributed to the reduction after clearing the Treasury Bills. New external debt agreements during FY2020/21 amounted to M1.9billion. External debt disbursements of M2.060 billion and loan redemptions of M 74,887 million were made. Over the seven-year period since FY2014/15, the loan stock has decreased by 64%.

Figure 6: FY2020/21 Public Debt

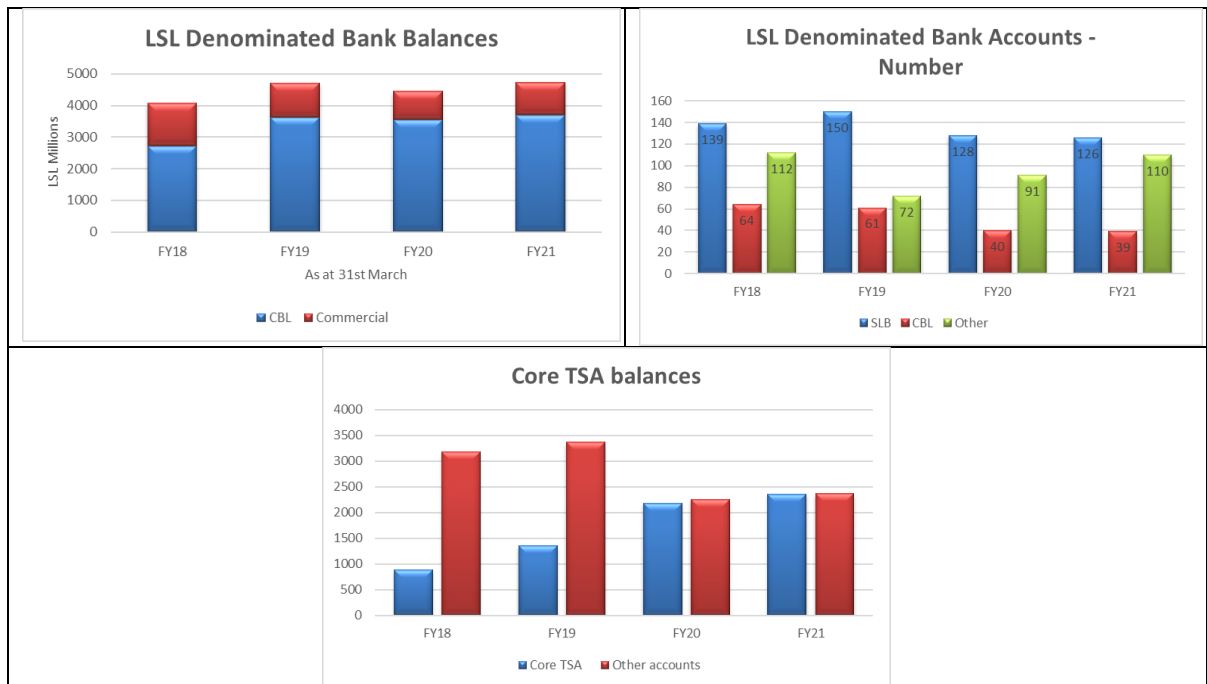

Cash

During FY2020/21 the government’s cash LSL balances increased from M 4.446 billion to M 4.732 billion. At the end of the year the total cash balance was M 5.097 billion showing an increase from M 4.945 billion in the closing cash balance. Additional receipts from development partners and domestic borrowing has been the main source for funding the budget deficit.

Figure 7 illustrates the movements in cash balances and the number of bank accounts.

Figure 7: FY2020/21 Cash Balances

Unlike in the previous financial years, core TSA accounts and other Maloti denominated accounts both hold almost equivalent balances. Much of that money is earmarked for particular projects, loan servicing, liquidity management and extra budgetary purposes

and is unavailable for meeting future budgeted expenditures. The core-Treasury Single Account (TSA) includes the Consolidated Fund bank account and is the repository for all government revenues and the source of its expenditure funding.

E. SIGNIFICANT ISSUES

My previous report I indicated issues that adversely impact on the quality of the consolidated financial report. Some of the issues still remain a challenge but efforts are underway to address them over a period of time. The Minister of Finance through the Treasury Department has been mandated to develop a Roadmap that will improve the audit opinion from adverse to clean. This Road map shall be developed in the year 2020/2021 for implementation thereof.

Submission of Chief Accounting Officers reports for Consolidation

The delay for the CAOs to submit financial reports is still a persisting challenge. This year the delay has been aggravated by the work shifts as a result of the COVID-19 pandemic restrictions. The submissions were done from August 2021 to mid-September 2021. CAOs must start to own the preparation of the reports for their spending units so that they are able to account for their budgets and the level of service delivery.

The other challenge that we encountered as we worked on the consolidation, which also contributed to the delay, is the fragmented arrangement that exists within the spending units for the Project Implementation Units (PIUs) with the Accounting Units of the same spending units. There seems to be lack of coordination and collaboration between these units. It is as though the two units work under different CAOs. The challenge was experienced particularly in the Ministries of Health and Agriculture & Food Security. These ministries, together with the Ministries of Small Business and Foreign affairs were amongst the last to submit even this for the 2020/21 financial reports. The Ministry of Small Business was challenged by the vacancy factor, whilst for Foreign Affairs and International Relation there was a delay with submitting the returns by the Foreign Missions abroad to the capital.

Late submissions prohibit us to adequately scrutinize the submission, hence the key factor hindering improvement on the quality of the consolidated report.

COVID-19 Pandemic

A separate report will be prepared for the COVID-19 budget. However, in brief, on or around 17 March 2020 the Right Honourable Prime Minister declared COVID-19 as disaster in accordance with the Disaster Management Act, 1997. A bank account specific to COVID-19 operations was opened under the Disaster Management Fund. On 31st March an amount of M40 million was deposit for COVID-19 operations. During 2020/21 financial year, a budget of M648 million was allocated for treatment of the COVID-19. Later in the year a budget of M1,184 million was allocated across ministries for mitigation of the impact that was expected from the COVID-19.

Suspension of Netcare health services at Tsepong Health Centres

During the last quarter of the 2020/21 financial year the Government of Lesotho withdrew from the contract that it had with Netcare at Tsepong Health Centers. The Ministry of Finance and the Health have been working on the impact assessment of the withdrawal and the amount of liability and contingent liability that we face as country. The impact of the withdrawal has not been determined at the time of this report. It is however worthy to be disclosed.

IFMIS

After the upgrade of IFMIS in 2019, there were still some connectivity shortfalls that had an impact on the stability of the system. Stability and coverage issues will be expected to be addressed further during 2021/22 for both the central and local governments. A lot was done to improve power supply during times of inevitable power cuts by the Lesotho Electricity Company.

COVID-19 lockdown had an adverse impact for both interfaces of IFMIS with other systems and the opening balances exercise, since there were foreign consultants from outside Lesotho. Movement of the consultants was stifled and working remotely delayed some of the activities. Interfaces with the Lesotho Revenue Authority was close to completion at 31 March 2021. On the other hand, the Public Debt system was planned to go live and be integrated with IFMIS.

As indicated above, there was a delay on the exercise for opening balances. During 2020/21 there was a recommendation from the Auditor-General for the write-off for the balances that could not be addressed since 2008/09 financial year. At the time of developing this report, the report from the consultant who was working on the opening balances was received. After this financial reporting season, the Treasury is expected to work on the recommendations from both the Auditor-General and the consultant to enhance the financial reports in the future years.

Review of the PFM legal framework and National Reforms Authority

There are gaps in the legal framework that require to be addressed. Some of these gaps occurred as a result of the implementation of the upgraded IFMIS, whilst some accrue as consequences of the reforms in the public sector finance fraternity. As I prepare this report, the PFMA Act, 2011, is under review. When the exercise is done the Treasury Regulations will be reviewed too.

Budget and cash challenges

I have noted inconsistencies in the budget figures. Figures on the Appropriation Act were not similar to the budget book and the budget data that was sourced from the Budget Department. Another concern from my desk is the exclusion of capital receipts in the budget book, with correct line items. This will enhance transparency and accountability on the external assistance from development partners. Currently, the external assistance

is only shown on the expenditure side of the budget. As a result, the trial balances of the ministries have to be worked on to include the receipts with line items that are not shown on the budget. This may cause inconsistencies in the financial data of GOL.

Furthermore, 2020/21 financial year has been the worst year as far as the cash inflow is concerned. The inflows could not match the high cash outflows and this caused a delay in payments. The payments spilled over into the 2021/22 financial year as unrepresented payments. It shows that the warrants released, authorized the payments that exceeded the cash available for the year. This issue will be seen rolling over to the future financial years for a while. It is also evident that there is need to expedite the steps to the implementation of the Treasury Single Account to ease cash forecasting and general management of the depleting cash.

Public Service Issues

i) Temporary employment

Lately there seems to be a lot of temporary appointment of personnel across the government that exceed six months contrary to Public Service Regulations, 2008. The Regulations provide that a temporary employment cannot exceed six months. But ministries engage temporary officers for up to 3 years. According to the Regulations there is different process for engaging temporary employees from the one that facilitates for appointing officers on the contract basis. Contract appointments are expected to be done by the Public Service Commission, or through their delegated authority. The contract appointments are also done for a special skill.

The current trend is that the ministries appoint officers without the consent of the Public Service Commission. It should be noted that the officers are engaged illegally and there is high outflow of cash for terminal benefits for the officers every three years.

Drawbacks of these engagements are as follows:

- Increased wage bill
- Short-termism and loss of institutional memory

ii) Bonding Agreements Receivable

There is an outstanding amount for the penalty of M7,534,699 for officers who violated the Bonding Agreement between them and the government. The Public Service Regulations provides that an officer shall serve the government for the period stipulated on the agreement post their study leave. It seems officers leave the service before the stipulated five years. This amount has been accumulating for many years. It seems also that there is no enforcement for this provision by the relevant ministries together with the Ministry of Public Service

Administration of the Accounting Cadre

It is my pleasure to report that the challenges that were caused by the Ombudsman determination have been resolved and the positions at the Ministry of Finance are currently being filled by the Public Service Commission.

CAOs are also expected to fill the senior positions of the Accounting Cadre structure in their respective ministries. This will help them to enhance quality of the Financial Reports and the timeliness thereof, impacting positively by increasing transparency and accountability which will ultimately be so for the entire government.

Year-end payment surges. This is a persistent problem. The number and values of invoices submitted for payment in March can be two or three times those of other months. The surge places considerable stress on the Treasury staff and systems, and whilst they ensure that all payments are recorded in the accounting system prior to the year-end date, the signing, dispatch and payment of these vouchers inevitably overflows into the next financial year. The practice adversely impacts on cash management, budget credibility, financial reporting, bank reconciliation functions and payment efficiency.

The situation causes the government to have arrears that must be cleared in the subsequent financial years. Arrears paid during the financial year 2020/21 amounted to M 566 million whilst at the end of the year a balance of M721 million was still outstanding. In conclusion, these Consolidated Financial Statements represent improvements over the of previous years, sustaining the gains made and further advancing the quality of financial reporting requires: the continuing cooperation of CAOs, finance officers and other Ministry of Finance department.

Mrs. Malehlohonolo Mahase CA(L)
Accountant General

02 May 2022

III. CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH 2021

For clearer understanding, the statements should be read in conjunction with the underlying accounting policies, notes and additional schedules.

C. Statement of Accounting Policies

The Consolidated Financial Statements have been prepared in accordance with the following accounting policies, which have been applied consistently, and in all material aspects, from one year to another, unless otherwise indicated.

Basis of Preparation

1. **Reporting entity** – These financial statements consolidate information for the national government, including its ministries, departments, Constitutional bodies and other Spending Units covered by the national budget. The lists of included and excluded agencies are shown below in the Statement of Consolidated Entities.
2. **Financial year** – The Government’s fiscal year runs from 1st April to 31st March. These consolidated financial statements cover the year ended 31st March 2021 whilst the comparative actual figures reflect the 12 months ended 31st March 2020.
3. **Reporting currency** – All amounts have been presented in the Lesotho Loti (M). Transactions denominated in other currencies have been converted to Loti at the exchange rate prevailing at the time of transaction. Cash held in other currencies at the year-end have been converted to Lesotho Loti at the exchange rates prevailing on 31st March 2021, as advised by the Central Bank of Lesotho (CBL). Disclosures of borrowings held at 31st March 2021 and denominated in foreign currencies have been similarly converted to their Loti equivalents.
4. **Accounting basis**–The Consolidated Financial Statements comply with the provisions of the Public Financial Management and Accountability Act, 2011 excepting the requirement for their compliance to IPSAS. The Government has embarked on a roadmap for implementing the cash-basis IPSAS but does not yet comply for the following significant reasons:
 - (a) The financial statements do not consolidate all government-controlled entities. State owned enterprises, autonomous institutions and other extra-budgetary funds are not fully consolidated—this IPSAS requirement was relaxed in 2017.
 - (b) Centrally managed bank account balances are not fully reconciled as at 31st March 2021.
 - (c) The financial statements disclose a small number of accrual items which had not been cleared at the reporting date e.g. accounts payable, advances, provisions, third party trusts and deposits. The FY2020/21 flows on these are disclosed
5. **Previous year adjustments** - Corrections made by Spending Units to the reported figures of previous years have adjusted the comparative figures and cash balances

carried forward from the respective years. The adjustments are disclosed in the notes to the financial statements.

6. **Receipts and Other Cash Inflows** - Revenues include the tax collections by Lesotho Revenue Authority (LRA) net of tax refunds, receipts from the Southern African Customs Union (SACU), grants from development partners, dividends, royalties and miscellaneous non-tax revenues collected by Spending Units. Revenues are recognised in the financial records when received.
 - (a) **Grant aid** – grants received from local or foreign institutions are recorded when funds are received or, in respect of grant funded expenditures that benefit government but are disbursed by donors to third parties, upon receipt of notification that the disbursement has been made. In-kind local and foreign aid assistance are disclosed in the statements at fair value based on records supplied by the donors.
 - (b) **Foreign exchange gains** – realised gains are recognised on payment of funds.
 - (c) **Sale of investments** – revenues from the sale of shares in trading entities are recognised in the financial statements on receipt of the sale proceeds.
 - (d) **Borrowing receipts** – loans received from local or foreign institutions are recorded when funds are received or, in respect of loans disbursed by institutions to settle government obligations to third parties, upon receipt of notification that the disbursement has been made.
 - (e) **Short term borrowings** – receipts of Treasury Bills with tenures of less than one year are recorded on a net basis with the repayment of short term borrowings.
7. **Payments and Other Cash Outflows** - Unless otherwise specified, expenditures are recognised in the financial records when the final authorisation for payment is effected in the IFMIS.
 - (a) **Advances to local authorities** – advances of budgeted monies transferred to district councils were expensed at the time the final authorisation for payment of the advance is effected on the system. Adjustments were made to reflect actual payments incurred during the year by the district council.
 - (b) **Repayment of Borrowings** – Repayments of borrowed monies are recorded when the final authorisation for payment is entered on the system. The values are updated to account for the actual exchange rate applied by the Central Bank of Lesotho. The Notes to the Financial Statements identify the borrowing balances as at 31st March 2021.

- (c) Repayment of short term borrowings** – Repayments of Treasury Bills with tenures of one year or less are recorded on a net basis with short term borrowing receipts.
- (d) Inventories** – Payments for inventories purchased during the year are treated as expenditures. Stock balances and issues are maintained for statistical purposes. The financial value of stock balances is not recognized in the financial statements.
- (e) Donor and Loan Funded Capital Projects** – Payments funded from grants or loans received from local or foreign institutions are recorded as expenditure when the final authorisation for payment is effected on the system, or in respect of loan or grant funded expenditures that are disbursed by the donors or lenders to third parties, upon receipt of notification that the disbursement has been made. In-kind local and foreign aid assistance are disclosed in the statements at fair value based on records supplied by the donors.
- (f) Foreign Exchange Losses** – Realised losses on foreign currency transactions are recognised on the payment of funds.

8. Assets

- (a) Cash and cash equivalents** – comprise cash on hand, balances with banks and investments in short-term money market instruments which are readily convertible to known amounts of cash and are subject to insignificant risk of changes in value.
- (b) Investments** - Investments are not recognized in the Consolidated Financial Statements. They are recorded in the financial records at historic cost and are updated where independent external valuation exercises have been completed. Shareholdings are disclosed in the Notes to the Financial Statements. Any cash flows such as dividends received or proceeds from the sale of the investment are recognised in the financial records when the cash is received.
- (c) Loans and advances** - are recognised as expenditure at the nominal amount when cash is paid to the beneficiary. Loan balances are recorded in a loan register and balances reduced when cash repayments are received from the beneficiary. Balances as at 31st March 2021 are disclosed in the Notes to the Financial Statements.
- (d) Amounts receivable** - Amounts receivable to Government at the reporting date are identified in the Notes to the Financial Statements.
- (e) Property, plant and equipment** – Payments for the acquisition of property, plant and equipment items are not capitalized. The costs of acquisition and proceeds from disposal of these items are treated as expenditure and income items respectively.

9. Liabilities

(a) Borrowings - New borrowings are shown as funding inflows. The stock of public debt as at 31st March 2021 is disclosed in the Notes to the Financial Statements. Public debt comprises domestic and external borrowing by the Government.

(b) Accounts payable - Accounts payable by the Government at the reporting date are identified in the Notes to the Financial Statements.

10. **Contingent liabilities** – A contingent liability is a potential liability that may occur, depending on the outcome of an uncertain future event. Contingent liabilities are included in the Notes to the Financial Statements.

D. Statement of Consolidated Entities

Compliance with the accrual-IPSAS requires the consolidation of the financial information of all government-controlled entities, where the IPSAS definition of control is *“the power to govern the financial and operating policies of another entity so as to benefit from its activities”*. Similar coverage had been a requirement of the cash-based IPSAS but was revised in 2017 and compliance now requires only consolidation of budgetary central government.

Accordingly, the FY2020/21 financial statements have concentrated on consolidating information from the budgetary central government and district councils as listed in Table 1. Coverage of future financial statements will eventually extend to include the controlled-entities listed in Table 2.

Table 1: Controlled entities included in consolidation

Head	Entity	Head	Entity
01	Min. Agriculture & Food Security	19	His Majesty’s Office
02	Min. Health	20	Public Service Commission
03	Min. Education & Training	37	Min. Defence & National Security

	Partial Credit Guarantee Fund	Lesotho Highlands Development Authority
	Road Fund	
	Petroleum Fund	
	Manpower Development Fund	
	HIV/AIDS Fund	

As at the date of preparation of these Consolidated Financial Statements, Appendix 4 provides, where available, additional information on the government-controlled entities detailing the status of their submissions of annual financial statements for audit and the most recent audit opinion.

IV. NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Consolidated Statement of Cash Receipts and Payments Headings:

Head Controlled Accounts – identify transactions and balances controlled by Spending Units outside of the IFMIS.

Treasury Accounts – comprise transactions managed through the IFMIS and the Treasury controlled bank accounts that comprise the core Treasury Single Account (TSA).

Third Party Accounts – bank accounts and transactions are controlled by a third party (e.g. a donor) but government benefits from the transactions.

Basis for budget comparison:

The Consolidated Statement of Comparison of Budget and Actual Amounts include the original budget for FY2020/21 as approved by the National Assembly through the Appropriation (2020/21) Act, 2020. It also includes the revised budget for the year taking account of supplementary budgets, reallocations and other budget variations authorised in accordance with the Treasury regulations. The comparison is made for the major classifications of revenue and expenditure. Appendix 2 provides budget versus actual comparisons analysed by Spending Unit. Appendix 3 tracks the changes from originally approved to revised budget.

Budgets are specific to a financial year. Unexpended budgeted funds at the close of the financial year are surrendered. The budget and accounts are prepared on the basis of similar accounting standards and the same financial year.

Table 3: FY2020/21 Summary Budget (as provided by the Budget Department)

Budget Item	Approved M' million	Supplementary M' million	Reallocation* M' million	Revised M' million
Government Revenues	19,262	-2,159		17,103
Donor Grants	858	79		937
Loans	2,057	1,081		3,138
Total Revenues	22,177	(999)	-	21,178
Recurrent Expenditure:	18,185	3,010	-	21,195
Appropriated	13,559	2,380		15,939
Statutory	4,626	630		5,256
Capital Expenditure:	5,605	1,500	-	7,105
GOL	2,690	340		3,030
Grant Funded	858	79		937
Loan Funded	2,057	1,081		3,138
Contingency	100			100
Total Expenditure	23,890	4,510	-	28,400

Notes:

Cabinet has approved the application of the Contingency Fund and allocation of Supplementary estimates, and instructed the Law Office to draft the Supplementary Estimates Appropriation Bill for submission to Parliament.

Amounts in the Appropriation Act and budget book vary. For the budget versus actual comparison statement the budget book figures have been used, since they are the published versions most accessible to stakeholders and provide the breakdown to line items.

Table 4: FY2020/21 Use of Contingency Fund

DATE APPROVED	MINISTRY/ HEAD	RECURRENT REQUEST	CAPITAL REQUEST	TOTAL ADVANCES APPROVED TO DATE	BALANCE AVAILABLE	PURPOSE/REASON
TOTAL		676,823,901	294,173,479	970,997,380		
1-Apr-20	Contingency Fund	0	0	0	100,000,000	To Fund unforeseen and unanticipated activities. Funds are requested to make payment of one-month salaries subsidy of the industrial/factory workers during the current country lockdown as per the Right Hon. the Prime Minister's Statement.

			Original Budget		100,000,000	
			Additional Budget		- 1,203,911,831	

Receipts

Note 1: Tax Revenues

The Lesotho Revenue Authority (LRA) acts as the government's agent for collecting taxes and customs duties. Collections are regularly remitted to the Consolidated Fund. These are net of any tax expenditures (e.g. for VAT refunds). They also exclude Road Fund collections by the LRA which are transferred directly to the Roads Directorate.

Description	Head Controlled Accounts	Treasury Accounts	3rd Parties Accounts	Total

Note 2b: Dividends

Amounts shown as dividends represent the cash received by government during the financial year. Actual amounts received may relate to the dividends declared by the

enterprises for their previous years' performances. The Government controls state owned enterprises, as listed in Table 2 above, and has minority shareholdings in companies, as indicated in Table 2. Of these dividends received during FY2020/21 were from those shown below. Letseng Mine dividends were reported in the Ministry's disclosure schedules (Ministry of Mining) but not in the Statement of Cash Receipts and Payments, therefore, I could not ascertain whether the collection was received.

Supervising Spending Unit	Entity Name	Dividends Received	
		Actual	
		2020/2021	2019/2020
Finance	Central Bank of Lesotho	117,840	142,177
Finance	Maluti Mountain Brewery		4,972
Finance	Standard Lesotho Bank		24,125
Mining	Letseng Mine	120,000	24,125
Total		237,840	195,399

Disposal of Fixed Assets	-	8,347	-	8,347
Machinery and Equipment	-	8,347	-	8,347
Total Proceed received	-	8,347	-	8,347

Note 15: Cash

Bank accounts are maintained for: effecting central payments; departmental revenue deposits; sub-accountancy operations; projects; special, trust and other extra-budgetary funds; and semi-autonomous government agencies. An ongoing exercise seeks to rationalize the number and uses of government bank accounts and incorporate balances within a Treasury Single Account structure. The number of accounts and their balances (per bank records) are shown below.

Analysis per bank	Accounts at 31 March 2021		Accounts at 31 March 2020

V. DISCLOSURE SCHEDULES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Schedule 1: Investments

The government owns minority shares in the trading entities listed below. The Lesotho National Development Corporation (LNDC), a wholly owned state enterprise, also holds shares in three of these companies. During 2020/21 dividends were received from the Central Bank of Lesotho

Table 6: State Owned Entities

Entity	Government Ownership	Sector	Comments
Letseng Diamonds	30%	Mining	
Kao Mining	25%	Mining	
Liqhobong Mining Development Company	25%	Mining	
Lemphane Diamonds	26.5%	Mining	
Mothae Diamonds	30%	Mining	70% of shares sold in 2016 - 2017.
Gem Stone (Show Ridge)	25%	Mining	
Reskol Diamond Mine (Kolo)	10%	Mining	
Standard Lesotho Bank	9.6%	Banking	
AON	5%	Insurance	
National General Insurance Group	20%	Insurance	
National Life Insurance	12%	Insurance	
Econet Lesotho	30%	Communications	
Lesotho Flour Mill	49%	Milling	
Maluti Mountain Brewery	4.75%	Brewing	LNDC owns 51%
Avani Sun International	36.4%	Hospitality	LNDC owns 16.7%
Loti Brick	22.8%	Brick Making	LNDC owns 73.6%

Schedule 2: GOLFIS balances

Prior to migrating to the Epicor IFMIS system in April 2009, accounting records were maintained in the Government of Lesotho’s Financial Information System (GOLFIS). At that time the decision was made to only load opening cash book and other balances if they were properly supported. The OAG report on the 2009/10 consolidated statements acknowledged the discrepancies and recommended that they be regularized – this task has yet to be completed. Table 7 shows the current status:

Table 7: GOLFIS Balances

Below- the-line account	GOLFIS (M000’s)	Bank (M000’s)	Comments

Schedule 3: Accounts Receivable and other Revenue Arrears

Revenue arrears are amounts receivable by the Government but which have not been remitted to government by the due date. The below table analyses the overdue debt by spending units and period for which amounts are overdue. It records those debts owed to the Government budget agencies. It excludes moneys owed to sub-vented agencies (e.g. Tertiary education institutions), extra budgetary funds (e.g. National Manpower Development scheme), rental arrears; rechargeable works; refunds of overpayments to employees and suppliers; replacement of returned to sender (bounced) cheques; interest and principal payments due on loans made to individuals and institutions; and advances where the acquittal is overdue.

Table 8(a): Overdue Debt Analysis by period

Schedule 4: Pension Liabilities

The Public Officer's Defined Contribution Pension Fund Act (2008) was established to deliver pension benefits to contributing members employed in the Lesotho public service. Statutory actuarial valuations of the Fund are required at regular intervals to assess the viability of the Fund to pay future pension and benefit obligations. The auditor's report on the Fund's annual report for FY2015/16 raises doubt on the Fund's ability to meet future benefits when due and payable. It bases that conclusion on an actuarial valuation of the Fund as at 31st March 2014 which indicated an underfunding of M5.560 billion and the valuator's revised report which assessed the underfunding as M5.890 billion as at 31st March 2016.

Schedule 5: Public Debt

Public Debt comprises domestic and external borrowings. The increase in the debt stock reflects the additional domestic borrowing, net new disbursement and the effects of the depreciation of the Maloti against the major currencies in which the external loans are denominated.

Table 10: External Liabilities

External Debt (Maloti equivalent)	Balance at 31 March 2020	2020/21	2020/21	2020/21	31 March 2021	Interest paid

Schedule 6: On-lending arrangements

The Government lends or on-lends loans to state-owned-enterprises and other entities for specific purposes consistent with its development policy objectives. The borrower is obliged to pay interest and repay principal sums to government in accordance with the terms and conditions agreed between the parties. The table below summarises the FY2020/21 transactions and year-end status.

Table 14: On-Lending Transactions and Year-End Status

Benefitting Agency	Closing Balance as at 31st March 2020	Opening Balance as at 01st April 2020	Transactions during the month			Closing Balance as at 31st March 2021
			Loans Repaid	Interest charges Paid	Cancelled	
Tikoe Factory Shells	35,000,000	35,000,000				35,000,000

Lesotho Electricity Supply Project	33,060,171	33,060,171	1,944,716	729,274		31,115,455
TOTAL	984,385,119	984,385,119	24,509,459	15,715,973	-	959,875,660

NOTE

The yellow highlighted figures have been adjusted in that the LSL 7,373,161.17 repayment for loan II had been mistakenly captured under loan I

Schedule 7: Payment Arrears

Payment arrears are payment obligations on Government to individuals, suppliers, lenders or contractors that were due for settlement prior to 31st March 2021, but which remained unpaid as at that date. Their eventual settlement will be against the budget appropriations for future years. The table below provides a summary analysis of payment arrears declared by Spending Units and the periods for which payment is overdue. It shows that M488 was owing to suppliers (an increase of M289 million or 145% compared to the previous year). Of this M114 million (23% of the total) has been overdue for more than six months to over a year.

Table 15(a): Analysis of Payment Arrears by period

Spending Unit	Period Overdue				Total Payment Arrears at 31st March 2021 M'000
	More or equal 1 year M'000	More than 6 Months, Less than 1 Year M'000	More than 3 months, Less Than 6 Months M'000	Less or equal 3 Months M'000

Table 17: Pending Litigation Claims (per CAO Annual reports)

The contingent liabilities also comprise pending litigation claims for compensation and potential liabilities from Public-Private Partnerships (PPP). Potential compensation payable are identified in individual CAO annual reports, and summarized below. Exposure to contingent liabilities from the PPP arrangements managed by the Ministry of Health have yet to be assessed.

PART 2

AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS

CHAPTER 1: CONSOLIDATED FINANCIAL STATEMENTS

1.1 CONSOLIDATED FINANCIAL STATEMENTS

Consolidated Financial Statements are the financial statements of an economic entity in which cash receipts, cash payments and cash balances of the controlling entity and its controlled entities are presented as that of a single entity.

1.2 LEGAL BASIS

According to Section 4 of the Public Financial Management and Accountability (PFMA) Act 2011, functions of the Minister include preparation of consolidated quarterly and annual financial statements for Government and for Parliament, and other reports and statements required from time to time.

The Minister is further obliged by Section 35 of the PFMA Act 2011 to prepare consolidated financial statements in relation to the finances of Government and those statements should be submitted to the Auditor-General for audit within five months of the end of the financial year.

1.3 CASH BASIS OF ACCOUNTING

a) Legal requirement

Section 35(3) of the PFMA Act 2011 requires that the consolidated financial statements should be prepared in accordance with International Public Sector Accounting Standards (IPSAS). Under IPSAS cash basis of accounting, the government must report fully upon all of the receipts and expenditures of all entities and funds under its control, including any extra-budgetary funds, which have been received and disbursed during the year by or on behalf of its agencies.

b) Objectives of IPSAS Cash Basis of Accounting

The objectives of financial reporting by public sector entities under cash basis of accounting are to provide information about the cash receipts, cash payments and cash balances of an entity necessary for accountability purposes and to provide input useful for assessment of the ability of the entity to generate adequate cash in the future and likely sources and uses of cash.

IPSAS are designed to apply to public sector entities that:

- a) Are responsible for the delivery of service to benefit the public and/or to redistribute income and wealth.
- b) Mainly finance activities directly or indirectly, by means of taxes and/or transfers from other levels of government social contributions, debt and fees.
- c) Do not have a primary objective of making profits.

c) Benefits of complying with the standard

Compliance with the requirements and encouragements of IPSAS cash basis of accounting improves comprehensive and transparent financial reporting of the cash receipts, cash payments and cash balances of the entity. It also enhances comparability with the entity's own general-purpose financial statements or previous periods and with the financial statements of other entities, which adopt the cash basis of accounting.

1.4 SHIFT TOWARDS ACCRUAL BASIS OF ACCOUNTING

The extensive and complete recording of financial assets and liabilities remains to follow as a next step, with a shift towards full accrual accounting and the complete reporting of all assets and liabilities in the longer term. This is emphasised by Section 62 of the PFMA Act 2011, which states that until such time as the Minister publishes the date of commencement of the accrual basis of accounting, the cash basis of accounting shall remain in operation.

1.5 FINANCIAL GUIDANCE AND INSTRUCTIONS

Detailed guidance and instructions exist with respect to internal control and maintenance of accounting records in the form of:

- Treasury Regulations 2014
- Public Procurement Regulations 2007
- Stores Regulations 1969
- Circulars issued by the Treasury

These requirements are intended to safeguard Government property and to ensure the collection and use of resources in the public interest.

1.6 RESPONSIBILITIES OF CHIEF ACCOUNTING OFFICERS

The Chief Accounting Officers are responsible for maintaining a system of internal controls in order to provide reasonable assurance that transactions are properly authorised, assets are safeguarded, and financial records are properly maintained. This allows for the preparation of Consolidated Financial Statements by the Accountant-General that are free from material misstatements, whether due to fraud or error.

1.7 PREPARATION AND SUBMISSION OF THE CONSOLIDATED FINANCIAL STATEMENTS

The consolidated financial statements were prepared in accordance with the PFMA Act 2011 and the Treasury Regulations 2014, which require that the financial statements should be submitted for audit within five months after the closure of the financial year.

The consolidated financial statements for the year ended 31 March 2021 were submitted for audit on 18 October 2021.

1.8 STATEMENTS SUBMITTED FOR AUDIT

The consolidated financial statements submitted for audit comprised:

- Consolidated Statement of Cash Receipts and Payments depicting total cash receipts, total cash payments and opening and closing cash balances;
- Consolidated Statement of Budget and Actual Amounts showing revenue and expenditure compared with amounts authorised by the Legislature;
- Statement of Accounting Policies and Statement of Controlled Entities; and
- Notes to the financial statements and Disclosure schedules to the financial statements.

CHAPTER 2: AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS

2.1 AUDIT OF FINANCIAL STATEMENTS

The Government accounting allows the users of the financial statements to track overall spending. The main focus for my report on the audit of the consolidated financial statements is to provide assurance that they present fairly financial position and performance of Government. Confidence in the reliability of government reporting allows Parliament to properly scrutinise the Government's financial performance and direction.

2.2 CONSTITUTIONAL AND LEGAL BASIS FOR AUDIT

My office has a broad mandate for conducting audits on any Government agency. Mandate for audit, the right of access to all documents and the independence of the Office, are enshrined in Section 117 of the Constitution of Lesotho. The Audit Act 2016 expands this right of access to include explanations and information as well as access to all Government property.

The Constitution requires Auditor-General to audit and report at least once in every year on the public accounts of the Government of Lesotho, the accounts of all officers and authorities of that Government, the accounts of all courts in Lesotho, the accounts of every Commission established by the Constitution and the accounts of the Clerk to each House of Parliament.

2.3 RESPONSIBILITY OF THE AUDITOR-GENERAL

My responsibility is to audit the consolidated financial statements and form an opinion based on the audit work conducted. I also examine the extent to which the financial rules and other regulations and directives are adhered to.

It is important to understand that an audit provides reasonable assurance as to the accuracy, completeness and fair presentation of the financial statements in accordance with the applicable financial framework. It is possible that when I audit not all misstatements, as a result of error or fraud will be detected. However, when issuing an opinion I am satisfied that I have obtained sufficient and appropriate audit evidence, which leads to my belief that any undetected misstatements would not be material.

2.4 AUDIT METHODOLOGY

My responsibility is to undertake the audit and obtain appropriate and sufficient audit evidence as required by the International Standards of Supreme Audit Institutions (ISSAIs) as issued by the International Organisation of Supreme Audit Institutions (INTOSAI). These standards ensure that my audit is conducted with appropriate rigour and professionalism.

The main objective of the audit was to ensure that the reported financial statement balances materially agree with the accounts and records maintained by Treasury Department and Spending Units, and that the balances fairly present and disclose the financial operations of the Government of Lesotho.

2.5 AUDIT PROCEDURES

The audit procedures were primarily designed to detect material misstatements in the financial statements. Materiality means how significant an omission or misstatement in the financial statements can influence or change the decisions of reasonably knowledgeable users relying on the financial statements.

The audit was not designed to ensure that the financial statements are 100 percent accurate, since it is not possible to verify all transactions. The audit was designed to gain reasonable assurance that the financial statements are free from material misstatements. Audit procedures included examining, on test basis, evidence supporting the amounts and other disclosures in the financial statements, and evaluating the accounting policies used, as well as overall presentation of the financial statements. The errors discovered were accumulated and assessed on whether they would, in aggregate, cause the financial balances to be materially misstated.

The audit was also not designed to detect fraud, and therefore the results of my audit cannot be relied upon to identify and/or disclose all such matters. However, the audit was planned and executed so that I can have a reasonable expectation of detecting material misstatements resulting from irregularities, including error and/or fraud.

2.6 TYPES OF AUDITS PERFORMED

The Auditor-General has the mandate to carry out examinations into the financial management of any state agency, including the efficiency and effectiveness of the use of their resources in discharging their functions.

My office is therefore, primarily involved in three types of audits. **Financial audit** involves verifying the accuracy of the information reported in the financial statements. **Compliance audit** involves verifying whether the rules, regulations, directives and procedures are adhered to. **Performance or Value-For-Money audit** focuses on whether there was efficiency and effectiveness in the use of resources. Performance audit assesses the management and performance issues facing an organisation or its operations.

CHAPTER 3: CASH BALANCES

3.1 CASH BALANCES

The cash basis of accounting recognises transactions and events only when cash (including cash equivalents) is received or paid by the entity. This method does not recognise accounts receivable and accounts payable. Financial statements prepared under the cash basis provide readers with information about sources of cash raised during the period, the purpose for which cash was used and the cash balances at the reporting date. **The measurement focus in the financial statements is balances of cash and changes therein.**

Cash comprises cash on hand, demand deposits and cash equivalents. Demand deposits and cash equivalents consist of balances with banks and investments in short-term money market instruments. Cash included in the Consolidated Statement of Cash Receipts and Payments should comprise cash on hand, cash balances with banks and short-term investments presented on the notes to the financial statements.

However, since financial year 2009/10 when the Government of Lesotho first adopted IPSAS under cash basis of accounting, there has not been a time when cash balances at the end of the year per Consolidated Statements of Cash Receipts and Payments tallied with the explanatory notes to the financial statements as indicated on Table 3.1. In the financial years 2015/16 and 2016/17, opening and closing cash balances were not disclosed in the Statement of Cash Receipts and Payments.

There has always been neither explanation nor disclosure on the variances between cash balances at the end of the year and explanatory notes. As I have already indicated in the preceding paragraph that under cash basis of accounting the measurement focus in the financial statements is balances of cash and changes therein, then there is a **serious problem of substantiating balance of cash the Government of Lesotho had at the end of each financial year.**

Table 3.1– Status of Cash Balances for the past 12 financial years

Financial Year	Cash at the beginning of the year per Statement of Cash Receipts and Payments	Cash at the end of the year per Statement of Cash Receipts and Payments	Explanatory notes on cash at the end of the year in the Statement of Cash Receipts and Payments	Unexplained Variance
	M'000	M'000	M'000	M'000

3.2 CASH POSITION

In terms of Section 74 of the Treasury Regulations 2014, the Accountant-General is authorised to establish and maintain agreements with the Central Bank of Lesotho to define and operate the Consolidated Fund bank accounts structure, including sub-accounts and also to establish and maintain agreements with commercial banks on the operation of other official bank accounts.

Note 15 to the financial statements indicate that there were 383 bank accounts as at 31 March 2021 presented on Table 3.2. Central Bank of Lesotho held 92 accounts with total balance of M4.299 billion whereas commercial banks held a total of 291 accounts amounting to M1.164 billion.

Even though the Consolidated Statement of Cash Receipts and Payments reflects that Government had cash of M11.620 billion as at 31 March 2021, however, Note 15 to the financial statements reflects a total cash of M5.463 billion at various banks resulting into unexplained difference of M6.157 billion. This unexplained

difference is of critical concern as it has increased by M2.744 billion from M3,413 billion as at 31 March 2020.

Table 3.2 - Cash position as at 31 March 2021

Accounts	Central Bank of Lesotho		Commercial Banks		Total	
	No. of accounts	Amount	No. of accounts	Amount	No. of accounts	Amount
		M'000		M'000		M'000

3.3 DIFFERENCES BETWEEN NOTE 15 TO THE CONSOLIDATED FINANCIAL STATEMENTS AND BANK CONFIRMATIONS

Verification of Note 15 to the consolidated financial statements through bank confirmations revealed a discrepancy of M457,000 on accounts held at Standard Lesotho B3.3ank and M704,000 on accounts in the Foreign Missions. The variance of M704,000 was attributed to misstatement of the Euro currency balance as EUR 448,435.53 in Brussels instead of EUR 408,234.81 in the Ministry's lead schedule as at 31 March 2021.

The comparison of Note 15 to the consolidated financial statements and bank confirmations and the results thereon are presented on Table 3.3.

Table 3.3-Variances between financial statements and bank confirmations

Bank	Note 15 to the Consolidated Financial Statements		Bank Confirmations		Variance

3.4 DIFFERENCES IN CASH INCREASE

I had earlier indicated that according to Note 15 to the consolidated financial statements, there were 383 bank accounts totalling M5.463 billion as at 31 March 2021. On 31 March 2020 there were 374 accounts amounting to M5.311 billion and there was an increase of 9 accounts to the tune of M152 million as presented on Table 3.4 below. However, the Consolidated Statement of Cash Receipts and Payments reflect cash increase of M2.865 billion.

The variance already raises a doubt on the accuracy of the Consolidated Statement of Cash Receipts and Payments and therefore the reported cash balances cannot be relied upon.

Table 3.4- Cash Increase/(Decrease)

Bank	Accounts at 31 March 2021		Accounts at 31 March 2020		Increase / (Decrease) in No. of accounts	Cash Increase/ (Decrease) (M'000)

3.5 INFORMATION PROVIDED BY BANKS

In my last year's report I pointed out that bank confirmations are the most reliable type of audit evidence that auditors can obtain with regards to the existence, accuracy and the ownership of bank accounts; and bank account balances of the audited entity. I expressed my dissatisfaction on the inconsistent information provided by the banks. Once again I have a concern about information from Standard Lesotho Bank and therefore advise the Accountant-General to encourage the banks to ensure that their information is verified before providing bank confirmations in order to maintain credibility of information to their customers.

a) Inconsistent information provided by Standard Lesotho Bank

Standard Lesotho Bank provided signed/certified bank confirmations as at 31 March 2021 and confirmations in soft copy in September 2021. My examination revealed that the bank had provided different information on confirmation of balances as at 31 March 2021, which raised a doubt on the reliability of reported cash position of the Government of Lesotho as of that date.

On follow-up of the differences, the bank was requested to provide authentic confirmation of the balances. The bank provided another hard copy confirmation in March 2022 and the comparison of the two hard copy confirmations revealed a difference of 4 accounts totalling M11 million as shown on Table 3.5(a). In addition, some of the accounts reported as active in September 2021 were reported as dormant in March 2022 and others previously reported as dormant were reported as active in March 2022. Some accounts that had balances in March 2022 submission were different from those reported in September 2021.

The differences cast doubts on the reliability of information provided by the bank.

Table 3.5(a)- Comparison of Bank Confirmations as at 31 March 2021

Status of Accounts	Information as per bank confirmation submitted in September 2021		Information as per bank confirmation submitted in March 2022		Variance	
	No.	Amount (M'000)	No.	Amount (M'000)	No.	Amount (M'000)
Active	122	438,328	129	418,135	-7	20,193
Dormant	13	41,136	14	72,457	-1	(31,321)
Inactive	4	401	4	106	0	295
Closed	4	-	0	-	4	-
Total	143	479,865	147	490,698	(4)	(10,833)

b) Closed bank accounts – Standard Lesotho Bank

Comparison of previous year's bank confirmation and current year's bank confirmation revealed thirty-two (32) accounts that appeared on bank confirmation as at 31 March 2020 but no longer appeared on bank confirmation as 31 March 2021.

Upon inquiry, the bank reported that the thirty-two (32) accounts had been closed. It was noted that thirteen (13) of those accounts, listed on Table 3.5(b) below, appeared to have been closed prior to 31 March 2020, with some closed as far back as 2017, yet they were reported by the bank as active as at 31 March 2020.

This further raised uncertainty on credibility of information provided by Standard Lesotho Bank.

Table 3.5(b) - Closed accounts

Source: Bank confirmation on closed balances

c) Duplicated information by Nedbank Lesotho

Scrutiny of bank confirmations revealed that Health Sector Support – Nutrition Account (11990086933) with a favourable balance of M3,823,933.95 was duplicated on the bank confirmation as at 31 March 2021.

3.6 OWNERSHIP MANAGEMENT OF BANK ACCOUNTS

I had raised a concern in my 2019/20 Audit Report that the Accountant-General had not properly maintained the register for official bank accounts properly and as a result, I could not verify the number of accounts against the information provided by the banks.

I am pleased to report that the register has been maintained and complied with the requirements of Treasury Regulations 2014 that it should provide information such as date account opened, date account closed, account purpose, account use, funding type, account signatories and balance among others. However, the audit noted that in several instances the columns were not filled.

Furthermore, the audit established that number of bank accounts held in various banks per register is 366 while bank confirmations reflect 383 accounts as at 31 March 2021 resulting into a difference of 17 accounts, which could have occurred due to the following:

a) Nedbank Lesotho accounts

- Three accounts operated by the Prime Minister's Office appeared in the register without balances but not on the bank confirmations.
- One account operated by the Ministry of Justice with unfavourable balance of M353.33 on the bank confirmation did not appear in the register.

b) Lesotho Postbank accounts

One account controlled by the Prime Minister's Office appeared in the register but not on the bank confirmation.

c) Standard Lesotho Bank accounts

Nine accounts totalling M10,536,871.00 controlled by various ministries were reflected in the register but not on the bank confirmations.

d) Central Bank of Lesotho accounts

- Eight accounts with a total balance of M11,304,013.00 appeared to have been closed as per register however, they were reported as active on the bank confirmation.

- Five foreign currency (USD) accounts with nil balances appeared on the bank confirmation but not in the register.

e) Bank accounts in South Africa

The following accounts held with banks in South Africa appeared in the register, however they were not reported in the financial statements and had no bank confirmations.

- A special fund account held with Standard Bank and operated by the Ministry of Labour with a favourable balance of M2,537,934.99.
- Roads Directorate Money Market Fund account held with ABSA operated by the Ministry of the Public Works. The balance was not stated.

Due to the above stated discrepancies, I cannot place reliance on the register maintained by the Accountant-General for number of accounts the Government holds in various banks.

3.7 DORMANT AND INACTIVE ACCOUNTS

Section 83 (1) of the Treasury Regulation 2014 states that a Chief Accounting Officer who no longer needs an official bank account should seek the approval of the Accountant-General to close the account. Sub-section 2 of the same regulation further requires the Accountant-General to review all official bank accounts annually and arrange for closure of any accounts considered unnecessary, invalid or inactive and transfer any balance to a Consolidated Fund Bank account.

The audit established that as at 31 March 2021 the banks reported 20 bank accounts totalling M72 million to have been dormant or inactive. However, the banks had not indicated the period the accounts had been dormant or inactive.

Bank	Status	No. of accounts	Amount
Standard Bank	Lesotho Dormant	14	72,457,462
Standard Bank	Lesotho Inactive	4	106,119

First National Bank	Inactive	3	24,281
Total		20	72,587,862

I could not ascertain reasons the Chief Accounting Officers of the relevant ministries had not sought approval for closure of these bank accounts. It also appears that due to absence of bank accounts register in the past years, the Accountant-General could not review all official bank accounts annually and arrange for closure of any accounts considered unnecessary, invalid or inactive.

3.8 UN-RECONCILED CASH BALANCES AT THE FOREIGN MISSIONS

Review of bank reconciliation statements for accounts operated in Foreign Missions revealed that current accounts for Berlin mission and Durban consulate did not reconcile with cashbook balances as at 31 March 2021, thus leaving un-reconciled amounts of M79,393.22 and M 32,514.50 respectively.

The issue of un-reconciled amounts for the same missions was raised in last year's report and it is apparent that the issue has not been addressed.

Furthermore, there were no bank reconciliation statements for the following 8 bank accounts totalling M12.6 million held in different foreign missions shown on Table 3.8 below. There was also no bank confirmation for Tokyo account number 898552.

Table 3.8 - Non-availability of bank reconciliations

Mission name	Bank Account No.	Currency Code	Foreign Currency Balance	Exchange Rate applied	Balance in Maloti
Berlin	268082507	EUR	52,467.39	17.5070	918,546.60
Brussels	BE27310038449573	EUR	408,234.81	17.5070	7,146,966.82

CHAPTER 4: CASH RECEIPTS

4.1 CASH RECEIPTS

Recurrent and capital are the two streams of receipts that constitute the resources of the Government of Lesotho. Recurrent receipts include direct and indirect taxes, fees, charges and dividends. Capital receipts comprise miscellaneous capital receipts and donor funds (loans and grants). Government ministries responsible for the collection of revenue are given targets in terms of approved estimates for each financial year.

Revenue figures included in the consolidated financial statements are actual receipts some of which may not necessarily relate to the current financial year. Revenue arrears realised relating to previous years are accounted for as current revenue in the year of collection.

4.2. CASH RECEIPTS FOR 2020/21

Cash receipts for the year ended 31 March 2021 amounted to M20.233 billion which was more than the previous year's figure of M16.909 billion by M20%. Revenue collections overall reported in the financial years 2016/17 to 2020/21 are summarised on Table 4.2 below.

Even though there was a general increase of 20%, a decline of M617 million or 8% was noted on taxes.

Table 4.2 – Trends in Cash Receipts

Description	2020/21 M'000	2019/20 M'000	2018/19 M'000	2017/18 M'000	2016/17 M'000

4.3 DIVIDENDS

Dividends represent cash received by Government during the year on profits declared by the enterprises to their shareholders for the previous years' performance.

In my last year's report, I expressed my dissatisfaction on monitoring of dividends receivable by the Government. The situation has not improved as out of 15 entities, only two entities paid dividends totalling M238 million as presented on Table 4.3.

Table 4.3 – Dividends received

Entity	Government Ownership	Dividends received in 2020/21	Dividends received in 2019/20	Dividends received in 2018/19	Comments

4.4 COMPARISON OF THE CONSOLIDATED FINANCIAL STATEMENTS, MINISTRIES' FINANCIAL STATEMENTS AND IFMIS LEDGER

Daily financial transactions of Government are recorded in the IFMIS ledger and transactions captured outside the system should eventually be posted into IFMIS ledger. The financial statements are prepared on the basis of IFMIS ledger. The consolidated financial statements are consolidation of ministries' accounts which comprise head controlled accounts, Treasury accounts and Third parties accounts. It is therefore expected that the consolidated financial statements, ministries' accounts and IFMIS ledger should reflect same information.

Audit Concerns:

- a) It can be noted from Table 4.4 that out of 27 collecting units only 9 reflected same figures on the consolidated financial statements, ministries' accounts and IFMIS ledger. The consolidated financial statements reflected total figure of M18.050 billion, ministries' accounts is M17.610 billion whereas IFMIS ledger had a total figure of M17.781 billion.
- b) Comparison of the consolidated financial statements and IFMIS ledger revealed overstatement of consolidated financial statements by M269 million whereas comparison of ministries' financial statements and IFMIS ledger revealed understatement of ministries' accounts by M170 million.
- c) The differences are indication that some transactions were not posted in the ledger and the other reason was inclusion

of securities other shares (incurrence of domestic debt) in the amount of M440 million under recurrent revenue in the IFMIS ledger whereas the amount should have been classified under loans.

Table 4.4 – Comparison of consolidated financial statements, ministries’ financial statements and IFMIS ledger

4.5 CAPITAL RECEIPTS

Capital receipts comprise of donor grants and donor loans dedicated to finance development projects. Grants received during the year under review amounted to M923 million and loans totalled M1.259 billion as presented on Table 4.5. Donor funds therefore totalled M2.182 billion which was higher than last year's figure of M1.548 billion by M634 million or 41%.

Table 4.5 – Capital Receipts

CHAPTER 5: CASH PAYMENTS

5.1 CASH PAYMENTS

Cash payments consist of payments made on recurrent expenditure and development expenditure. Cash payments amounted to M21.045 billion comprising of recurrent expenditure of M17.157 billion and development expenditure of M3.888 billion.

5.2 PAYMENTS ON RECURRENT EXPENDITURE

Payments on recurrent expenditure amounted to M17.157 billion for financial year 2020/21. There was an increase of M2.889 billion or 20% over the previous year's payments of M14.268 billion as shown on Table 5.2. Significant increases were noted on losses, repayment of domestic debt and transfers while decreases were mainly on acquisition of financial and non-financial assets.

Table 5.2 – Payments on Recurrent Expenditure

Description	Actual Expenditure 2021	Actual Expenditure 2020	Increase/ (Decrease)	Increase/ (Decr.) %
A	B	C	D=B-C	E= D/C
Compensation of Employees	7,344,865,142	6,639,625,030	705,240,112	11

Total	17,156,849,477	14,267,558,099	2,889,291,378	20

Source: Consolidated Financial Statements and Ministries' Financial Statements

5.3 PAYMENTS ON DEVELOPMENT EXPENDITURE

Payments on development expenditure amounted to M3.826 billion during financial year 2020/21 as presented on Table 5.3 and sources of funding were Government of Lesotho, Donor Grants and Donor Loans. There was a decrease of M60 million or 2% compared to last year's expenditure of M3.948 billion. Significant increase of 82% was recorded on payments made from donor loans while GOL payments had decreased by 39%

Table 5.3 – Payments of Development Expenditure

Payments Category	Development Expenditure 2021	Development Expenditure 2020	Increase/ (Decrease)	Increase/ (Decrease)
	M'000	M'000	M'000	%

Total	334,113	81,481	415,594	100.0

Source: Ministries' financial statements

6.1.1 ADVANCES

Section 33 (1) of the Treasury Regulations 2014 establishes all advances and reimbursement thereon. Subsection (2) requires a Chief Accounting Officer to maintain a register of advances, recording full details of advances approved. Subsection (3) further obliges a Chief Accounting Officer to review the register regularly to ensure that advance holders repay their advances on or before the due date.

The outstanding advances as at 31 March 2021 amounted to M120 million in the following three ministries:

Ministry	Amount	Remarks
Agriculture	81,480,500	There was an outstanding advance of M51,006,235 as at 31 March 2020. During the year under review SADP advanced FAO Lesotho an amount of USD5 million equivalent of M81,480,500 for vulnerable farmers to eliminate severe hunger during difficult times. Furthermore, a grant of M24,817,211 was disbursed to the farmers. Reported expenditure amounted to M74,354,629 and therefore outstanding advances as at

Ministry	Amount	Remarks
		31 March 2021 should have been M82,949,317 not M81,480,500 as stated.
Education	34,088,316	Advances of gratuity to principals on performance contracts, which will be cleared upon separation from the service.
Home Affairs	4,947,051	No required documents to clear the advances which were initiated by LMPS in 2012 while under the Ministry of Home Affairs
Total	120,515,867	

Ministry of Education and Training

An issue of critical concern is that of advances of gratuity to the principals on performance contracts, which would be cleared upon separation from the service. The advances against gratuity are normally administered by regulations, which would stipulate the percentage of anticipated gratuity to be given, timeframe between date of advance and known date of separation from the service and the percentage to be charged above the bank-ruling rate.

I am not aware of any regulations in this regard and it was not clear as to whether when reaching the decision to issue these advances, considerations were made that in some cases these advances would take long time before they can be cleared as some principals may still have many years before reaching retirement age.

6.1.2 IMPRESTS

Imprests are classified into standing advances and travel advances. Standing advances are given in cases where it is found necessary for an officer to have at his disposal for disbursement for which vouchers cannot conveniently be presented direct to the Accountant-General for payment. Travel advances are granted to officers travelling on duty outside Lesotho.

Holders of standing advances are required to retire the advance before 31 March of each year whereas a travel advance should be acquitted within 14 days of the return of the officer from the travel.

The outstanding imprests amounted to M2,133,997.00 at 31 March 2021 and these are mostly balances brought forward from previous years.

Ministry	Amount	Remarks
Trade	54,155	The amount owed by 3 officers
Home Affairs	207,101	-
PM's Office	1,178,538	The amount of M1,128,538 has been outstanding from prior years. One officer has not cleared the advance of M50,000 given during the year under review.
Communications	7,705	-
Senate	46,923	Balance from the previous year
Ombudsman	32,249	The remaining balance on overpayment of subsistence allowance amounting to M54,247.
IEC	54,451	Balance from the previous year
Gender	366,452	Balance from the previous year
Public Service	25,896	Balance accrued from 2017/18 owed by the then minister and two bodyguards who were transferred to the Ministry of Communications, Science & Technology
Small Business	132,927	Outstanding imprest not cleared by two officers from the ministry and two officers from the Ministry of Works for more than one year.
Transport	27,600	There was a technical problem when clearing the imprest and the challenge was reported to IFMIS team.
Total	2,133,997	

Accountability of Irrecoverable Travel Advances

I highlighted my concern on accountability of irrecoverable travel advances in my last year's report that it did not comply with requirements of the Treasury Regulations. My concern remains, as outstanding advances that were not possible to recover or acquit within the period set for the purposes have not been treated as loss of public funds on the account of the Advance Holder.

In a case of the Ministry of Gender where outstanding advances were treated as losses, those advances still appeared under outstanding travel advances.

6.1.3 RENTALS

Government has rented out properties to companies and public officers. The total amount owed to Government as at 31 March 2021 was M115,348,720.00.

Ministry	Amount	Remarks
Finance	884,287	Arrears from Engen for rent
Communications	3,980,657	Arrears on transmitter rentals and news coverage
Energy	110,426,435	Revenue from previous year amounted to M69,581,487. In the current year LEC had arrears of M40,844,948
Labour	39,440	Rent owed by a tenant at the Ministry's old office premises
Gender	12,000	Rental arrears for 12 months from Mokhotlong Urban Council
Public Service	5,901	Rent arrears from a public officer
Total	115,348,720	

6.1.4 RECOVERY OF EXPENDITURE

If Government has erroneously paid monies to companies/suppliers or public officers, those monies have to be recovered. Section 28 of Treasury Regulations states that if money is recovered in the financial year it was paid out, it should be paid back to the Treasury General Ledger accounts but if recovered after the financial year in which it was paid out, it should be treated as revenue.

The outstanding amount due to Government resulting from overpayments was M1,648,866.00 as indicated below:

Ministry	Amount	Remarks
Health	849,888	Balance from the previous year. Overpayment of salary to two officers who absented themselves from duty for a period of 24 months
Home Affairs	120,085	Refund of VAT paid to South African Company
Foreign Affairs	40,639	Salary overpayment
Police	638,254	Salary overpayment
Total	1,648,866	

6.1.5 SURCHARGES

In terms of Section 60 (1) of PFMA Act 2011, where a public officer fails to perform any function or duty assigned under the Act and a loss of public money or loss, destruction or damage to government property has resulted, the Minister may require the officer to present an explanation for the failure to perform the function or duty. Subsection (2) further states that the Minister may impose surcharge on a public officer in any case where the minister considers an explanation under subsection (1) unsatisfactory.

The following are balances of debt due to the Government resulting from surcharges imposed by the Minister.

Ministry	Amount	Remarks
Home Affairs	28,116	Outstanding balance from employees who did not return unspent monies in 2017/18.
Foreign Affairs	227,815	Balance on surcharge imposed on one officer who did not clear tour imprest
Labour	11,057	Revenue arrears from members of public whose vehicles got involved in accidents with the ministry's vehicles
His Majesty's Office	22,839	Remaining balance in respect of former DPS following surcharge on un-cleared travel advance.
Police	31,692	
Small Business	10,200	Surcharge imposed on two officers who failed to clear tour imprests.
Total	331,719	

6.1.6 SALE OF GOODS AND SERVICES

Section 51 (2)(d) of the Treasury Regulations 2014 requires Accounting Officers who are responsible for the collection of revenue should render, within one of the end of the financial year, a return showing all amounts, which remained uncollected at the end of the previous financial year, excluding bills raised in March.

The overdue debt of M175 million is on sale of goods and services. The debt is basically amounts, which remained uncollected at the end of the previous financial year, excluding bills raised in March (Arrears of Revenue).

Ministry	Amount	Remarks
Auditor-General	194,926	Unpaid invoices
Defence	337,458	Unpaid invoices
Mining	175,000,000	Outstanding amount owed by Lucapa (Pty) Ltd for acquisition of Mothae Mines
Police	82,350	Unpaid invoices since July 2020
Total	175,614,734	

6.2 ON-LENT LOANS

The Government lends or on-lends loans to state-owned enterprises and other entities for specific purposes consistent with its development policy objectives. The borrower is obliged to pay interest and repay principal sums to Government in accordance with the terms and conditions agreed between the parties.

The closing balance for the year ended 31 March 2020 was M984,385,119.00, there were no new loans and repayments made during the year amounted to M24,509,459.00. Therefore, the closing balance as at 31 March 2021 was M959,875,660.00 as indicated on Table 6.2. Government further received total amount of M15,715,973.00 for interest.

In my last two audit reports, I raised a concern about seven projects under WASCO and TELECOM, which were in-arrears of Repayments. Though TELECOM had made a repayment of M22,564,743.00 for the two projects during the year under review, the arrears at 31 March 2021 still stood at M 92,931,612.00.

As for WASCO, the situation of non-repayment has remained the same. The outstanding arrears have risen from M89,929,315.00 in March 2020 to M141,925,028.00 in March 2021 for the five projects. I should also state that the issue of non-repayment by WASCO on four projects dates as far back in March 2017. The last repayment of M48,814,092.00 for one project was made during financial year 2017/18.

The issue of non-repayment indicates lack of policies and measures by the Government to compel the entities to repay the loans. If the issue is not addressed the loans could become a government liability by the end of the loan period.

Table 6.2 - Status of On-lent Loans at 31 March 2021

Company	Benefitting Agency	Opening Balance as at 1 April 2020	Principal Repayment	Interest charges Paid	Closing Balance as at 31 March 2021	Arrears at 31 March 2021	Arrears at 31 March 2020

CHAPTER 7: LIABILITIES

7.1 PUBLIC DEBT

7.1.1 LEGISLATIVE FRAMEWORK FOR PUBLIC DEBT

The Minister of Finance is empowered by the Loans and Guarantees Act, 1967 to raise loans internally and externally for financing development projects. Section 116 of the Constitution of Lesotho stipulates that all debt charges for which Lesotho is liable should be a charge on the Consolidated Fund. According to the Constitution, debt charges include interest, sinking fund charges, the repayment or amortisation of debt and all expenditure in connection with the raising of the loans on the security of the Consolidated Fund and the service and redemption of debt created thereby.

7.1.2 PUBLIC DEBT PORTFOLIO

The public debt liability is a major government liability and key sustainability issue for the Government of Lesotho. It requires comprehensive, accurate and timely records for good management.

The Public Debt statement shows the particulars of outstanding external and domestic loans. The external loans are raised from bilateral, multilateral and commercial sources while domestic loans are raised by the sale of development stocks, Treasury bonds and through banking institutions.

The outstanding public debt as at 31 March 2021 amounted to M18.250 billion which was a decrease of M1.070 billion or 6% compared to the previous year's figure of M19.320 billion as presented on Table 7.1.2.

Table 7.1.2 – Public Debt Portfolio

7.1.3 EXTERNAL DEBT

The outstanding external debt has decreased by M863 million or (5.5%) from M15.631 million as at 31 March 2020 to M14.768 billion as at 31 March 2021. The decrease would have been more significant had it not been new borrowings of M1.909 billion from multilateral lenders. Nonetheless, these borrowings were less than the previous year's borrowings of M4.702 billion by 59%. Debt Servicing totalled M1.030 billion comprising of loan repayments of M756 million and interest payments of M274 million. Further details of the status of external debt are presented on Table 7.1.3.

It is gratifying to note commitment of Government to reduce the external debt and the schedule of principal repayment ranges from M733 million to M960 million from 2021/22 to 2024/25.

Table 7.1.3 – Statement of External Debt

External Debt	Balance at 31 March 2020	New Agreements	Disbursements	Repayments	Interest paid	Balance at 31 March 2021
	M'000	M'000	M'000	M'000	M'000	M'000

Source: Debt records and Consolidated Financial Statements

7.1.4 DOMESTIC DEBT

The consolidated financial statements for the year under review show the opening balance for Domestic debt as M3.688 billion and the closing balance of M3.481 billion as at 31 March 2021 as indicated on Table 7.1.4. This indicates a decrease of M207 million or 5.6%. There were new issues of Treasury Bills and Treasury Bonds to the amount of M2.031 billion which was less than the previous year's figure of M2.508 billion by M477 million or 19%.

The Principal repayments and interest paid were M2.778 billion and M312 million respectively resulting into debt service of M3.090 billion.

Table 7.1.4 – Statement of Domestic Debt

Domestic Debt	Balance at 31 March 2020	New Issues	Repayments	Interest Paid	Balance at 31 March 2021
	M'000	M'000	M'000	M'000	M'000
Treasury Bills	875,675	1,536,918	1,530,975	54,217	881,618
Fiscal Bills	430,000	-	402,007	27,993	-

7.2 PAYMENT ARREARS

The payment obligations on Government to individuals, suppliers, lenders or contractors that were due for settlement at 31 March 2021 totalled M544 million. The bulk share of arrears of M497 million or 91% was owed to suppliers. Arrears on compensation of employees and on pension and gratuities represented 8% and 1% of the total arrears respectively. Table 7.2a shows breakdown of payment arrears by category.

Table 7.2a – Breakdown of Payment Arrears by Category

Category	Recurrent Expenditure	Development Expenditure	Total Arrears	% on Total Arrears
	M'000	M'000	M'000	
Compensation of Employees	44,100	-	44,100	8.1
Pensions & Gratuities	2,623	-	2,623	0.5
Goods & Services	356,224	-	356,224	65.5
Taxes Withheld	2,705	-	2,705	0.5
Other Expenses	100,902	-	100,902	18.5
Construction work	2,107	35,324	37,431	6.9
Total	508,661	35,324	543,985	100.0

In my last report I commended the Minister for fulfilling his commitment to reduce the payment arrears, as there was a significant decline of 41% from M828 million as at 31 March 2019 to M488 million at 31 March 2020. Unfortunately for the year under review, there were negative results as there was an increase of 12% from M488 million to M545 million in 2020/21 as indicated on Table 7.2b.

A continuing pattern of payments in arrears will likely trigger some sort of restrictive action, such as stopping business with government and inflation of prices way above market ones.

Table 7.2b – Status of Payment Arrears for five financial years

7.3 TRUST FUNDS

Section 24 of the PFMA Act 2011 requires that amounts held in trust should be separately identified and accounted for. It is further stated that such amounts held in trust or on behalf of a person other than Government is a liability of Government. If conditions to allow issue of money held in trust have been fulfilled, the money should be paid to the person or entity entitled to it without interest. Money held in trust, which remains unclaimed after a period of five years, should be treated as revenue of the Consolidated Fund.

Trust funds are classified into Main Trust Funds and Operating Trust Funds. **Main Trust Funds** refer to an obligation enforceable in equity, which rests on a person (the trustee) as owner of some specific

property (the trust property) to deal with that property for the benefit of another person (the beneficiary) or for the advancement of certain purposes. Example of such is the Guardian Fund administered by the Master of the High Court.

Operating Trust Fund Accounts facilitate transactions relating to the Ministries and Departments administrative role as an employer. These transactions include deductions from employees' salaries with regards to contributions to the Pension Fund, housing loan repayments, insurance premiums and other deductions for onward payment to the respective payees.

The Accountant-General operates Trust Monies Fund account held at the Central Bank of Lesotho. Administrators of trust fund accounts are required to maintain records and reconcile these records with those of the Accountant-General.

Audit Concerns:

- There were 43 trust funds accounts at banks as at 31 March 2020. However, the financial statements show that there were 36 accounts totalling M366 million in various local banks as at 31 March 2021. There was no disclosure as to whether some accounts had been closed or not; if closed and moneys had remained unclaimed for a period of 5 years, were they transferred as revenue to the Consolidated Fund bank account.
- There was no reconciliation of records of the spending units and Treasury. As a result, the amount of M366 million reflected in the financial statements cannot be relied on.
- The registers for trust monies have not been maintained contrary to the requirements of Section 72 of the Treasury Regulations 2014.

7.4 CONTINGENT LIABILITIES

Contingent liabilities can be classified in two categories:

- a) Present obligation** that arises from past events, but is not recognised because it is not probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation or the amount of the obligation cannot be measured with sufficient reliability.

- b) Possible obligation** that arises from past events, and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events.

7.4.1 PRESENT OBLIGATIONS

a) Pension Liabilities

In my previous audit reports, I had stated several times on the absence of actuarial valuation of the Public Officers' Defined Contribution Pension Fund. The last valuation report indicated that there was underfunding of M5.890 billion as at 31 March 2016, which posed a risk for meeting future benefits of public servants when due and payable. There is also a high possibility that after a period of five years since 2016, the liability has significantly increased.

The Government should ensure that actuarial valuations are conducted regularly as required by law to assess viability of the Fund to pay future pension and benefit obligations. When underfunding is established, it is imperative that the liability is reduced.

b) Guaranteed Loans

Possible obligations comprise also amounts guaranteed by the Government of Lesotho in respect of loans issued to State-Owned Enterprises, public officials and businesses. The outstanding amounts guaranteed to 11 entities amounted to M345 million as at 31 March 2021 as presented on Table 7.4.1b.

Table 7.4.1b – Status of Guaranteed Loans

Beneficiary	Lending Institution	Opening Balance	Repayment	Interest	New Guarantee	Closing Balance
		M'000	M'000	M'000	M'000	M'000
Loans to Members of Parliament	Nedbank	36,588	27,882	1,815	800	9,506
Loans to Statutory position holders	Standard Lesotho Bank (SLB)	1,178	446	179	763	1,495

Total		294,220	32,940	1,994	84,065	345,345

Source: Consolidated Financial Statements and Debt records

Audit concerns:

- a) Upon review of Debt records and the Consolidated Financial Statements, it was noted that the Debt Section has no database of all the guaranteed loans and the balances outstanding at year end. The Section depends on information provided by the banks, implying that there are no follow-ups on the movement of the loans, and which loans could become a Government liability.
- b) Lack of database and monitoring of these guaranteed loans has resulted in inconsistency of the closing balances of the previous and the opening balance of the following year. For example, the closing balance as at 31 March 2020 was M40,754,148 however the opening balance on 1 April 2020 is M294,220,357 resulting in a variance of M253,466,209.
- c) New guaranteed loans for the Members of Parliament and Statutory Position Holders to the amounts M800,000.00 and M763,000.00 respectively were issued during the year under review despite the elimination of interest free loans to a maximum of M500,000.00. The elimination is per the Members of Parliament (Amendment of Schedule) Salaries Regulations 2020 and the Statutory Salaries (Amendment of Schedule) Regulations 2020 issued in February 2020.
- d) The closing balance for guaranteed loans to Members of Parliament stood at M32.9 million at 31 March 2020. However, the financial statements reflect the opening balance of M36.6 million on 1 April 2020 and there is no explanation provided for the adjustment of M3.7 million.

7.4.2 POSSIBLE OBLIGATIONS

Possible obligations comprise pending litigation claims for compensation and potential liabilities from Public-Private Partnerships (PPP). Exposure to contingent liabilities from the PPP

arrangements managed by the Ministry of Health is yet to be assessed.

The pending litigation claims per reports of the Chief Accounting Officers amounted to M35 million at 31 March 2021. There was a significant decline of M261 million from the previous year's figure of M296 million. Table 7.4.2 shows summary of exposure at the end of the financial years and the details are reported on Appendix 1.

Table 7.4.2 – Pending Litigation Claims

CHAPTER 8: LOSSES AND ACCIDENTS

8.1 LOSSES OF CASH AND STORES

8.1.1 LOSS OF CASH

Loss of cash is regulated by the Treasury Regulations 2014, which require a Finance Officer to report immediately to a Chief Accounting Officer any incident of loss, shortage, theft or other irregularity in any cash holding under his control. Any circumstance causing a suspicion of loss, shortage, irregularity, fraud or theft of any public money should be reported to a Chief Accounting Officer.

The Regulations further require that a Loss Report should be prepared and submitted to the Principal Secretary for Finance, and a copy to be sent to the Accountant-General and to the Auditor-General.

8.1.2 LOSS OF STORES

The Stores Regulations 1967 regulate losses of stores and require that all losses of or damage to stores should be reported immediately to the Principal Secretary for Finance, with a copy to the Accountant-General and Auditor-General. Furthermore, the regulations stipulate that it should not be within the discretion of any officer to withhold a report of any case in which theft, fraud, negligent control or misuse of or damage to Government stores is known or suspected to have taken place.

Audit concerns on losses:

- The consolidated financial statements, ministries' financial statements and copies of Loss Reports received by my office reveal different figures, as shown below and detailed differences are shown on Table 8.1.

Documents	Loss of Stores	Loss of Cash
Consolidated Financial Statements	481,000	9,160,000
Ministries' Financial Statements	70,000	2,191,152
Copies of Loss Reports received by Audit	68,046	72,000

- The differences indicate that ministries do not understand that accounting for losses has to be supported by Loss Reports and copies of such reports be submitted to my office.

- There were no supporting documents to support figures of losses in the consolidated financial statements and therefore their accuracy could not be substantiated.
- The amount of 9,160,000 per consolidated financial statements include losses of cash already reported in the last financial year, 2019/20. This amount included loss of M7,003,950 arising from failure of the Ministry of the Public Service to collect moneys from officers who defaulted to pay Government as per bonding agreements. Included in this amount is M1,564,840 under His Majesty's Office that was already treated as a loss in the previous year. So it should not appear as a loss rather as an advance on the account of the Advance Holder who failed to retire travel advance.
- The financial statements of His Majesty's Office reflected loss of cash of M1,503,500 which included loss of cash already reported in the previous year.

Table 8.1 – Statement of Losses

Ministry	Consolidated Financial Statements		Ministries' Financial Statements				Copies of Loss Reports received by Auditor-General			
	Stores	Cash	Stores		Cash		Stores		Cash

Source: Consolidated Financial Statements, Ministries' Financial Statements and Copies of Loss Reports

8.1.3 DAMAGE TO GOVERNMENT PROPERTY - MINISTRY OF HEALTH

In July 2019, there was damage to the office building, office furniture and office equipment at the Ministry of Health headquarters due to fire. A Loss Report was submitted to the Ministry of Finance, however, at that time the damage was not yet assessed to determine the amount of loss and the investigation was not yet completed then.

I stated in last year's Audit Report that I was not made aware if there was a Police report concerning the fire and the state of investigations; at the date of this report, the situation has remained the same. I have also not received a response on the letter that I wrote to the Chief Accounting Officer in December 2020 requesting an update on the assessment and investigation.

8.1.4 CASES IN COURTS OF LAW DUE TO MISAPPROPRIATION OF PUBLIC FUNDS

The PFMA Act 2011 requires that where a loss of public money has occurred under the control of a public officer, the loss should be a debt due to Government and may be recovered from the public officer by action in a court of competent jurisdiction. The Treasury Regulations 2014 further state that if an independent investigation indicates that a loss is due to theft, the Chief Accounting Officer should report the matter immediately to the Police, who should investigate the matter and determine whether any person should be investigated.

In my previous year's report, I commended the Lesotho Mounted Police Service for having a dedicated team working with Treasury to enforce compliance to finance laws. Out of 8 cases reported last year to have been in the courts of law, one case of misappropriation of funds to the tune of M767,085 has been finalised and judgement delivered. The other 7 cases were either pending judgement or pending in court. There has been additional case during the year under review, which is pending judgement. Table 8.1.4 has the details.

Table 8.1.4 – Status of cases in courts of law

Ministry	Case Number	Case Reference	Remarks
Finance	CIR/63/10/15	Lephoto & Others	Judgement delivered
Judiciary	CIR/110/16	Mpho Damane & 'Matiisetso Theoha	Pending Judgement
Finance	CIR/31/06/17	Teboho Seilane & Others	Pending in court
Public Works	CIR/45/08/17	Thato Mathaba & Others	Pending Judgement
Health	CIR/57/12/17	'Mamolemo Mohlomi	Pending Judgement
Water	CIR/132/03/17	'Mampoi Makhetha & Others	Pending in court
Health	CIR/27/01/18	'Mahlomohang Mokete	Pending in court
Defence	CIR/38/03/18	Thato Phofu	Pending Judgement
Finance	CIR/52/03/21	Letlafuoa Nkoale	Pending Judgement

8.2 MOTOR VEHICLE ACCIDENTS

The Stores Regulations 1967 describe motor vehicle accidents as those in which damage is caused to vehicle or property, those in which persons are injured or killed, and a combination of both.

It is the duty of every Head of Department, on receipt of any report of an accident involving a vehicle in his department, to submit every pertinent document or report, including the police report on the accident to the Principal Secretary for Finance. It is therefore the duty of Police to furnish Accidents Reports on all Government vehicles to Heads of Departments without delay.

The cost of repairs to damaged vehicles should be debited to departmental votes even when it is proposed to fine the driver of the Government vehicle responsible for an accident. The Vehicle Accident Reports submitted to the Principal Secretary for Finance serve also as a request to carry out repairs as a charge to the departmental vote.

Audit Concerns:

- The consolidated financial statements, ministries financial statements and copies of Accidents Reports received by my office show that the cost of repairs amounted to M1,673,000.00; M1,158,582.00 and M428,55500 respectively as presented on Table 8.2.
- The consolidated financial statements should be prepared on the basis of the ministries' financial statements but the fact that the statements show different figures already raise a concern on the correctness and validity of the consolidated financial statements, also I was not provided with documents to support the figures.

- The difference between the figures per ministries' financial statements and copies of reports received by my office indicate that the ministries did not report accidents to the Principal Secretary for Finance or failed to provide my office with copies of Accident Reports.
- I could not establish as to how ministries managed to pay for repairs of vehicles if Accident Reports had not been submitted to the Principal Secretary for Finance, as such reports serve as requests to incur expenditure.

PART 3

ADMINISTRATION OF PUBLIC FINANCE

CHAPTER 9: ADMINISTRATION OF PUBLIC FINANCE

9. CONSTITUTIONAL BACKGROUND TO PUBLIC FINANCE

9.1 CONSOLIDATED FUND

The Consolidated Fund is established in accordance with Section 110 of the Constitution of Lesotho. It is **credited** with all revenues or other monies raised or received for the purposes of the Government of Lesotho or other moneys that are payable under specific laws and specific purposes. The Consolidated Fund is **debited** with annual appropriations and charges under provision of law.

The Ministry of Finance is the custodian of the Consolidated Fund and it has the central responsibility for advising the Government on financial policy.

9.2 WITHDRAWAL FROM THE CONSOLIDATED FUND

Issuing of monies from the Consolidated Fund may be divided into the following categories:

9.2.1 Supply Services/Appropriated Expenditure

Supply is voted by Parliament for a particular financial year and has to be accounted for ultimately to Parliament.

The Appropriation Act passed by Parliament authorises the Government to appropriate specified sums from the Consolidated Fund for specified services, under separate votes for the several heads of expenditure. Parliament also sanctions supplementary estimates by the subsequent Appropriation Acts in terms of Section 112(2) of the Constitution.

The Supplementary Appropriation Acts authorise disbursement on services where the amounts appropriated by the Appropriation Act for any purpose is insufficient or that a need has risen for expenditure for a purpose to which no amount has been appropriated by that Act; or that any moneys have been expended for any purpose in excess of the amount appropriated to that purpose by the Appropriation Act or for a purpose to which no amount has been appropriated by that Act. Section 112(2) and Section 114 of the Constitution provides for such problems.

9.2.2 Consolidated Fund Standing Services

Charged or statutory expenditure are payments for Consolidated Fund standing services, which Parliament has decided by statute, once and for all, should be met directly from the Consolidated Fund. They are thus made independent of annual appropriation by Parliament.

9.3 SUPPLY SERVICES/APPROPRIATED EXPENDITURE

a) Approved Budget for 2020/21

The appropriated amounts for financial year 2020/21 totalled M23,789,535,650 broken down as follows:

Recurrent Expenditure	18,084,778,729
Capital Expenditure	5,604,756,921
Administration Account	<u>100,000,000</u>
Total	<u>23,789,535,650</u>

According to Statement of Objects and Reasons of the Appropriation Act 2020/2021 (Government Notice No.26 of 2020), this expenditure was to be financed by a total amount of M20,017,628,699 made up as follows:

Government Revenues	17,102,596,710
Donor Grants	858,199,144
Donor Loans	<u>2,056,832,845</u>
Total	<u>20,017,628,699</u>

b) Comparison of Budget Summaries

The Appropriation Act authorises spending of the total moneys provided in the Estimates, and appropriates it according to the Heads of Expenditure. Therefore, the total provided in the Estimates should be the same as the amount specified in the Appropriation Act for each Head of Expenditure.

However, the comparison of Budget Summaries per Appropriation Act/Government Notice and Book of Estimates revealed variances on government revenues and recurrent expenditure by M2.158 billion and M84 million respectively as presented on Table 9.3.

Table 9.3 – Comparison of amounts in the Gazettes and Book of Estimates

Description	Per Gazettes M'000	Per Estimates M'000	Variance M'000
Government Revenues	17,102,597	19,261,588	(2,158,991)

9.4 OVERALL FISCAL BALANCE FOR 2020/21

The original budget for the financial year 2020/21 projected a deficit of M 6.239 billion. The revised budget projected a deficit of M2.173 billion while the actual outcome was a deficit of M5.425 billion. Table 9.4 below bears details of the overall fiscal balance for the year ended 31 March 2021.

Table 9.4 – Overall Fiscal Balance for 2020/21

Item	Approved Budget	Revised Budget	Actual	Variance	Budget Exec.
	(M'000)	(M'000)	(M'000)	(M'000)	(%)

9.5 ADMINISTRATION ACCOUNT/CONTINGENCIES FUND

Section 114 of the Constitution of Lesotho authorises Parliament to make provision for the establishment of a Contingencies Fund and for authorising the Minister for the time being responsible for finance, if satisfied that there has arisen an urgent and unforeseen need for expenditure for which no other provision exists, to make advance from that Fund to meet that need. Where any advance is made from the Contingencies Fund, a supplementary estimate should be presented and a Supplementary Appropriation Bill be introduced as soon as possible for the purpose of replacing the amount so advanced.

a) Advances for the year under review

The amount of M100 million was allocated to Administration Account (Contingencies Fund) by means of the Appropriation Act 2020/21. There were two replenishments during the year, one for M100,000,000.00 and the other one for M1,103,911,831.00. Total funds under the Administration account amounted to M1,303,911,831.00 and advances totalled M970,167,379.00 leaving a balance of M332,914,452.00. I should also mention that out of M970,167,379.00, the amount of M457,993,216.00 (47%) was for COVID-19 related expenditure.

Advances for recurrent expenditure purposes amounted to M746,136,626.00 and M224,860,753.00 for development expenditure as indicated on Table 9.5. Full details and reasons for advances are reflected in Appendix 2 to this report.

The Supplementary Appropriation Bill for 2020/21 has been presented to Parliament for replacement of the amount advanced from the Contingencies Fund.

Table 9.5- Advances from the Contingencies Fund

Ministry	Recurrent Expenditure	Development Expenditure	Total Expenditure
Agriculture	45,382,430	5,815,453	51,197,883

Total	746,136,626	224,860,753	970,997,379

Source: Contingencies Warrants for 2020/21

Audit Concerns:

- There was in contrast to reallocation of expenditure as there was no Cabinet decision authorising the replenishment of the Contingencies Fund by M1,203,911,831.00.
- I have repeatedly raised an audit query over the years that it has been difficult for my office to verify whether the advances were actually spent for intended purpose, as the Accountant-General had not operated a separate account for advances from the Contingencies Fund. This practice defeats my oversight responsibility of ensuring that an Advance Holder uses an advance of public money for a purpose approved as stipulated in Section 38(2) of the Treasury Regulations 2014.
- The Chief Accounting Officers so advanced do not maintain a register of these advances and thus contravening Section 33(2) of the Treasury Regulations 2014.
- The Advance warrants were allocated directly to the voted heads of expenditure and added to release warrants, therefore payments from advance warrants could not be substantiated. The accounting treatment of advance warrants contravened requirements of the Constitution, as they were not allocated by means of an Appropriation Act to the heads of expenditure.

9.6 CENTRALISED ITEMS VOTE

a) Budget for Centralised Items

I raised dissatisfaction in my last reports about the accountability of the Centralised Items Vote (Head 30) under recurrent expenditure. Parliament allocates budget to this vote primarily for financing of salaries (vacant and new posts) and for purchase of vehicles, cycles and equine. The ministries that require financing of vacant and new posts and for purchase of vehicles submit their requests to the Budget Controller; such requirements are consolidated and submitted to Parliament for approval. When approved under Head 30, the Ministry of Finance issues warrants to the requesting ministries. For the year under review, the budget was extended to consultancies and grants paid to Central Government.

Once again the total per estimates differed from the amount in the Appropriation Act. The total budget per Book of Estimates amounted to M1,154,892,014 whereas Parliamentary allocation was M1,157,514,890 leaving a variance of M2,622,876.00 as presented on Table 9.6a.

Table 9.6a - Centralised Items

Budget Line	Amount
Salaries – New	32,400,972
Wages	300,000,000
Consultancies	659,094,583
Grants paid to Central Government	138,396,459
Vehicles	25,000,000
Total per Estimates	1,154,892,014
Appropriation Act	1,157,514,890
Variance	-2,622,876

Source: Appropriation Act 2020/21 and Book of Estimates

c) Allocation to Spending Units

The funds allocated to the spending units amounted to M1,074,255,986 as presented on Table 9.6b and thus leaving a balance of M83,258,904 from the appropriated amount M1,157,514,890.

Table 9.6b – Allocation to Spending Units

Spending Unit	Amount
Education	111,000,000
Finance	29,807,680
Trade	2,122,916
Justice	4,172,459
PM's Office	838,102,560
Law	3,403,182
Foreign	1,039,004
Labour	349,036
Auditor-General's Office	640,120
His Majesty's Office	2,021,830
Public Service Commission	80,019
Defence	18,466,948
Senate	4,811,167
Gender	1,771,115
Social Development	2,689,333
Mining	1,711,731
Water	2,623,758
Transport	5,027,053
Total – Voted Heads	1,029,839,911
Statutory Expenditure	44,416,075
Grand Total	1,074,255,986

Source: Consolidated Financial Statements

Audit Concerns:

- Contrary to the requirements of the Constitution and PFMA Act 2011, the reallocations of M1,074,255,986.00 were included in the Supplementary Appropriation Bill for re-appropriation though there is no legislation for re-appropriation. These primary finance laws require that supplementary estimates should be presented to Parliament only on the following three conditions:
 - Where there were insufficient funds
 - Clearing of Advances from the Contingencies Fund
 - Regularisation of excess expenditure
- The additional statutory expenditure of M44.4 million was included in the Supplementary Appropriation Bill contrary to the requirements of the Constitution that such expenditure is a charge on the Consolidated Fund.

- Contrary to advances from the Contingencies Fund, there is no legislation governing administration of Head 30 - Centralised Items and therefore legal accountability of funds under this head could not be established.

I could not ascertain any reason the Government has abandoned the procedure where the provision under a subhead was released on special application from the ministry concerned. I therefore repeat my recommendation that the Ministry of Finance should consider reverting to the procedure of ministries being allocated special expenditure under their own votes and funds be released on special request to avoid irregular allocations.

CHAPTER 10: BUDGET PRIORITIES FOR FINANCIAL YEAR 2020/21

10.1 BUDGET THEME FOR 2020/21

The Minister of Finance presented the Budget Speech to the Parliament of the Kingdom of Lesotho for the financial year 2020/21 on 26 February 2020 and the theme of that budget was **“Inter-ministerial collaboration, multi-disciplinary approaches and subsidiarity to tackle poverty, malnutrition, and joblessness focusing on service delivery at the local level”**.

10.2 EXPECTED REVENUE AND EXPENDITURE

The Minister indicated that for the financial year 2020/21 the total revenue was expected to increase to 53.5 percent of the Gross Domestic Products (GDP) following stronger than expected Southern African Customs Union (SACU) revenue shares, coupled with growth of Value Added Tax (VAT). SACU revenue shares for Lesotho were expected to aggregate M8.9 billion against a projected M6.53 billion. VAT growth of 7.2 percent would result from additional 3 percent VAT on telecommunications. However it was anticipated that the grant component of revenue would drop to M1 billion against M1.2 billion received in 2019/20.

Total expenditure was expected to increase to 58.1 percent of GDP or M22 billion and the general Government wage bill would drive total spending.

10.3 BUDGET PRIORITIES FOR 2020/21

The budget allocations were requested for investment ministries, social interventions and governance agencies and the following are major priorities for the financial year 2020/21:

- a) Identification of investments that would create jobs needed for Basotho. More than 77 bankable projects had been identified from the private sector with a total investment of M20 billion and more than thirty (30) thousand jobs.
- b) The government has prioritised combatting poverty as the key priority and to address the underlying issues reflected in other SDGs; and to pay special attention to the most vulnerable groups including women, children, youth, elderly and people living with disability as well as closing rural – urban disparities.

- c) During the year 2020/21, the Government will conduct the Lesotho Demographic Survey (LDS) and an Agricultural Census. Having identified agriculture as a pillar of economic growth, the Agricultural Census would provide data on the structure of agriculture in the country for policy formulation, development planning as well as monitoring and evaluation. The data would be used to benchmark and improve crop and livestock statistics.
- d) The Ministry of Trade and Industry to launch the Lesotho Standards Institution with staff recruited during the fiscal year and a dedicated building coming thereafter. The institution would promote domestic investment and exports by providing assurances on the quality of goods produced in Lesotho.
- e) To complete within 8 calendar months the review and updating of investment policy and the MSME policy and development of associated legal frameworks.
- f) An institutional review of the Basotho Enterprise Development Corporation (BEDCO) and the Lesotho Tourism Development Corporation (LTDC) to establish whether the current structures of the two parastatals are fit for purpose as institutions operating in a highly competitive global environment and to reposition the two organisations to remain relevant and competent.

10.4 ACHIEVEMENTS ON GOVERNMENT PRIORITIES

10.4.1 Financial Projections

SACU revenue shares for Lesotho were expected to aggregate M8.9 billion and the actual amount received was indeed M8.980 billion. The anticipated VAT growth of 7.2 percent resulting from additional 3 percent VAT on telecommunications was not realised as there was a decline of 8.3 percent from M3.213 billion in 2020 to M2.944 billion in 2021.

Total expenditure was expected to increase to M22 billion and the general Government wage bill to drive total spending. However, it amounted to M20.983 billion. Government wage bill was M7.344 billion of the total recurrent expenditure of M17.157 billion.

10.4.2 Achievement on activities

The budget speech for the financial year 2020/21 was presented to the Parliament just few weeks before the World Health Organisation (WHO) declared COVID-19 as a pandemic on 13 March 2020. COVID-19 represented an enormous challenge to governments and populations worldwide. The economic and social ramifications of the virus affected both developed and developing countries to a great extent. The governments in both developed and developing countries deployed rapid action and provided urgent relief measures at an enormous financial cost.

To cope with the pandemic, the Government of Lesotho had to re-allocate substantial funds totalling M1.204 billion of which 67% of these were from development budget. As a result the level of achievement on government priorities was very minimal. The worldwide lockdowns during the year under review coupled with practical difficulties of working from home also contributed to non-achievement of priorities.

CHAPTER 11: ACCOUNTABILITY OF RECURRENT REVENUE BY CHIEF ACCOUNTING OFFICERS

11.1 RECURRENT REVENUE

Chief Accounting Officers are responsible for all aspects of the collection of revenue and for rendering proper account of the sums received under specific Heads of Revenue assigned to them. The other objective of revenue control is to prevent theft or fraud by revenue collectors or to minimise losses should they occur.

The Chief Accounting Officers should ensure that revenue is collected from as many sources as possible and that their collection machinery and scales of fees are adequate.

11.2 BUDGET EXECUTION ON RECURRENT REVENUE

The total budget for recurrent revenue as per Ministries' financial statements amounted to M19.254 billion and actual revenue collected was M17.607 billion resulting into overall collection of 91 percent as shown on Table 11.2. It can be noted from the table that six (6) ministries recorded collection rate of less than 50 percent while six (6) had exceeded the budget by 11 to 128 percent.

Even though the collection of revenue was satisfactory, there was a shortfall of revenue by more than 50 percent on 196 budget line items as shown in Appendix 3. There was also an over collection of revenue that ranged from 102 - 2,409 percent on 38 budget lines and also no budget on 25 line items but there was collection as presented in Appendix 4 and 5 respectively. Some of the reasons for under/over collection were attributable to poor budgeting.

Table 11.2 – Budget Execution on Recurrent Revenue

Ministry	Budget per Ministries' Accounts	Actual per Ministries' Accounts	Under/(Over) Collection	Execution (%)
A	B	C	D=B-C	E=C/B
Agriculture	28,480,517	49,395,442	(20,914,925)	173

Source: Ministries' financial statements

11.3 REASONS FOR VARIATIONS FROM THE BUDGET

11.3.1 MINISTRY OF AGRICULTURE AND FOOD SECURITY

The budget for Ministry of Agriculture was M28,480,517.00 while actual revenue collected was M49,395,442.00 which resulted in an over collection of M20,914,925.00. The ministry stated the following reasons for over collection of revenue:

- High levels of stock from the previous year and purchases during the current year using contingency funding increased the sale of goods and services extremely in 2020/21.
- Collection of M4,644,546.00 from sale of machinery, which was not budgeted for.

11.3.2 MINISTRY OF HEALTH

Under collection of Revenue

The budget for recurrent revenue was M29,747,443.00 while actual revenue collected was M10,231,443.00 resulting into under collection of M19,516,000.00 or 65%. The current year's collection was also far below the previous year's figure of M27,749,067.00 by M17,517,624.00 or 63%.

Management explained that the low collection was attributable to the following:

- All Covid-19 patients admitted in Government Health Facilities did not pay user fees.
- The relocation of Queen II Hospital to BEDCO premises also hindered other services such as Ophthalmic, Oral and Orthopaedic which did not operate due to lack of consultation rooms.
- Low turn-up of patients to Health Facilities due to COVID-19 regulations, which restricted free movement of people. It was therefore difficult for the general public to access health services hence few people went to the health centres as indicated below:

Description	Statistics in 2019/20	Statistics in 2020/21	Decrease/ (Increase)	Decrease/ (Increase) (%)
Total number of new Outpatients attendees	1,155,268	652,268	502,763	44
Total number of new Antenatal clients	34,749	36,250	(1,501)	(4)
Total number of inpatients	20,750	15,823	4,927	24

11.3.3 MINISTRY OF EDUCATION AND TRAINING

The budget for the Ministry was M5,720,783.00 while the actual revenue collected was M2,258,950.00 and there was under collection of M3,461,615.00.

The ministry stated the following reasons for under collection of revenue:

- There was an insurance commission amounting to M1,316,769.78 that was not captured due to failure of the upgraded IFMIS to generate reports for the amounts withheld.
- There was a shortfall by 69 percent under sale of services. This was due to COVID-19, as schools were closed for long time and therefore fees were not paid.

11.3.4 MINISTRY OF JUSTICE AND CORRECTIONAL SERVICES

The ministry had budgeted total revenue of M789,680.00 while actual collection amounted to M250,062.00 resulting into a shortfall of M539,618.00 or 68%.

The reason provided for the shortfall was that their revenue is based on activities done by inmates. However, due to COVID-19 inmates were not allowed to go outside prison premises to perform activities that generate revenue.

11.3.5 MINISTRY OF HOME AFFAIRS

Budgeted revenue was M25,902,000.00 and actual collection was M16,374,287.00. The reasons for shortfall of M9,527,713.00 are as follows:

- Applications for Passports were allowed for emergencies only due to COVID-19 restrictions which forced border posts to be closed.
- Passport applications were only processed in Maseru.
- There was also huge decline in visa applications due to restrictions on international travels. The excess collection in Visa line item was due to M5,593,210.53 which was not transferred to the consolidated account in the financial year 2019/2020. The actual collection for the 2020/2021 amounted to M174,000.00.
- The 2020 report on Trafficking in Persons (TIP) forced the Ministry to suspend some services while developing and re-engineering new business processes. The exercise affected past flow of applications in respect of citizenship, residence permits and visa applications.

11.3.6 MINISTRY OF COMMUNICATIONS, SCIENCE AND TECHNOLOGY

Budget for the Ministry was M6,470,000.00 while actual collection was M3,588,958.00 resulting into under collection of M2,881,042.00 or 45%.

The reasons provided for unsatisfactory collection was that there were lots of orders from customers but due to COVID-19, most businesses were closed and even after they were open, they did not make enough money to pay the ministry. Furthermore, the Ministry has reported outstanding rentals amounting M3,980,657 as accounts receivable.

There was also over collection on the newspaper advertising and sale of goods due to the following:

- The selling of Portraits of the new Prime Minister Dr Moeketsi Majoro replacing Dr Motsoahae Thabane on change of Head of Government in 2021 in newspaper advertisement.
- During the financial year 2019/2020 ATS received a huge order of Thaba-Tseka coal burning stoves to be supplied to Primary Schools in Mokhotlong, Thaba Tseka and Qacha`s Nek to a tune of about M425,000.00. This was a very big order, which was filled and supplied for a period of two to three years. The money for this order was paid in two tranches. The first at the beginning of the financial year 2019/20 and the second was paid at the end of the financial year 2020/21.

11.3.7 MINISTRY OF LAW AND CONSTITUTIONAL AFFAIRS

The Ministry's Revenue budget for the financial year 2020/21 was M3,356,000.00 while the actual collection was M13,172,951.00 resulting into over collection of M9,816,951.00 or 293%.

The reasons for over-collection are as follows:

- After the closure of Swissborough case, Webber Newdigate returned into the Ministry account an amount of M11,552,616.00 which was held in their Trust Fund pending final award/judgement together with an amount of M473,925.22 which was a deposit for Rajah & Tann for Singapore case. (Grand total of M12,026,541.22)
- Revenue amounting to M2,209,590.00 which was due to the Government of Lesotho as a share from World Intellectual Property Organisation (WIPO) for the year 2020/21 has not been received by the Ministry. This issue has been recurring for some years and it appears that the Ministry had not made proper follow-ups.

11.3.8 MINISTRY OF PUBLIC WORKS

The ministry had budgeted revenue totalling M946,100, while the actual revenue collected was M499,344, resulting into a shortfall of M446,756 or 47%.

The under collection was due to the following COVID-19 constraints:

- Contractors could not renew or register categories as it was expected.
- COVID-19 restrictions on events reduced renting of podiums; and auctions.

There was no revenue collected on sale of tender documents.

11.3.9 MINISTRY OF LABOUR AND EMPLOYMENT

The revenue budget for Ministry of Labour and Employment was M6,460,888.00 while actual revenue collected was M7,273,889.00 resulting into over collection of M813,001.00 or 13%.

The Ministry explained that over collection was due to engagement of many consultants at Polihali Dam.

11.3.10 MINISTRY OF TOURISM, ENVIRONMENT AND CULTURE

The ministry had a revenue budget of M4,982,269.00 but collected M2,055,021.00 making a shortfall of M2,927,248.00 or 59%. Reasons provided by the ministry for under collection are as follows:

- The licencing board did not sit since January 2020 to consider renewals and new applications due to COVID-19 pandemic, which led to closure of most hotels, bed and breakfast, casinos and guesthouses.
- Library memberships were not renewed.
- Hall hire incomes were not realised due to lockdowns.
- The facility operators were given six months rent holidays from April to September 2020.

11.3.11 OFFICE OF THE AUDITOR-GENERAL

The Office of the Auditor-General collects revenue arising from audits of statutory bodies and development projects. However for the year under review, there was no revenue budgeted as it was anticipated by that year the transitional arrangements to the independent and autonomous office would have been completed and audit fees would be deposited into the Audit Revenue Fund to comply with Audit Act 2016.

The transitional arrangements were not yet completed by the beginning of financial year 2020/21 and collected revenue of M978,635.00 therefore had to be captured under Government revenue head.

11.3.12 MINISTRY OF DEFENCE AND NATIONAL SECURITY

Ministry of Defence recorded very low budget execution of 23 percent as the budget was M1,245,000.00 and actual collection was M287,637.00. The shortfall of M957,363.00 occurred due to the following:

- The collection of Aircraft hire was influenced by the number of unserviceable aircrafts whereby LDF Airwing was operating with two light helicopters while the three medium helicopters were grounded due to shortage of funds to procure aircraft spare parts. These medium utility helicopters have more carrying capacity than the light helicopters as such, it was not possible to meet all the requirements of the Government Ministries, companies and individuals. The LDF Airwing was operating with 33 percent of serviceable helicopters while 67 percent was grounded fleet.
- COVID-19 restrictions and lockdowns made it impossible to hire out aircrafts hence the under collection. Also, due to an increase in infections of COVID-19 cases the Military Hospital had to be closed and only be opened for emergencies for a while.
- The band could not be hired out, as events were not allowed per COVID-19 regulations.

11.3.13 MINISTRY OF LOCAL GOVERNMENT AND CHIEFTAINSHIP

The ministry has collected 16 percent above the budget of M3,367,584.00 as the actual collection totalled M3,901,041.00.

The over collection of M533,457.00 was mostly realised in land and land documents line items as a result of new commercial sites. Furthermore most of the tender documents were issued in the current financial year and therefore contributed to over collection.

11.3.14 MINISTRY OF GENDER, YOUTH, SPORTS AND RECREATION

The Ministry of Gender had budgeted for an amount of M563,700 and collected M4,000 resulting into a shortfall of M559,700.00 or 99%.

The ministry provided the following reasons for under collection of revenue:

- Due to COVID-19 hard lockdown restrictions, Setsoto Stadium was not hired for music concerts, church conference and the closure of schools for the entire financial year and therefore no collection of revenue.
- The closure of 'Matheko Vocational Training Centre and therefore there were no sales of tender documents for catering services.

11.3.15 JUDICIARY

The total revenue budget for Judiciary was M3,708,903.00 while the actual collection was M2,346,871.00 resulting in a variance of M1,362,032.00. Management stated the following reasons for under collection:

- 57 percent on the number of files opened and number of certificates issued during the year was achieved.
- 62 percent on the number of cases where fines were imposed in the year 2020/21 was received.
- The collections of Masters fee depends on the number of completed registered estates, due to COVID-19 restrictions the executors were unable to complete their tasks.

11.3.16 MINISTRY OF POLICE AND PUBLIC SAFETY

The Ministry of Police had a revenue shortfall of M4,296,643.00 or 40 percent in 2020/21 as the budget was M10,681,400.00 while the actual collection was M6,384,757.00.

The ministry explained that the shortfall was due to COVID-19 pandemic restrictions resulting to reduction in provision of firearms licenses, Registration of security Co. & Guards, road accident reports and Police outside services.

There was also over collection on revenue of M50,880.00 on identity photographs for work permits. The ministry collected revenue amounting to M55,880.00 against the budget of M5,000.00. The over collection was basically arrears of services provided to the other ministries before the activity was transferred to the Ministry of Labour and Employment in January 2019.

11.3.17 MINISTRY OF TRANSPORT

The ministry had anticipated to collect M20,059,128.00 while revenue collected as per the Ministry's financial statements amounted to M45,752,441.00 resulting into an over collection of M25,693,313.00 or 128%.

The Ministry indicated that the over collection was a result of Motor Registrations, Driver's Licences, Motor vehicle inspection and Number Plates due to introduction of new prices while the budget was based on old prices.

It was further specified that there was under collection on permits, airport service charges, Landing fees, temporary air service permits and rent due to COVID-19 pandemic, which restricted movements and operations.

CHAPTER 12: ACCOUNTABILITY OF SUPPLY SERVICES/ APPROPRIATED EXPENDITURE

12. SUPPLY SERVICES/APPROPRIATED EXPENDITURE

The Chief Accounting Officers are required by Section 5 of the PFMA Act 2011 to ensure that public money allocated by Parliament is used efficiently to achieve programme objectives approved by Parliament. The expenditure must be supported by proper vouchers, evidence of performance of the services and by proof of payment to the correct payee and must have come in course of payment in the financial year in which it is charged.

At the end of each financial year, each head of expenditure is required to prepare a Statement of Comparison of Budget and Actual Amounts for each voted service administered by it. The statutory requirement is for such statement to provide details of the outturn for the year against the amount provided by Parliament, based on the cash amounts of payments and receipts. The prior-year outturn is also shown for comparison purposes.

12.1 RECURRENT EXPENDITURE

The original budget for all Spending Units as per Appropriation Act 2020/2021 amounted to M12.306 billion; additional budget as per Supplementary Appropriation Bill 2020/2021 was M1.703 billion and there was a reallocation of funds totalling M342 million towards COVID-19 related expenditure. Therefore total revised budget amounted to M13.667 billion. Total expenditure amounted to M12.482 billion, which was below revised budget by M1.185 billion or 9 percent as shown on Table 12.1.

Three (3) Heads of Expenditure (Development Planning, Public Works and Water) recorded excess expenditure and there is no information provided as to whether a Statement of Excess has been prepared and presented before Parliament as required by the Constitution. I am also not aware as to whether the Minister has complied with Section 27(6) of the Public Financial Management and Accountability Act 2011 by imposing a surcharge on the persons who were Chief Accounting Officers for those heads at that time.

Table 12.1 – Budget Execution on Recurrent Expenditure

Spending Unit	Original Approved Budget	Supplementary Bill	Reallocation	Revised Budget	Actual	Variance	Execution (%)

12.2 DEVELOPMENT BUDGET

Development/Capital expenditure relate to payments for acquisition of fixed capital assets, stock, land or intangible assets. A good example would be building of schools, hospitals or roads. Sources of funding for development expenditure include donor grants, donor loans and government revenues.

12.2.1 BUDGET EXECUTION BY SOURCE OF FUNDING

Approved budget for development expenditure was M5.605 billion and there was a supplementary budget of M1.715 billion (per Supplementary Appropriation Bill) resulting into total budget of M7.320 billion. There was reallocation of funds from development budget to the tune of M812 million for economic and social response to mitigate impact of COVID-19 and therefore revised budget remained at M6.508 billion. The actual expenditure amounted to M3.888 billion hence under expenditure of M2.620 billion or 40 percent as presented on Table 12.2.1 below and detailed breakdown is on Table 12.2.2.

Table 12.2.1 – Budget Execution by Source of Funding

Source	Original Budget	Supplementary Budget	Reallocation	Revised Budget	Actual Expenditure	Variance	Exec.
	M'000	M'000	M'000	M'000	M'000	M'000	(%)
A	B	C	D	E=B+C-D	F	G=E-F	H=F/E
GOL	2,689,726	1,714,981	811,797	3,592,910	1,577,802	2,015,108	44

12.2.2 BUDGET EXECUTION BY SPENDING UNITS

The comparison of revised budget and actual expenditure on Table 12.2.2 by spending units revealed that out of 26 Heads of Expenditure, 9 recorded low budget execution of below 50 percent. Furthermore, out of 9 Heads of Expenditure, 5 had supplementary budget signalling that there was no need for additional funds and this also indicates inadequate monitoring of the budget. Low budget execution is an indication that Government priorities were highly and negatively affected.

The comparison further revealed excess expenditure on the Ministry of Social Development by 29 percent. The requirements of the Constitution and PFMA Act 2011 on excess expenditure have also not been complied with.

Table 12.2.2 – Budget Execution on Development Expenditure

Spending Unit	Original Budget	Supplementary Bill	Reallocation	Revised Budget	Actual Expenditure	Under/(Over) Expenditure	Budget Execution
	M'000	M'000	M'000	M'000	M'000	M'000	(%)
A	B	C	D	E=B+C-D	G	H=E-G	I=G/E

12.2.3 USAGE OF DONOR GRANTS

There was excess of M65 million on donor grants as the budget was M858 million and actual receipts amounted to M923 million. Usage of grants received was 91 percent as the total amount spent totalled M837 million as indicated on Table 12.2.3.

Three ministries (Communications, Local Government and Gender) did not have budget for donor grants however, they received amounts of M935,641.00; M1,185,548.00 and M173,872.00 respectively. The ministries of Communications and of Gender recorded high usage of 149 percent and 128 percent respectively.

In my last year's report I had indicated that some ministries had spent more than what they reported to have received, which raised a confusion about where they received the extra funds to spend. The ministries of Communications and Local Government appeared in the list of such cases.

Table 12.2.3 - Grants received and usage

Ministry	Budget	Received	Spent	Variation from the Budget	Usage	Exec. (%)	Use (%)
A	B	C	D	E=B-C	F=C-D	G=C/B	H=D/C
Agriculture	93,553,000	50,515,691	51,548,471	43,037,309	-1,032,780	54	102

12.2.4 USAGE OF DONOR LOANS

The donor loans received accounted for 61 percent of the budget of M2.057 billion as they amounted to M1.259 billion. The shortfall of 39 percent is marginally higher than the previous year's shortfall of 27 percent. The comparison of amounts spent against amounts

received revealed overspending of 151 million over receipts of M1.259 billion as presented on Table 12.2.4.

It can be noted from the table that five ministries have spent more funds than received. I could not ascertain from the ministries' financial statements the reasons for overspending. However, compared to previous year, usage is much satisfactory at the range of 83 percent to 409 percent.

Table 12.2.4 – Loans received and spent

Ministry	Budget	Received	Spent	Variation from the Budget	Usage	Exec. (%)	Use (%)
A	B	C	D	E=B-C	F=C-D	G=C/B	H=D/C

13. CONSOLIDATED FUND STANDING SERVICES

Charged or statutory expenditure are payments for Consolidated Fund standing services, which are met directly from the Consolidated Fund and are governed by laws, which continue in force until repealed or amended. They are thus made independent of annual appropriation by Parliament. The responsibility for administration of charged expenditure rests with the Ministry of Finance.

Charged expenditure can be categorised into the following:

- a)** High constitutional offices whose dignity should not be compromised such as the King in terms of Section 48 of the Constitution (**Head 24 – statutory salaries and allowances**);
- b)** Expenses that are needed to maintain independence of some important offices such as Judges, Attorney-General, Ombudsman, Auditor-General, etc. in terms of Section 115 of the Constitution (**Head 24 – statutory salaries and allowances**);
- c)** Expenses that are a must such as debt charges according to Section 116 of the Constitution (**Head 21 – principal repayments and Head 22- Interest charges**);
- d)** Section 150 of the Constitution requires that all pension benefits for the service of a public officer should be a charge on the Consolidated Fund (**Head 23 – pension and gratuities**); and
- e)** Section 31 of PFMA Act 2011 provides that if monies have been paid into the consolidated fund by error, refunds payable to the person or entity entitled should be a charge on the consolidated fund. (**Head 26 – Refunds of Erroneous receipts**).

Audit Concern:

Contrary to the requirements of the Constitution and Section 14(4) of the PFMA Act 2011, the budget for the Consolidated Fund Standing services/statutory expenditure was included in the Appropriation Act for 2020/2021.

13.2 BUDGET EXECUTION

I have already stated that charged or statutory expenditure are made independent of annual appropriation by Parliament. However, the Appropriation 2020/2021 Act has included this expenditure contrary to the requirements of the Constitution and Section 14(4) of the PFMA Act 2011.

The original budget totalled M4.626 billion and the revised budget is M5.239 billion indicating that there was additional budget of M612 million. There was additional budget of M568 million on Public Debt and M44 million on Subscriptions to International Organisations.

The actual expenditure incurred totalled M4.675 billion and its comparison with the revised budget of M5.239 billion, revealed budget execution of 89 percent as presented on Table 13.2.

Table 13.2 – Budget Execution on Charged Expenditure

Spending Unit	Revised Budget	Actual Expenditure	Variance	Budget Execution (%)
A	B	C	D=B-C	E=C/B
Public Debt	2,740,946,753	2,589,546,990	151,399,763	94
Pensions	2,326,182,218	1,975,223,099	350,959,119	85
Statutory Salaries	40,351,212	18,311,044	22,040,168	45
Subscriptions to Int. Organisations	128,850,235	91,735,314	37,114,921	71
Refunds of Erroneous receipts	2,268,000	104,104	2,163,896	5
Total	5,238,598,418	4,674,920,551	563,677,867	89

Source: Ministries' Financial Statements

Audit Concern:

- The additional budgets of M568 million on Public Debt and M44 million on Subscriptions to International Organisations are included in the Supplementary Appropriation Bill despite the fact that these are charges on the Consolidated Fund and therefore not subject to appropriation by Parliament.

13.3 CHARGED EXPENDITURE NOT SUPPORTED BY A STANDING LEGISLATION

In my last year's report, I raised a concern that I was not aware of any legislation qualifying Head 25 – Subscriptions to International Organisations to be a charge on the Consolidated Fund. To date, I have not come across or been advised of any standing legislation supporting Head 25 to be charged expenditure.

PART 4

AUDIT OF STATUTORY BODIES

CHAPTER 14: AUDIT OF STATUTORY BODIES

14.1 STATUTORY BODY

A statutory body is any statutory corporation in which the government has financial interest of fifty per cent or more, or any other body in which the said corporation has a financial interest of fifty per cent or more, or any other such body as the Minister may by notice in the Gazette designate. Any Development Project Authority established under the Development Projects Order 1973 also falls under the Statutory Bodies.

14.2 ACCOUNTS OF A STATUTORY BODY

Under the law setting up each statutory body, there is a provision stipulating a specific time within which the financial statements should be prepared and audited.

Audit concern:

Although the law is very clear on the time within which the accounts are to be produced, in certain cases the law is not strictly followed. In a number of cases the cause for the delay is either failure of the organisation to prepare the accounts on time or delay to approve the accounts by the Board of Directors.

14.3 AUDIT OF THE ACCOUNTS OF A STATUTORY BODY

Section 7 (1) (b) of the Audit Act 2016, requires that the records and accounts of a statutory body should be audited by the Auditor-General. Upon completion of the audit of the accounts of a statutory body, a copy of those accounts together with the report thereon is send to the appropriate Minister. In addition, a long-form report setting out in detail, matters that came to attention of the auditors during the audit is forwarded to the chairperson of the Board of Directors.

Audit concern:

The legislation setting up a statutory body read with Section 28 of the Audit Act 2016 and Section 44 of the PFMA Act 2011 requires the appropriate Minister to present the audited accounts of a statutory body to Parliament. I indicated in my last report that in as much as I direct audit reports to appropriate ministers, these reports are not presented in Parliament contrary to the requirements of the law. Having noted continuous failure by ministers to present reports in

Parliament, from September 2020 I ensured that when I submit my reports, I specifically remind them to present such reports in Parliament in terms of the law. My reminder has not served any purpose as reports of statutory bodies and development projects are still not presented in Parliament.

14.4 COMMISSIONED AUDITS

Under Section 24 of the Audit Act 2016, the Auditor-General may authorise a practising member of a professional accountancy body, recognised by the Laws of Lesotho, to examine or audit books of accounts of any authority or body, which the Auditor-General may be required to examine and audit. However, audit decisions remain those of the Auditor-General.

My office had a framework agreement with five (5) Lesotho Audit Firms working in 3-year cycle. These audit firms audited on my behalf some of the statutory bodies and development projects.

14.5 AUDIT CONCLUSIONS ON THE FINANCIAL STATEMENTS

The primary objective of financial audit is to give an opinion on the fairness and reasonableness of the financial statements. The opinion can either be unqualified or qualified.

Unqualified opinion is given when the audited accounts are reasonably reliable and there are no important reservations about them.

Qualified opinion is when the error in the accounts is thought to likely have such a serious effect. The reasons for qualification can either be **uncertainty** as to whether material misstatement does or does not exist in the accounts or **disagreement** with the manner in which a transaction has been dealt with in the accounts. When qualifying the accounts the strength of nature of circumstance is also considered, whether it is material or fundamental.

There could be a qualification on the strength of material uncertainty or material disagreement. Where there is fundamental uncertainty, there will be a disclaimer of opinion and fundamental disagreement is a basis for an adverse opinion.

Table 14.5 shows opinions on the audited financial statements of various statutory bodies and reasons for qualification where applicable, are stated in the subsequent paragraphs.

Table 14.5 - Audit Opinions on the financial statements

Source: Reports and records of the Auditor-General

14.6 BASIS FOR QUALIFIED OPINIONS

14.6.1 LESOTHO ELECTRICITY COMPANY – 31 MARCH 2020

Basis for an Adverse Opinion

- a) The financial statements were materially misstated due to inaccurate recognition of electricity sales. IFRS 15 states that the entity should recognise revenue over time if the customer simultaneously receives and consumes all the benefits provided by the entity. On the contrary, the company recognises revenue on sale of electricity token instead of consumption of electricity units.
- b) The financial statements did not report transactions and balances relating to the Southern Africa Power Pool (SAPP) bank account activities. The bank statement reflected a balance of M66,160,588.00 (USD3,643,766 x 18.1572). The effect of these unrecorded transactions was not reflected in the Financial Statements. Management did not provide adjusting journals for that bank account. Consequently, I was unable to determine necessary adjustment relating to this bank account.
- c) There was an unresolved variance of M27,860,942.00 between the Value Added Tax (VAT) payable in the financial statements and the VAT disclosed in the LRA return for the year ended 31 March 2020. The general ledger and financial statements showed a liability of M33,896,237.00 while the VAT returns showed a liability of M6,035,295.00. It was difficult to determine the appropriate figure to be disclosed in the financial statements.
- d) Included in the financial statements were sundry debtors' balance of M52,195,944.00. The debtors' listing showed a balance of M90,533,717.00. There was no reconciliation of these amounts. Sufficient and appropriate audit evidence to substantiate the variance of M38,337,773.00 was not availed hence I could not determine any adjustments to the financial statements.
- e) There was no current year provision for bad and doubtful debts. Management did not furnish their computations. That was a departure from International Financial Reporting Standards (IFRS). As a result, it was impossible to determine the appropriate adjustments to be made in the financial statements.

- f) A difference of M9,197,779.00 was noted between security deposits listing totalling M34,316,640 and a sum of M25,118,861.00 disclosed in general ledger. Management could not resolve the variance.
- g) During the audit, assets apparently received as a grant from the Lesotho Electricity Supply Project amounting to M88 million lacked supporting documentation to substantiate the value and ownership. There was no sufficient appropriate audit evidence showing the transfer of ownership of these assets.

14.6.2 WATER AND SEWERAGE COMPANY – 31 MARCH 2020

Basis for Adverse Opinion

- a) Property, Plant and Equipment have not been re-valued for more than 10 years and the cost was further misstated by an unexplained discrepancy of M2.79 million between the fixed asset register and the ledger records as well as the continued inclusion in the register of property costing M1.53 million which was sold for M1.5 million in 2012.
- b) Physical inventory count at year-end was not conducted. The inventory value reflected in the financial statements was based on system-generated report of which last year's audit procedures revealed the inclusion of M8.9 million worth of non-existent items. There was no evidence that the system report was reviewed and reconciled with physical quantities during the year.
- c) Due to unavailability of reliable records, I was unable to quantify the misstatement in the financial statements as the inventory items were reported at the lower of cost and net realisable value using the first-in, first-out method; whereas the Pastel Evolution Inventory Module used weighted average method to generate the value reported in the financial statements.
- d) Schedule of accounts receivable included a suspense account credit balance of M2.12 million which had been outstanding for more than three years.
- e) Included in the cash and cash equivalent was an amount of M1.61 million which was not traceable to any physical cash or any bank account.

- f) The sum of M3.23 million included in the accounts payable could not be substantiated due to the unavailability of creditor's supporting list.
- g) Due to inadequate documentation of numerous adjustments in an account described as prior year adjustments with a balance of M30.66 million, I was unable to verify the rationale for the adjustments made.
- h) An amount of M1.07 million relating to 2017, 2018 and 2019 financial years' operating costs was charged to the 2020 income statement thereby overstating the current year's operating costs.

14.6.3 LESOTHO POSTAL SERVICES - 31 MARCH 2009-2011

Basis for Disclaimer of Opinion

- a) The audit was constrained by the unavailability of detailed ledger records and supporting documents. As a result, audit procedures designed to verify and confirm the balances reported in the statements were not effectively and conclusively performed.
- b) There was no update to fixed assets register after revaluation in 2007, resulting in a difference of M3 million between the re-valued cost of M36 million and the 2011 trial balance figure of M33 million, coupled with property valued at M15.9 million which had no ownership documents.
- c) There was no evidence that physical inventory counts were conducted at the year-end. The inventory values of M2.6 million, M4.4 million and M6.4 million reported in the financial statements for the financial years 2008/09, 2009/10 and 2010/11 respectively were not supported with any inventory valuation schedule.
- d) Included in the trial balances were accounts receivable balances and accounts payable balances for which the supporting list, subsidiary ledger and control account ledger records were not available for verification.
- e) There were no records to enable verification of the fairness of cash and cash equivalents of M37 million, M5.71 million and M22.67 million reported in the financial statements for the three years ended 31 March 2011 and the banks declined to confirm the account balances due to elapsed time frame.

- f) There were unexplained differences of M2.48 million, M2.32 million and M3.05 million in respect of post office funds between the trial balance figures and the financial statements.
- g) Due to the unavailability of accounting records, I was unable to verify the validity, completeness and accuracy of total income streams of M41.28 million, M8.31 million and M11.08 million for the three years ended 31 March 2011 including income components of M9.55 million, M2.69 million and M0.70 million described as 'unknown deposit'.
- h) Expenditure ledger records and supporting documents were not available to substantiate reported expenditure of M24.07 million, M11.18 million and M7.18 million including salaries and wages.
- i) Included in the financial statements were expenditures of M5.09 million, M2.38 million and M0.23 million described as unknown cash withdrawals for which the nature of expenditure and beneficiaries could not be ascertained.

14.6.4 FINANCIAL INTELLIGENCE UNIT – 31 MARCH 2019

Basis for qualified Opinion

Included under staff salaries in the Financial Statements was an amount of M148,667.00 which was an overpayment of gratuities calculated by aggregating basic salary plus the allowances in respect of employees who have completed their tours.

14.6.5 ROAD FUND – 31 MARCH 2021

Basis for qualified opinion

The audit opinion for the previous year was a disclaimer. The opening balances for the current year were from those financial statements of the previous year. Therefore, I could not express an opinion on the opening balances as to whether they reflected true and fair financial position of the Fund.

CHAPTER 15: OTHER MATTERS ARISING FROM AUDIT OF STATE OWNED ENTERPRISES

15.1 LESOTHO MILLENNIUM DEVELOPMENT AGENCY

The Lesotho Millennium Development Agency (LMDA) is an organisation set by the Government of Lesotho in 2013. The Agency's mandate is maintenance of Health Care Facilities, development and implementation of Compact II. Health Care Facilities' maintenance covers works, services and rehabilitation of health facilities to fully functional state. LMDA executes its mandate in conjunction with the Ministry of Health as the lead agency as well as other key partners.

15.1.1 Legal establishment of the Lesotho Millennium Development Agency

The Cabinet of Lesotho approved the following four proposals regarding continuity of the Millennium Challenge Account Compact (MCC):

- Millennium Challenge Account (MCA) Lesotho Authority Act No.1 of 2008 was to be amended;
- MCA – Lesotho be renamed the Lesotho Millennium Development Agency;
- The tax exemptions under the MCA Compact to be continued after the Compact end date until work-in progress was completed and the Defects Notification Periods pertaining to the related contracts have expired.
- The Law Office was to be instructed to draft the Amendment Bill.

My audit noted the following irregularities regarding establishment of the LMDA:

- a) The MCA-Lesotho Authority Act No.1 of 2008 was not amended instead Legal Notice 151 of 2013 was published on "Millennium Challenge Account – Lesotho Authority (Continuation) Notice". This raised a concern, as substantive law cannot be amended by subordinate legislation. Another Act of Parliament can only amend an Act of Parliament. In addition, the Legal Notice provides for the continuation of MCA-Lesotho Authority to exist and function under the name LMDA as opposed to the requisite

establishment of LMDA. Therefore the existence of LMDA as a legal entity is controversial.

- b) Section 4(1) of the Income tax Act, 1993 requires that Pay As You Earn (PAYE) be charged on every individual within Lesotho who earns a chargeable income. It however transpired during the audit, that employees of LMDA do not pay income tax in the form of PAYE. This was legally founded when the Agency was still funded by MCC and while work in progress continued. Currently work in progress has been completed and the Government of Lesotho funds the budget of LMDA but the employees of LMDA do not pay PAYE. Legal consultations were conducted, and I found that in the event there is a conflict of laws, the law directly applicable to the issue supersedes. In this matter, Income Tax Act, 1993 prevails over the MCA Act 2008.
- c) The Audit revealed that to date no Amendment Bill has been drafted by the Law Office.

15.2 FINANCIAL INTELLIGENCE UNIT

The Financial Intelligence Unit (FIU) was established in 2010 under Money Laundering and Proceeds of Crime Act, 2008 which was subsequently amended by Money Laundering and Proceeds of Crime (Amendment) Act, 2016 (MLPCA). It is the central agency responsible for receiving, requesting, analysing and disseminating to the investigatory authorities disclosures of financial information concerning suspected proceeds of crime and alleged serious offences. On the 6 February 2017, the MLPCA became operational and bestowed upon the Unit the status of a body corporate having perpetual succession and capable of suing and being sued in its own name in order to enhance the independence of the Unit.

15.2.1 SUSPICIOUS TRANSACTIONS REPORTS

The FIU receives and disseminates disclosures of information concerning suspected proceeds of crimes and alleged serious offences for further investigations to the investigating authorities such as Law Enforcement Agencies (LEA) including Directorate on Corruption and Economic Offence (DCEO), Lesotho Mounted Police Service (LMPS) and Lesotho Revenue Authority (LRA). It also prepares a record of suspicious transaction to relevant authorities.

It was established that FIU did not have a systematic follow up mechanism on the Suspicious Transactions Reports sent to investigating authorities but were done on an ad hoc basis. Review of the records indicated that the number of cases in the Suspicious Transaction Reports (STRs) increased on annual basis since 2014, with a drastic increase of 326 cases in 2017/2018 from 85 cases in 2016/2017. The Unit highlighted some weaknesses in disseminating the received reports due to staff inadequacy and receiving information from relevant sources.

The audit discovered that out of the 326 cases recorded, there were some outstanding from the LMPS, which could not be traced, as LMPS did not separate them from those of the public. The absence of a systematic follow-up could result in information disseminated to the investigating authorities not receiving the attention it deserved and cases not being adequately resolved in the LEAs.

Management was advised to ensure that STR data recorded is accurate and complete with running balances and cumulative figures. Furthermore, FIU management was encouraged to discuss with LMPS the best methods of recording the cases to ensure that they are not mixed with those from the public. Alternatively, they could use an Occurrence Book reference number to follow up cases disseminated to LMPS on an annual basis. Management was also advised to put in place a mechanism to ensure systematic follow-up of the reports on agreed timeframes.

15.2.2 HUMAN RESOURCE ISSUES

Managing the human resource is essential for maximising employee performance to ensure the achievement of entity strategic objectives. The Unit has Human Resources Policies and Procedures Manual (HRPPM) for management of human resource issues. The audit revealed the following anomalies in the management of human resource function:

a) Disparity in Employment Contracts

The HRPPM states that employee tour of duty should be for a period not exceeding thirty-six (36) months. It was discovered that out of 11 employees, three had 5-year contracts while eight had 2 years. The Unit did not provide explanation for differences in duration of employment. This anomaly contravened the HRPPM and could be prejudicial to some of the employees, which

could also have adverse effect on performance. The management was advised to ensure that employment contracts signed are consistent with the HRPPM.

b) Overstated gratuity payments

The HRPPM stipulates that the amount of gratuity should be based on the employee basic salary during the contract service, including the terminal benefits payment in accordance with the conditions of service with regard to leave payment, but excluding any acting or other allowances paid to the employee.

Following the implementation of employee benefits policy effective from the financial year 2015/2016, all gratuities payments made to employees comprised the aggregated basic salary, car and housing allowances computations. The gratuity payments were overstated by a total of M469,338.41, due to inclusion of allowances in computing gratuity payments.

Management was advised to ensure that gratuities are calculated based on aggregate basic salary drawn during the period as required by the HRPPM. Management should also investigate the overpayments and take appropriate action.

c) Unauthorised Salary Increase

The HRPPM states that employee's salary increase should be effected upon written notification issued by the appointing authority or the appointed representative.

It was observed that gross salary of all staff except one increased substantially from M568,407.00 in October 2016 to M750,317.00 in November 2016 resulting in a variance of M181,910.00 or 32 percent increase. FIU did not provide either a breakdown of percentage increase or proof of approval or justification to substantiate such increase. Nonetheless, management detected improprieties caused and as a result instituted disciplinary against those responsible and also escalated the matter to LEA.

I recommended that Management should continue with investigations.

d) The HRPPM stipulates that advances against salary should not exceed the equivalent of one month's basic salary and must be repaid within four equal instalments commencing from the following month.

It was noted that there were outstanding salary advances for two officers amounting to M56,166.77 and M51,000.00, and the latter was not approved. No explanation for failure to clear advances was provided and it appeared that the officers responsible did not demonstrate the intention to repay outstanding advances, as it had been two years already following the issuance without repayments. Although the management had instituted disciplinary action against the employees, the recovery efforts were delayed as the employees in question escalated the matter to the courts of law.

Management was advised to strengthen the salary advance process or system and recover the outstanding salary advances from concerned officers.

15.2.3 PROCUREMENT AND LOSS OF STORES

Schedule 1 of the Public Procurement Regulations, 2007 states that procurement of the goods, works or services between the values of M30,000.00 to M100,000.00 requires three quotations to be obtained from three service providers.

It was established that in October 2017 three quotations were sought for the purchase of five (5) laptops as per the Procurement regulations. However, five laptops amounting to M85,896.00 were purchased in cash on 3 November 2017 from supplier in Bloemfontein and apparently those laptops were reported stolen on the same day. A case was opened in South Africa and Lesotho (case no.139/11/2017) although the police report in South Africa indicated that the complainant seemed to have been dismissive of the forensic investigations on the matter.

The purchase of computers from a foreign supplier without appropriate independent sourcing of quotations contravened the regulations, procedures and guidelines governing procurement of goods and services. Value for money could not be achieved by procuring goods from one supplier. There was no evidence that the matter was followed up.

Management was advised to strengthen the adherence to procurement laws, regulations and procedures within the Unit in order to achieve value for money. In addition, the matter should be followed-up with the police and appropriate action be taken to recover the loss.

15.2.4 IMPROPER UTILISATION OF THE RESOURCES

The HRPPM stipulates that the Director is entitled to use his/her discretion to issue cell phones and allowances thereof to employees, whose nature of the job demands working extra hours. In addition, allocation of resources should be allocated in such a way that it serves the intended purposes.

It was discovered that the IT Equipment such as laptops, desktops and tablets were not equitably distributed as one of the employees was allocated three laptops, a desktop and two tablets, while another had two tablets. This appeared to be poor management of resources, which could result in waste and misuse of the scarce Unit's resources.

Management was advised to ensure that acquisition of resources for the Unit are need based and should be allocated and utilised equitably.

15.2.5 IPAD DAMAGED AT RESIDENTIAL HOUSE

It was discovered that the Unit had a damaged iPad that was struck by fire at one officer's residential house on the 19 June 2017. There was neither evidence indicating as to whether the loss occurred due to negligence or accident, nor loss report prepared or action taken on the loss. The Unit could lose funds unnecessarily if precautions for safeguarding assets are not complied with.

A recommendation was made to Management to investigate the loss and take measures to recover the loss or sanctions be applied if necessary.

15.3 LESOTHO COMMUNICATIONS AUTHORITY

Lesotho Communications Authority (LCA) was established by Lesotho Communications Authority Act 2000, which was subsequently repealed by Communications Act, 2012. LCA is a converged national regulatory agency for the communications sector in the Kingdom of Lesotho. Its broad mandate is to license operators, facilitate the development of and regulate the communications sector. The sector is composed of telecommunications, broadcasting and postal services.

15.3.1 Procurement of Compliance Monitoring and Revenue Assurance Tool

In December 2019, the Board of the LCA approved acquisition of Compliance Monitoring and Revenue Assurance Tool at the projected minimum cost of M17 million. The maximum amount to be accepted or considered was not stipulated.

Scrutiny of records pertaining to procurement of the tool revealed that laws guiding the procurement processes were not fully complied with, which compromised credibility of the tender.

The audit further established the following anomalies in the procurement process:

- LCA processed the tenders which were far above the minimum threshold of M17,000,000.00 by range of M105,008,590.00 to M705,865,148 or 618 percent to 4,152 percent. The outrageous tender prices were an indication that a thorough research was not conducted to establish the market price for the tool.
- In the normal course of business, the Board ought to have been involved and made aware of the variation for them to make a decision in the best interest of LCA. Nonetheless, that was not the case and the tool was purchased at an amount of M529,126,709.00.
- Involvement of the Chief Executive Officer in the evaluation of tenders, which has impacted on the outcome of the results of the preferred bidder.
- A commencement fee of M7,242,021.00 was paid to the Supplier in December 2020, however the project was put on hold as there was no enabling legislation. This is a sign that it was premature for LCA to acquire the tool.
- There was no evidence that the issue of putting the project on hold has been communicated to the supplier and failure to have done so could lead to litigation against LCA.

15.4 LESOTHO ELECTRICITY COMPANY COMMUNICATIONS

Lesotho Electricity Company Communications (LECC) is a telecommunication subsidiary of Lesotho Electricity Company (LEC). LECC leases excess dark fibre capacity owned by the holding company, LEC, to provide fibre infrastructure on per segment basis to local licensed telecommunications and network services operators. The Company was registered in April 2015 with a mandate to manage LEC's fibre-optic cable infrastructure on a commercial basis.

LECC's mission is to provide reliable optic fibre communication infrastructure, broadband and Information and Communication Technology (ICT) services to wholesale users, maintain value-adding relationships with stakeholders. LECC obtained commercial license from the sector regulator, Lesotho Communications Authority (LCA), in June 2015 to lease fibre cores and capacity. The company opened its doors for business in October 2015.

15.4.1 Unremitted Revenue to Lesotho Electricity Company

LECC entered into an agreement with LEC that required LECC to remit 10% of net communications revenue derived from lease of passive infrastructure to communication customers. Contrary to the agreement LECC failed to remit a total amount of M1,588,475.00 from 2016 to 2021. The details of unremitted revenue are as shown below:

Year	Amount(M)
2016	19,124
2017	249,997
2018	435,081
2019	407,755
2020	323,352
2021	<u>153,165</u>
Total	<u>1,588,475</u>

Management of LECC was advised to remit the amount of M1,588,475.00 to LEC and a response was consideration on initialising payments due to LEC in the financial year 2021/22.

15.5 LESOTHO ELECTRICITY AND WATER AUTHORITY

The mandate of Lesotho Electricity and Water Authority (LEWA) is to regulate and control electricity supply industry, water and sewerage services in a transparent, efficient, affordable, and sustainable manner in the country.

LEWA achieves the above function through the Universal Access Fund (UAF), whose objective is to facilitate expansion of electricity services in the rural areas where they are non-existent, using moneys received from levies collected from electricity users, through payment of rural electrification levies. LEWA approves all the projects to be funded by the UAF.

a) Delay in Closure of Projects

During the review it was noted that an amount of M11,534,649.00 was withheld as retention money for 16 projects of which 14 were completed and two (2) in progress. Retention money withheld is paid after LEC has reviewed the completed work and satisfied that the work is up to the required standards and recommended payment of retention to contractors. Fourteen (14) projects were completed between 2015 and 2020 and during the audit in September 2021, there was no information from LEC (the implementing entity) of the status of implementation on the 14 projects, directing LEWA for payment of retention money or an indication that the contractors have not met the set standards and could not be paid.

The delay in payments of retention money on completed projects and in closure of the projects might lead to litigations and loss of trust by the stakeholders and therefore affect the quality of work provided. Management was advised to speed up the payment of retention fees due to contractors and implementation of the approved projects.

b) Delay in Implementation of projects

The budget for Universal Access Fund for the financial year 2020/21 was M24,238,243.00 for electrification of the following projects:

- a) 'Mahuu Project in Rothe Constituency;
- b) Toki project in the Makhalleng Constituency; and
- c) Arone project in the 'Makhoroana Constituency.

It was noted that there was a delay in implementation of the projects under Universal Access Fund, as they had not yet started at the time of audit in September 2021.

Management responded that LEC is the sole implementing agency with regards to UAF Projects. LEWA would continue to interact with LEC regarding implementation of UAF approved Projects. However, it does not have powers to monitor progress on the implementation of the Projects in terms of the Act.

CHAPTER 16: OTHER MATTERS ARISING FROM AUDIT OF DEVELOPMENT PROJECTS

16.1 MINISTRY OF HEALTH

16.1.1 HEALTH SECTOR REFORM PROJECT

a) Assets included in the fixed assets but not physically verified

During the physical verification of assets donated to Queen II Hospital under Lesotho COVID-19 Emergency Preparedness and Response Project and it was noted that some of the assets have not been used since delivery in November 2020. These include assets to the tune of M3,208,535.34, which could not be verified, as a result the assets being kept in a cramped-up storage that made it difficult to conduct the physical verification. It could not be confirmed if the assets were complete or damaged due to the poor conditions in the storage unit where they were kept.

There was no record of the assets at the storage and could not ascertain whether all the delivered assets were available or not. Furthermore, most of the assets could be damaged due to poor conditions where they were kept.

Management was advised to maintain a proper record for all assets and regularly perform physical verification of assets at least every quarter, to confirm the existence and condition of assets.

16.2 MINISTRY OF FINANCE

16.2.1 GLOBAL FUND PROJECT

The main objective of the Global Fund Project is to fight AIDS, Tuberculosis (TB) and Malaria. The Fund has been supporting the Government of Lesotho in the struggle against HIV/AIDS and TB since 2004. The Ministry of Finance is a Principal Recipient (PR) of the Global Fund tasked with the responsibility to coordinate the implementation of three (3) Global Fund grants through the Global Fund Project Management Unit (PMU) as well as the Government of Lesotho Counterpart. To facilitate the implementation of the programme, the PR has engaged the Sub-Recipients (SRs) by contracting them. The contract signed between the PR and SRs

indicate the activities to be undertaken, targets to be achieved within the stipulated time frames and the budget required to carry out those activities.

A programmatic audit was undertaken with the aim of assessing whether the implemented activities were in line with the contractual commitments laid out within the Grant Agreement, and that the implementation of these interventions supported the programmatic results reported by the Implementer (the PR) to the Global Fund. The other focus area was related to the quality of services and care provided under the various interventions of the grant.

The audit established the following deficiencies in the Ministry of Health, which is one of the Sub-recipients of the Global Fund grant:

a) Village Health Workers Challenges

The audit team visited Mokhotlong and Butha-Buthe districts. The health centres visited in Mokhotlong District were Linakaneng, Libibing, St James, Malefiloane and Mokhotlong Hospital. Health Centres visited in Butha-Buthe were 'Muela, Khukhune Community Hall and St Peter's; and Butha-Buthe hospital. The audit focused on a sample of 84 Village Health Workers (VHW) in Mokhotlong and 99 in Butha-Buthe.

Interviews were conducted with VHW, patients and health officers; and the audit noted some achievements and challenges. The critical challenges were as follows:

- The VHWS complained about lack of stationary for writing reports.
- VHWS were not provided with Personal Protective Equipment (PPE) for their safety and protection from COVID-19 when attending the patients.
- Previously VHWS were provided with medication/first aid kits with multi-vitamins, paracetamol, bath towels and soap to help patients but those were not provided anymore.
- Lack of communication between professional nurses and VHWS, for instance, information about monitoring new patients.

- Some patients did not take transfer letters to South Africa and also stopped taking medication. As a result, they came back critically ill.
- VHWs did not get their stipends on time as promised, sometimes it took six to nine months before being paid and there were no explanations on causes the delay. The arrears were never paid.
- There was no specific date for stipend payday, the VHWs travelled for long distances and incurred travel costs to town, only to find that they had not been paid.

b) Non-maintenance of Asset Register by a Sub-Recipient

The Ministry of Health did not maintain the asset register. In addition, there were no records such as stock ledger for goods received or distributed to the health facilities. The only document maintained was the pass out form, which authorised goods to leave the ministry's building. The distribution list that was provided could not be relied upon, as the distributor, receiver and the person delivering the goods did not sign. The date of distribution was also not indicated.

It was reported that fifty (50) oxygen concentrators were delivered to the Ministry of Health by the COVID-19 response mechanism and later transferred to Jhpiego by the Ministry. However, the Ministry of Health had no record on receipt and location of the oxygen concentrators.

Goods not recorded on receipt and distribution are prone to theft and loss and management was therefore advised to maintain the asset register and stores ledger.

16.3 MINISTRY OF TRADE AND INDUSTRY

16.3.1 ECONOMIC DIVERSIFICATION SUPPORT PROJECT

Missing computers

Basotho Enterprises Development Corporation (BEDCO) was one of the organisations identified to implement web-based Business Plan Competition - Promoting Enterprise Development Project under Economic Diversification Support Project funded by the World Bank. The purpose of the competition was to train potential applicants on the use of the portal as well as to enable them to access other online resources such as acquisition of goods, competitions and others. To facilitate the competition, the project procured ten desktop computers amounting to M134,490.00 from DataTech Computers and were delivered to BEDCO Maseru.

During the physical verification of assets by my office in August 2021, all ten (10) computers were recorded in the asset register of BEDCO upon receipt but were missing. The matter was not reported to the police and management of the project.

Management only learned of the missing computers following the auditors visitation to site. Subsequent to that, management that:

- The CEO has reported the matter to Project Management, Board of Directors, the Lesotho Mounted Police Services, the Minister for Small Business Development, Cooperatives and Marketing, and the World Bank.
- A disciplinary action has been taken on the Officer responsible for the department
- The Criminal Investigation Department and a Private Investigator have been on board
- BEDCO has written a letter to the security company demanding payment of stolen equipment

The issue of missing laptops defeated the purpose of training potential applicants on the use of the portal as well as to enable them to access other online resources such as acquisition of goods, competitions and others.

PART 5

AUDIT INSPECTIONS OF GOVERNMENT MINISTRIES AND DEPARTMENTS

17. CONSTRUCTION OF SCHOOL LEARNING FACILITIES

Education Facilities Unit (EFU) is responsible for executing and administering contracts associated with civil works of all buildings (including schools' infrastructure) as well as overseeing the implementation of Ministry of Education and Training (MoET) projects related to civil works.

To respond to the ever-increasing demand for more learning establishments in the country as well as improving the quality of both primary and post-primary education infrastructure, MoET had a total budget of M70,200,000.00 from 2015/16-2018/19 for construction of learning facilities.

The PAC hearings of 2018 revealed that there were schools, which were allegedly constructed by EFU and non-existent. A performance audit was therefore undertaken to assess effectiveness of EFU in the administration of construction of learning facilities and the following irregularities were identified:

17.1 NEED IDENTIFICATION

Need for construction of school learning facilities for primary or Post-primary schools is identified by the School Principals through the use of Form R42 which details the needs of individual schools on annual basis as well as through annual inspections that are carried out by District Inspectors. However, it was found out that:

- a) Form R42 were filled by School Principals and sent to the district offices though it was not clear how or whether District Office Managers used them to identify schools' need for learning facilities, as there were no compiled lists of identified learning facilities that emanated from such forms.
- b) Inspections were inadequately carried out. In some schools inspections were carried out once in a year, in others more than once while there were some, where inspections may have not been conducted at all as inspection reports were not availed. Unavailability of learning facility lists could lead to MoET being unable to have a true picture of where and what type of assistance may be needed by schools.

I recommended that DEOs should ensure that inspections are carried out at least once in a year in each school as intended and

that Chief Education Officers (CEOs) use lists of prioritised schools' needs for planning and budgeting.

Management specified that non-availability of transport had severely affected inspection plans, but they had noted the matter for consideration.

17.2 PROCUREMENT PLANS

EFU did not have Procurement Plans for the three years being 2015/16, 2016/17 and 2017/18. The risk of unavailability of procurement plans could be undertaking procurement of goods and services which were not aligned to the needs identified and failure to budget realistically resulting in either over or under budgeting.

I therefore recommended that MoET should enforce development and consideration of procurement plans when drawing a budget to ensure inclusion of all sectorial needs.

Management responded that they have noted the irregularity and will take appropriate action.

17.3 ADVERTISING

Procurement Unit only utilised local newspapers to announce invitation to tender and that was attributed to shortage of funds. Non-usage of other means of advertisement might result in prospective tenderers not knowing about the advertisement, as there were more advanced channels of communication that people preferred than newspapers.

I advised EFU management to explore other cheaper medium of advertising for ease of accessibility to a wider population of tenderers. Management response was that they have noted and will comply.

17.4 SITE VISITS

The audit could not establish as to whether site visits for project site assessment were conducted for preparation of tenders, as EFU could not provide evidence of such. Without site visits, under or over costing might be experienced and result in need for variations that may extent the project beyond expected completion date and budgeted amount.

I recommended that Management should ensure that there is enough time allocated for tender preparation so that EFU could conduct site visits in order to avoid inaccurate project estimates and variations.

Management response was that adequate time will be allocated as site visits are very important for preparation of tenders and to avoid inaccurate project estimates and variations.

17.5 PROVISION FOR CONTINGENCY

To cater for procurement variation, EFU had put aside contingency of different amounts ranging from 4 percent to 10 percent of the tender price to attend to unforeseen circumstances. However, the audit discovered that there was no criterion for determining the contingency amount for each tender. Without clear criteria in determining amounts for contingencies, there was a likelihood of providing very high or low amounts than necessary.

I therefore advised EFU to set a standard in determining provision for contingency to ensure consistency in allocating such contingencies.

Management stated that they have noted and will ensure that:

- EFU puts aside contingency amount not exceeding 5 percent of the project estimate in the most difficult sites only, as the money would only be used in situation where the variation order is issued.
- Site visits are carried out as enabling means for EFU to gather enough information necessary for project estimates and help in avoiding unnecessary contingency provisions.

17.6 PROVISION OF BID SECURITY

Records revealed that there were contractors who did not provide bid securities, yet their tenders were considered for the next stage of evaluation.

Failure to pay bid security by Contractors could indicate lack of adequate resources, which would only be realised during the commencement of the work.

I encouraged EFU to ensure that all tenderers provide bid security as required or be disqualified during opening of tenders, and also that all requisite documents are properly filed in the bid submission records.

Management acknowledged that Bid security was one of mandatory requirements and that during opening of tenders, bid security amounts are announced publicly in the presence of bidders or their representatives and to encourage EFU to ensure that the bidder who did not provide bid security receives Automatic Disqualification.

17.7 BID SECURITY REFUND

It is a requirement that bid security be refunded to both successful and unsuccessful bidders after awarding of tender. However, it was discovered that there were irregularities regarding bid security refund at EFU such as absence of register for Bidders to sign during collection of refunds. Without maintaining proper financial records, there is a high risk of fraudulent activities.

I encouraged Management to ensure proper record keeping by EFU for ease of reference and safeguarding public funds as a requirement by public financial management practices.

Management's response was that they have noted the matter and will enable EFU to ensure a proper maintenance of financial records by using Letter of Release signed by Director EFU in which the name of the bidder and bid security amount shall be clearly stated. The Letter of Release together with bid security cheque shall be photocopied and filed appropriately in the files.

17.8 PAYMENT OF CONTRACTORS

Review of payment vouchers and interviews with selected contractors revealed that there were instances whereby Contractors experienced delays in getting paid, ranging from two months to one year. Late payment of contractors could lead to delay in completion of work and a financial burden to the government.

I advised Management to ensure payment of contractors is within stipulated time to ascertain timely and quality work.

Management stated that EFU would conduct regular site visits to supervise construction works and also do the evaluation of work done on sites and ensure that they process the contractors' claims in time in order to help MoET pay the contractors within the time stipulated in the contract.

17.9 MONITORING OF WORK

There were instances whereby EFU did not conduct inspections, yet claims were lodged, and payments made to contractors. The reason provided was shortage of transport and inspectors as there were two vehicles and four Inspectors to carry out this activity for the entire country. Failure to conduct inspections could pose a risk of payments for non-existing works as well as works that did not meet required quality standards.

I recommended that management should ensure that inspection schedules are maintained and adhered to for proper monitoring of work to achieve quality work and save-guard public funds from misappropriation.

Management stated that the main objective of EFU was to supervise the construction works of MoET across the country, with proper planning EFU would follow their site visit schedule to ensure that contractors adhere to specifications and drawings leading to good workmanship, quality work and value for money buildings.

17.10 DEFECTS REMEDY

It was found out that there were times where retention fee was released to the contractor before expiry of six months of defects remedy. Payments of retention fees before the expiry date posed a risk of removing the contractor's responsibilities and adherence to requirements of the contract. This could have an impact on the quality of construction works and could also pose a risk of corrupt practices.

I therefore recommended that EFU should supervise construction works as expected, carry out inspections and issue certificates within reasonable time to ensure that retention fees are refunded after defects liability period in order to avoid paying contractors for work which still has defects.

Management response was that they would ensure that after completion of works EFU comply with all requirements by visiting sites, issuing snap list report where they find defects and issuing maintenance completion certificates when defects are remedied. Only then retention fee will be released.

17.11 RE-AWARDING WORK TO CONTRACTORS

There were occasions whereby contractors did not complete the work but were awarded other contracts. The Procurement Unit attributed that to lack of database blacklisting non-performing contractors by EFU, as a result, the Unit could not know defaulting contractors. Awarding contracts to unreliable contractors or those who could not complete previous works may compromise value for money as well as risk of more uncompleted or abandoned projects.

EFU and the Procurement Unit were therefore advised to maintain a common database of suppliers and their past performance, in order to avoid awarding defaulting contractors more projects before they could be cleared.

Management specified that it was EFU's responsibility to ensure quality and timely completion of work. They further stated that they will ensure that EFU advises the procurement unit and the Tender Panel about non-performing contractors. This would be achieved by working in collaboration with procurement unit to maintain a common database of contractors/suppliers' past performance.

PART 6

AUDIT OF COVID-19 RELATED EXPENDITURE AND MANAGEMENT OF DONATIONS

CHAPTER 18: AUDIT OF COVID-19 RELATED EXPENDITURE

18.1 INTRODUCTION

The World Health Organisation (WHO) declared Coronavirus 2019 (COVID-19) a Public Health Emergency of International Concern on 30th January 2020 and as a Pandemic on 13th March 2020. The governments and government systems were under stress across the world due to the pandemic. Lesotho was not an exception to the tragedy and had to respond quickly and urgently for the prevention of the spread of the virus and protection of Basotho across the country and to support the economy and strengthen the health care systems to cope with the pandemic.

My office has already carried out an audit on Government Response to COVID-19 pandemic in relation to compliance to the existing rules and regulations, preparedness of Government for the crisis and compliance with relevant authorities in creating awareness on maintaining public health during the crisis. The results of that audit have already been communicated in the Audit Report for the year ended 31 March 2020.

The office is currently auditing COVID-19 related activities and in this chapter I am sharing preliminary audit findings on COVID-19 related expenditure.

18.1 FUNDING FOR COVID-19 RESPONSE

A variety of funding and delivery mechanisms were employed by the government to address the immediate health and economic needs arising from the pandemic. These included income support payments, grants, procurements and tax relief.

Funding of Covid-19 response was mainly financed from the following sources:

- Advances from the Contingencies Fund
- Reallocation of existing resources
- Donor funding

18.1.1 ADVANCES FROM THE CONTINGENCIES FUND

Total advances from the Contingencies Fund for COVID-19 activities amounted to M457,993,216 as presented on Table 18.1.1. The bulk share of 53 percent was support to vulnerable people; the elderly aged 60-69 years, new destitute households and the inclusion of people with disabilities. Salaries subsidy for industrial/factory

workers and businesses affected during lockdown accounted to 32% of the total release.

Table 18.2.1 - Advances from the Contingencies Fund for COVID-19 activities

Ministry	Purpose	Amount
Agriculture and Food Security	Support to agricultural production and nutrition for 2020/21 summer cropping season and support to households during COVID-19 pandemic	45,382,430
	Payment for the stock from South Africa for COVID-19 Relief	497,505
Health	Contribution of His Majesty for purchase of Ambulances	2,000,000
Trade & Industry	Three-months salaries subsidy for industrial/factory workers during lockdown.	121,612,000
	Assistance to businesses affected negatively by lockdown.	20,000,000
	Management fees for Partial Credit Guarantee Facility to cater for COVID-19 mitigation measures.	7,500,000
Prime Minister's Office	Support of vulnerable population across all ten districts as identified by Lesotho vulnerability assessment	17,550,260
Labour	Additional funds for procurement of food parcels and PPE for distribution to Basotho mineworkers and those Basotho returning to South African mines.	1,360,000
	Testing services of Basotho Mine Workers and farm workers returning to work in South Africa.	755,300
Public Service Commission	Procurement of electronic equipment to conduct virtual interviews to minimise the spread of COVID-19	154,700
Social Development	Food packages for the vulnerable people during lockdown	15,000,000
	Support to vulnerable people, the elderly aged 60-69 years, 10,000 new destitute households and the inclusion of people with disabilities	141,871,791
	Final release of implementation of COVID-19 response plan for the social protection mitigation to cater for the Child Grant Program top-ups	84,309,230
Total		457,993,216

Source: Contingencies Warrants

18.1.2 REALLOCATION OF EXISTING RESOURCES

At its special meeting of 6 July 2020, Cabinet approved reallocation of the approved budget for 2020/2021 for economic and social response to mitigate impact of COVID-19. The total approved reallocation from recurrent expenditure was M392 million and from development expenditure was M812 million. However, the consolidated financial statements reflect actual reallocations of M1.547 billion and M810 million from recurrent and development expenditures respectively.

The significant variance of M1.155 billion on recurrent expenditure was due to the fact the Cabinet had approved a reallocation of M50 million from Centralised Items Vote but the consolidated financial statements show M1.124 billion making a difference of M1.074 billion. Breakdown of reallocations is on Appendix 6.

The actual amount received by the Prime Minister's Office per warrants amounted to M728,085,971 from March 2020 to December 2021.

Spending Unit	Date of warrant	Amount
PM's Office	31 Mar. 2020	40,000,000
PM's Office	14 Aug. 2020	195,000,000
PM's Office	24 Nov. 2020	168,514,064
PM's Office	18 Feb.2021	294,571,907
Sub-total		698,085,971
DMA	22 Dec. 2021	30,000,000
Total		728,085,971

18.1.3 DONOR LOANS AND GRANTS

a) Balance of Payments Needs

The COVID-19 situation had put extreme pressure on reserves required to sustain the peg between loti and the rand per Common Monetary Area (CMA) agreement and therefore called for a need to acquire balance of payments support. The International Monetary Fund (IMF) approved the amount of USD49.1 Million for an Emergency Support to Lesotho to meet the urgent balance of payments needs stemming from the outbreak of COVID-19 pandemic.

b) Emergency Preparedness and Response Project

The World Bank made donations totalling USD11 million through Emergency Preparedness and Response Project (EPRP). The bank further granted a Loan of USD22 million for Vaccines through the same project. The EPRR had two components; COVID-19 Response and Project Management under COVID-19 response. The project procured medical equipment and distributed them to various Government and Christian Health Association of Lesotho (CHAL) hospitals.

c) Other financial contributions and pledges

There were other financial contributions and financial pledges in the amounts of M157 million and M905 million respectively as detailed in Tables 18.1.3a and 18.1.3b for procurement of various medical equipment, trainings, vaccines, screening, etc.

Table 18.1.3a - Financial Contribution by Source/Partner

Partner	Contribution (USD)	Contribution (Maloti)
Global Fund (MoF PMU)	980,630	16,141,405
Mothers to Mothers	40,887	714,706
PEPFAR_CDC_USAID (ICAP)	3,967,432	69,350,712
UNDP	540,000	9,449,280
UNICEF	415,000	7,254,200
IFAD	1,090,371	18,756,224
WHO	710,000	12,410,800
PIH	837,083	14,632,216
China Aid Consignment	274,600	4,800,000
World Vision	6,118	106,939
Total	8,862,121	153,616,482

Source: Records of the Ministry of Development Planning

Table 18.1.3b - Financial Pledges by Partner

Partner	Contribution (USD)	Contribution (Maloti)
European Union	12,719,980	220,520,630
African Development Bank	6,850,000	119,738,000
World Bank	30,000,000	524,400,000
World Health Organisation	523,320	9147633.6
United Nations Children's Fund	394,000	10,383,120
United Nations Population Fund	139,680	2,441,606
Government of Japan	938,218	16,400,056
United Nations Development Programme	107,000	1,870,360
Total	51,672,198	904,901,406

Source: Records of the Ministry of Development Planning

d) Non-Financial Contributions

There were also non-financial contributions such as Medical equipment, Testing kits, surgical masks, protective gowns, injections, sanitizers, etc. from AHF, Baylor, CHAI, EGPAF, Global Fund, ICAP, Jack Ma Foundation, Japan UNAIDS (LENPWA), UNICEF, WHO, World Bank, IOM, China Aid Consignment, IAEA, World Vision, UNDP, etc.

18.2 ACCOUNTABILITY OF COVID-19 FUNDS

The Chief Executive of the Disaster Management Authority is required by the Disaster Management Act 1997 to maintain accounts in which he should record receipts into the Disaster Management Fund and disbursements from the Fund. The Act further requires that the Auditor-General should audit the accounts of the Authority.

However, the Chief Executive has failed to prepare the financial statements relating to the activities of the Fund over the years. That has significantly compromised accountability of receipts and payments and in particular those funds earmarked for COVID-19 activities.

APPLICATION OF RESOURCES

18.3 WASTEFUL SPENDING OF PUBLIC FUNDS

The declaration of State of Emergency on COVID-19 by the Right Honourable the Prime Minister in terms of Section 8 of Disaster Management Act 1997 was a commendable move to contain the virus with a view to protect the nation, support the economy and strengthen the health care systems to cope with the pandemic.

I noticed with dismay that despite the good intention of the Right Honourable the Prime Minister, the bulk of public funds was not used on critical events or activities aimed at curbing the spread of COVID-19 pandemic negatively impacting on lives of citizens. The bulk of expenditure was mainly on food and other activities not addressing the pandemic.

18.3.1 Extreme spending on Lunch Meals

It was discovered that expenditure totalling M22,443,781.00 was incurred for provision of lunch meals for officers on duty at Convention Centre since the pandemic outbreak. The meals were for public officers who were at their duty stations and such officers

included members of the National Security Service (NSS), Lesotho Mounted Police Service (LMPS), Lesotho Defence Force (LDF), Cabinet Staff, Drivers, etc.

I could not establish the activities that were done differently during COVID-19 pandemic to attract such expenditure on meals while under normal circumstances the officers in their duty stations provide for own lunches. It was further noted that a total amount of M16,249,749.00 was spent on dry rations and lunch for LMPS and LDF officers while on COVID-19 operations. I also failed to understand the reason this expenditure was incurred on security officials, as there are dedicated expenditure votes for meals in their respective ministries when they perform the same core business of security function in the country.

The situation is quite disturbing considering the fact that most of the people in the country were without meals on the account that they were unemployed while others have lost their jobs due to the global crisis of the pandemic. This expenditure could have been incurred to buy food packages for the people in dire need and mostly on COVID-19 activities that add value to the lives of citizens.

18.3.2 Overcharged Meals

At the beginning of the COVID-19 pandemic, the National Emergency Command Centre (NECC) determined a standard price of M100.00 per meal to be used by all caterers for charging meals for both lunch and dinner.

It was however noted that some caterers charged meals prices ranging from M150.00 to M200.00 per meal in excess of set price of M100.00 agreed upon with NECC. The amount due to four suppliers totalled M279,500.00 but the invoiced amount was M416,000.00 resulting into overpayment of M136,500.00 as shown of Table 18.3.2.

Table 18.3.2 - Overcharged prices of meals

Payee	Description	No. of people	Amount due	Charge per meal	Total Amount paid	Amount overpaid
A	B	C	D= (C*M100*days)	E	F = (C*E* days)	G=(D-F)
Rhythm & Blues	Meals for people at NECC for 7 days from 6-12 Apr. 2020	175	122,500	120	147,000	(24,500)
		190	133,000	170	226,100	(93,100)
Double Joy	Meals for LMPS and NSS officers for 7 days from 30 Mar. to 5 Apr. 2020	150	15,000	180	27,000	(12,000)
Lipholo Catering	Meals for 70 PSs and NECC	70	7,000	170	11,900	(4,900)
Jaby Snack Bar	Meals and soft drinks for 10 officers cleaning Convention Centre from 19-20 Dec. 2020	10	2,000	200	4,000	(2,000)
Total			279,500		416,000	(136,500)

Source: Payment Vouchers

18.3.3 Uneconomic spending

Three (3) suppliers were selected and awarded contracts under limited competitive tendering for each to supply 14,000 fortified drinks, 14,000 biscuits and 7,000 Phuzamandla for LDF members while on COVID-19 operations.

The audit noted that the prices for some commodities were extremely different to the extent that one supplier charged a total amount of M326,900; another one M456,400 and the third one charged M658,000 as indicated on Table 18.3.3 below.

Table 18.3.3- Price variations on procured goods

Qty	Description	Morning star		Legha Enterprise		Double Joy	
		Unit Price	Total (M)	Unit Price	Total (M)	Unit Price	Total (M)
14000	Fortified Biscuits	5.50	77,000	11.00	113,400	8.10	154,000
14000	Fortified Orange drinks	3.85	53,900	9.00	126,000	8.00	119,000
7000	Phuzamandla	28.00	196,000	31.00	217,000	55.00	385,000
Total			326,900		456,400		658,000

Source: Quotations, invoices

Management was advised to strengthen the controls to ensure that procurement processes are always followed regardless of the chosen method to avoid manipulation or collusion with suppliers in the process of acquiring goods.

18.3.4 Payment of rent to Avani Maseru Hotel

Section 4 (l) of the Disaster Management Act 1997 requires that the Minister with his powers during state of disaster to request publicly owned building, vehicles and equipment on the charge of central and local government institutions needed for emergency purposes.

The National COVID-19 Secretariat (NACOSEC) occupied estimated area of 5,160 square metres, which were 60 rooms at Avani Maseru Hotel from July to October 2020 at the rate of M72.61 per square metres resulting into a monthly obligation of M374,670.00. A payment of M1,184,441.00 was made in February 2021.

Had the Minister sought alternative accommodation as required by law, Government would not have incurred such expenditure.

18.3.5 Expenditure not Mitigating COVID-19 Crisis

The expenditure dedicated to COVID-19 related activities was incurred on issues not mitigating risks associated with COVID-19. Such issues included the following:

- A total expenditure of M5,173,465.00 was incurred at the Prime Minister's Office for cleaning services. The amounts of M5,058,590.00 and M114,875.00 were paid to Mathabo Trading (Pty) Ltd and MST respectively.
- Landscaping at the Convention Centre by Mpita Landscaping & Cleaning Services for 5 months at the cost of M239,200.00.
- Settlement of Government hospitals debt to the tune of M205,268.38 incurred prior to COVID-19 pandemic with Afrox Limited from November 2016 to March 2020.

Management was advised to use funds allocated solely to COVID-19 related activities to avoid risk of misappropriation and fraud.

18.4 COVID-19 QUARANTINE FACILITIES

In the effort to curb the spread of COVID-19, the Government procured mandatory quarantine facilities to accommodate all citizens entering the country and returning residents for a minimum period of fourteen (14) days. The purpose of procuring the quarantine facilities was to prevent transmission of the disease by restricting movement of persons who were not certainly ill but believed to have been exposed to COVID-19 infection. The Prime Minister's Office and the Ministry of Health entered into agreement with the quarantine facilities.

The audit however, noted that the procurement processes were not followed in that there was no evidence that the selection was from the database of suppliers from the Prime Minister's Office, the Ministry of Health or any notice of single sourcing proceedings hence retrospective approval of majority of service providers by Tender Panel. This includes inter alia the following anomalies:

18.4.1 Quarantine Services provided without contracts and purchase orders

For suppliers to provide goods or services to Government, a supplier should receive a purchase order from a Government department. However, A.M. Nqoko Investment Property (Pty) Ltd and Khali Hotel provided quarantine services to the amount of M2,382,030.00 for 85 and 66 people respectively without request from relevant authorities. The purchase orders were issued some weeks after quarantine dates as indicated below.

Payee	Dates of quarantine	Requisition date	Purchase Order date	Amount
A.M. Nqoko Investment Property	8-25 Jan. 2021 (18 days)	9 Mar. 2021	9 Mar. 2021	1,319,430
Khali Hotel	9-23 Jan. 2021 (15 days)	12 Feb. 2021	11 Feb. 2021	1,062,600
Total				2,382,030

The audit further noted that contracts with quarantine facilities were signed after the quarantine services had already been provided as shown below:

Payee	Description	Contract Date	Amount
Mount Maluti Hotel	472 people quarantined from 15 May 2020 to -9 July 2020	20 Jul. 2020	532,000
Mohale oa Masite	Accommodation, meals and drinks for quarantined people from 14-24 Jun. 20	14 Aug. 20	168,800
Rubicon	Meals, accommodation for quarantined people from 08- 21 Jun. 2020	22 Jul. 20	232,640
Carribian	Meals, accommodation and drinks from 02 Jun. 20- 15 Jul. 2020	1 Aug. 20	672,000

Management was advised to make a follow-up on the matter and investigate further whether the quarantine services were actually rendered.

18.4.2 Breach of contract on quarantine facilities

Procurement Unit recommended and provided lists of the hotels and guesthouses that would provide quarantine facilities during COVID-19. The list showed the maximum beds to be provided and the facilities were to be paid M1,000.00 as a standard rate for accommodation which comprised M270.00 for meals (Breakfast M70.00, Dinner and Lunch charged at M100.00 per meal) and M730.00 for accommodation.

Scrutiny of records revealed that there were several incidences where numbers of quarantined people exceeded the capacity of quarantine facilities per agreement with the Government of Lesotho. Therefore overcrowding in the rooms defeated the purpose of isolation as it increased the interactions between quarantined people.

On a sample of quarantine facilities, an amount due per standard rates was M5,204,000.00 and the amount paid totalled M8,498,294.00 resulting in excess payments of M3,294,294.00 as presented on Table 18.4.2.

Table 18.4.2 - Facilities that accommodated people in excess of capacity

Supplier	No. of days	Capacity	Std. rate	Amount Due	Amount Paid	Amount Overpaid	Excess Capacity
A	B	C	D	E = B*C*D	F	G = (E-F)	H = G/(B*C)
Mountain View Hotel	14	82	1,000	1,148,000	1,979,900	(831,900)	(59)
Mountain View Hotel	14	82	1,000	1,148,000	1,660,426	(512,426)	(37)
Khali Hotel	14	29	1,000	406,000	1,062,600	(656,600)	(47)
Village Light GH	14	10	1,000	140,000	201,000	(61,000)	(4)
Village Light GH	14	10	1,000	140,000	128,040	(6,900)	1
Mount Maloti Hotel	7	80	1,000	560,000	1,197,000	(637,000)	(91)
Aloes	17	22	1,000	374,000	945,680	(574,680)	(34)
Cyaara	14	23	1,000	322,000	330,912	(8,912)	(1)
Cyaara	14	23	1,000	322,000	330,912	(8,912)	(1)
Cyaara	14	23	1,000	322,000	330,912	(8,912)	(1)
Cyaara	14	23	1,000	322,000	330,912	(8,912)	(1)
TOTAL				5,204,000	8,498,294	(3,294,294)	

Source: Payment vouchers

The root cause of overpayment might have been accommodating more than one person in a room and charging per head not per room. I recommended to Management that in future they should control overcrowding by developing clear guidelines for setting up quarantine facilities, evaluating the capacity of each facility, undertake risk assessment and putting in place monitoring tools such as daily reports to prevent transmission of the pandemic.

18.4.3 Doubtful Payments to Quarantine Facilities

Quarantine facilities' forms were designed to show the particulars of the quarantined people including the name, identity number, next of kin's name, home place, telephone number and the signature as evidence that such a person was actually admitted.

The review noted that there were cases where the quarantined people did not sign the forms. The sample of records examined revealed that payments totalling M13,021,645.00 in respect of accommodation and meals for quarantine people were effected without initialled lists of people who were actually quarantined.

I encouraged Management to ensure that payments made are duly supported by all relevant and accurate supporting documents as evidence that the payments are for services or goods provided.

18.4.3 Overpayments to quarantine centres

Payments should be processed for goods or services rendered after checking the correctness of invoices against those services or goods provided. It was noted that payments were made for overlapping dates on the invoices as in the following cases:

- Payment Voucher dated 18 November 2020 in favour of Hotel Mount Maluti issued per invoice number 10740 dated 25 July 2020 covered a period of seven (7) days from 19 July 2020 to 25 July 2020. However, on the same payment voucher, an invoice number 10751 dated 21 July 2020 covered a period from 21-27 July 2020. This means that 5 days from 21-25 July 2020 which appear on both invoices constituted an overpayment of M75,000.00 (15 people * 5 days * M1000.00).
- Joy Guesthouse submitted invoice for 18 days from 11-28 July 2020 in respect of people quarantined and was paid an amount of M150,650.00 on 12 February 2021. This payment of M150,650.00 included an amount of M126,000.00 for 18 days which was already in the payment of M223,000.00 made on 12 August 2020 for the days from 2-30 July 2020. Therefore, there was an overpayment of M126,000.00 for 18 days.

I recommended to Management to take appropriate action on the overpayment for accommodation and ensure that the responsible officer check the correctness of payment vouchers, invoices and services rendered before they are paid.

18.5 RELIEF ACTIVITIES

18.5.1 Relief activities to Businesses

In its efforts to mitigate the adverse impact of the pandemic on private sector especially on the Micro Small and Medium Enterprises sector, GoL allocated funds from Lesotho Enterprise Assistance Program under Private Sector Competitiveness and Diversification Project to provide assistance to hospitality sector businesses affected by COVID-19. The Ministry of Trade and Industry (MTI) distributed the relief funds to various businesses.

The MTI paid a total amount of M620,000.00 to thirty-one (31) beneficiaries at a rate of M20,000.00 each. Eight (8) out of thirty-one (31) were hotels and guesthouses that the Government engaged as quarantine facilities to supply accommodation and meals.

It appears that there was no coordination on management of COVID-19 relief funds between the other stakeholders such as MTI and the Ministry of Health as some of the businesses could have been excluded as beneficiaries especially those which were already engaged with the Ministry of Health to accommodate quarantined people. The following businesses benefited from MTI and MoH:

Beneficiary	Ministry of Health	Ministry of Trade
J&E Cyaara Guest House	1,576,803.50	20,000.00
Qacha's Nek Guest House	606,738.00	20,000.00
Khali Hotel	2,673,574.65	20,000.00
Aloes Lancer's Gap	81,567.00	20,000.00
Aloes Lodge	1,013,274.61	20,000.00
Ka Pitseng Guest House	1,182,136.00	20,000.00
Scenery Lodge	1,213,300.00	20,000.00
Hotel Palace	2,110,256.00	20,000.00
Total	10,457,649.76	160,000.00

It is worth-noting that these businesses were undoubtedly affected by COVID-19 as well but the Government had already extended assistance by selecting them as quarantine facilities. Therefore, these beneficiaries unjustly benefited from the relief fund.

I advised Management to ensure that in future clear guidelines are set on how each ministry should engage so that all activities performed by the ministries are adequately well coordinated and effectively managed for achievement of the ultimate goal of curbing the pandemic.

18.5.2 Subsidies to Industrial Employees

In response to COVID-19 pandemic crisis, GOL through Ministry of Trade and Industry transferred funds amounting to M121,609,000.00 to Lesotho National Development Corporation (LNDC) for administration, whereby it was supposed to transfer such funds to eighty (80) factories' bank accounts for payment of salary subsidy amounting to eight hundred maloti (M800.00) to 50,601 factory/companies workers for three (3) consecutive months.

The audit noted that there was no Memorandum of Understanding (MOU) between GOL and LNDC on how to administer the subsidy. The returns and the final report from MTI on how the funds were utilised and the proof of payment to the workers were not availed.

The internal audit report of LNDC entailed among other things the following concerns:

- The funding by GoL was inadequate to cover all listed factory workers.
- The firms provided different lists in three months for subsidy payment, therefore, Internal Audit could not reconcile and identify the cause of the discrepancies.
- Internal audit discovered that Middle Sky Trading submission differed as they claimed for 80 employees in April and 99 in May and June.
- There were shortfalls in the selection criteria employed by LNDC of not paying employees who earn salary above M5,000.00 as some firms did comply and some did not.
- GOL did not cater for administration fees for the project and there was no guidance on treatment of bank charges incurred by the firms.

I advised Management to ensure that responsible officer provide the returns showing how funds allocated were utilised for assurance of transparency and accuracy.

18.5.3 Food Parcels for Basotho living in South Africa

The impact of COVID-19 pandemic on the citizen of Lesotho living in South Africa was devastating as the country considered the welfare of its citizen. The South African government distributed food parcels and grants to its citizen. The situation became unbearable to all foreigners including Basotho people. In order to mitigate the effect of COVID-19 pandemic on its citizens, Government of Lesotho made a decision for providing virtual vouchers procured for food parcels for Basotho living in Republic of South Africa.

The Government through Ministry of Social Development (MoSD) entered into contract with Shoprite Checkers (Pty) Ltd in May 2020 for facilitation of food parcels to twelve thousand (12,000) stranded Basotho living in Republic of South Africa (RSA). An amount of M3,999,660.00 was transferred to Lesotho High Commission in Pretoria on 24 June 2020 for onward transmission to Shoprite Checkers (SA) as payment of virtual vouchers in the amount of M350.00 per person. Shoprite (SA) provided 5 percent discount which brought the amount of disbursement to M4,200,000.00.

It was established that the MoSD had no database of Basotho people living in the Republic of South Africa as a huge number of them were not documented. Therefore, it could not be verified that the list of all 12,000 people which the MoSD obtained through the International Organisation for Migration were indeed the citizens of Lesotho.

The report prepared by the MoSD states that 11,702 SMSes vouchers for food packages were delivered and 298 were rejected. The redeemed vouchers at Shortprite (SA) stores were 10,563 out of 11,702 delivered and the remaining 1,139 SMSes vouchers were not redeemed within the redemption period. An explanation provided was an assumption that the owners of the cellphone numbers had returned back to Lesotho or deleted the SMSes by mistake.

Apart from the discrepancies noted, the report showed that the amount of food packages that never reached Basotho people who were stranded in the Republic of South Africa amounted to M502,950.00 [(1,139+298)* M350.00].

I recommended that Management should follow-up the matter and recover the balance from Shoprite SA.

18.5.4 Relief funds for students studying abroad

In May 2020, the Principal Secretary of the Ministry of Development Planning requested the Principal Secretary in the Prime Minister's Office to transfer student grants funds amounting to M4,065,454.53 to 239 Basotho students who were studying in China and other countries. Two hundred and one (201) were studying in China while thirty-eight (38) were studying in other countries. The funds were supposed to be transferred to the students' individual bank accounts as provided by Ministry of Foreign Affairs and International Relations. Further directive from PS Development Planning indicated that PS in the Prime Minister's Office should pay for thirty-five (35) students that were studying in Botswana.

The following anomalies were noted;

- The list from Lesotho Embassy in Beijing, China did not indicate the bank account numbers for two students. It would therefore have not been possible to transfer money to their accounts. Also, there were three cases whereby the student name differed from account holder's name.
- Out of 201 students' names provided by the Embassy, 118 students provided their Lesotho bank account numbers and that made it difficult to ascertain whether they were still in foreign countries continuing with their studies or not.
- The requirements for a student to be paid stipend were confirmation from the University, study permit, bank confirmation and Lesotho passport. It was found out that only fourteen (14) students studying in Botswana had University confirmations attached to the respective payment vouchers. That raised a doubt as to whether the other students remaining were actually studying or not.

- The stipends for students studying in Botswana were paid in February 2021 yet they were for the months of April, May and June 2020. That means they were paid eight months after the scheduled time as the directive was made in May 2020 and never served the purpose for which these students' grants were intended.
- In the absence of the required information it is probable that the funds may be transferred to the wrong beneficiaries. Management was encouraged to obtain the bank confirmations and proof of transfers to respective students from the bank and reconcile the payments with the student list.

18.6 ANOMALIES IN THE PROCUREMENT PROCESS

18.6.1 Inappropriate Evaluation Criteria

The Procurement Unit in the Ministry of Health requested quotations for the supply and delivery of COVID-19 supplies. The requests to quote stipulated the mandatory requirements for the companies to qualify for the supply of goods/services and amongst the selection criteria was the experience of the company.

In principle, where experience is one of the selection criteria the unit must do a two-stage evaluation where companies are first evaluated on experience and only those that have the appropriate or needed experience will be considered for financial evaluation.

Scrutiny of records revealed the following:

- The evaluation did not include the experience of the company as one of the evaluation criteria and there was no technical evaluation, which could have considered the experience of the company. The evaluation scores were based on the price only.
- The requests for quotations required that both technical and financial proposal be submitted in one envelope instead of two separate envelopes.

Therefore tenders totalling M67,754,446.00 were irregularly approved by the Tender Panel.

I advised Management to ensure that procurement procedures and processes as stipulated in Public Procurement Regulations 2007 are strictly adhered to avoid the risk of awarding contracts to un-deserving suppliers.

18.6.2 Irregular engagement for transport services

Section 8 (1) (c) of the Public Procurement Regulations 2007 stipulates that the procurement units should seek approval from the Tender Panel to employ direct or sole source contracting procedures where required goods, works and services are proprietary and obtainable from only one source. Section 8 (3) of the same regulations further requires that for single sourcing method, the procurement unit should request submission of a quotation and might negotiate the sole trader. Furthermore, Sub-section 5 of the regulations requires that the recommended award should be submitted for approval to the Tender Panel.

The Disaster Management Authority did not comply with the above stated legal requirements when they engaged Mashapha Transport to transport COVID-19 suspects from all borders across the country to quarantine facilities in 2020 at the cost of M1,053,509. The following anomalies were noted on this engagement:

- There was no approval of the Tender Panel for this method of engagement and contrary to the requirement that sole source contracting procedures should be applied where required goods, works and services are proprietary and obtainable from only one source, Mashapha Transport was engaged though they were not the only supplier of transport in the country.
- Quotations were not sought from at least three suppliers and the evaluation process was not done to ensure economic spending of public funds instead Mashapha Transport was the only provider the Unit showed interest on during COVID-19, which portrayed biased monopoly.
- There was no contract signed for engagement of this supplier and the supplier was found to have irregularly raised invoices for services that were not ordered. That was revealed by the fact that the dates of the Purchase Orders came after the dates of the invoices.

The audit also established even though the Minister of Finance issued a retrospective approval of waiver for payment of Mashapha Transport, a recommendation was made to management to take action upon the officer/s involved in engagement of Mashapha Transport without following procurement procedures.

18.6.3 Purchases from suppliers with questionable licences

Ministry of Trade and Industry issues various licences to suppliers to serve distinctive purposes applied for. These licenses allow the suppliers to supply commodities authorised by the license.

On the contrary, the Ministry of Health contracted suppliers to provide goods and installation services to the tune of M7,390,278.00 despite the fact that the nature of the businesses of these suppliers as categorised in their licences were not in conformity with required supplies. It could not be established as to why the Ministry did not purchase medical consumables from NDSO as required by law but rather opted for unauthorised suppliers.

Table 18.6.3 shows the details of irregular purchases of medical commodities and services.

Table 18.6.3 - Commodities supplied by Unlicensed Suppliers

Supplier's Name	Nature of Business/Traders Licence	Details of engagement	Amount
Bokamoso Medical Aid	Specialised dealer in Co Administration of Medical Schemes	Supply and deliver 100*2L fog liquid for fumigation at MoH.	711,201
Ms Broker	Specialised dealer in office equipment and other office consumables.	Supply, delivery, and installation of medical (Oxygen) equipment to MoH.	1,316,776
		Provision of 250 Oxygen gauges & 100-gauge pin index	1,566,659
Frasers Lesotho	Wholesaler	Supply, delivery, and installation of medical equipment	2,509,990
Oasis Business Suppliers	Specialised dealer in office furniture	Supply and delivery of Bed and Mattress	1,285,652
Total			7,390,278

Source: Payment Vouchers

Management was advised to consider the nature of the business when engaging a supplier to avoid the risk of receiving poor quality of goods and fraudulent activities.

18.6.4 Procurement of medical consumables without requisite approval of NDSO

Section 2 of the Finance Notice, 2007 mandates the National Drug Service Organisation (NDSO) to procure, store, and distribute Medicines, Medical Supplies and other medical consumables to the health institutions and other charitable organisations in Lesotho. Section 10 (2) of the same Notice further requires that in cases where such products and are not obtainable from NDSO, an approval to buy the medical supplies elsewhere should be sought from NDSO.

The scrutiny of records revealed that medical supplies, listed on Table 18.6.4 to the tune of M17,360,955.00 were purchased without requisite approval of NDSO.

Furthermore, the audit could not substantiate the accuracy of the payments totalling M17,306,930.00 to Engcobo Pharmacy and Team Trading Enterprise as the quantities and unit prices were not reflected in the source documents.

Table 18.6.4 - Medical consumables procured without NDSO Approval

Supplier name	Dealership	Description	Qty	Unit price	Total
ENGCOBO PHARMACY	-	Supply of PPE: Face masks	-	-	14,785,430
TEAM TRADING ENTERPRISE	Medical equipment & Laboratory	Supply of PPE: Disposable gown	-	-	2,521,500
MST	Cleaning Service	Surgical masks	83	135.00	11,205
		N95 masks	8	1,040.00	8,320
		Non-breather masks	50	120.00	<u>6,000</u>
					25,525.
AFFAIRTON	Cleaning services.	Surgical Masks	300	95.00	28,500
Total					17,360,955

Source: Quotations, Orders, Payment vouchers

18.6.5 Contracts Awarded to unregistered Suppliers

a) Unregistered Caterers

According to Section 15 (1) of the Accommodation, Catering and Tourism Enterprise Act of 1997, no person should operate an accommodation, a catering or tourism enterprise unless the person has obtained a valid license from the Board.

This requirement was not adhered to as eight (8) suppliers provided accommodation and catering services to the tune of M1,012,270.00 on COVID-19 operations without licenses from the Board. The licenses attached to the payment vouchers were snack bar licenses obtained from the Ministry of Trade and Industry.

b) Expired Trader's Licence

According to Section 16 (1) (c) of Procurement Regulations of 2007, a business not fulfilling its tax, levy fees and other liabilities pursuant to the legislation of Lesotho or the country of establishment of tender's business operations is regarded as unsatisfying the general conditions for prequalification.

Despite the above stated requirements Ntsubise General Dealer's license expired on 4th February 2020 but a purchase order for supply of goods worth M187,000.00 was issued on 2nd April 2020, approximately 2 months after expiration of the license.

18.6.6 Invoices received before issuance of purchase orders

Government procurement procedures require that purchase order should be placed to the supplier and the supplier is required to issue an invoice after supplying goods or services. It was observed that there were cases whereby dates of invoices came before dates of purchase orders indicating that the suppliers provided the goods or services without being formally requested to do so through the Purchase Order.

- Invoices to the tune of M4,774,981.00 for catering services were raised before receiving purchase orders; and goods totalling M2,459,369.00 were delivered before receiving purchase orders.
- There were instances where goods and services were delivered before approval of the Tender Panel.

The audit concluded that the purchase orders were prepared as a formality just to facilitate payments thus the possibility of awarding contracts to unqualified suppliers without following proper procurement regulations. If this practice continues, it might lead to situations where officers might collude with suppliers to defraud public resources.

I recommended that investigations should be carried out to establish the irregular engagement of suppliers and payments of goods and services not ordered.

18.6.7 Breach of contracts

a) Breach of contract on specifications

The procurement procedures require that any deviations from the specifications of the ordered goods, works and services is a breach of contract and should not be accepted on delivery.

The Procurement Unit in the Prime Minister's Office engaged Anway Rite Value Distribution & Wholesalers to provide 3 desktop computers and 27 laptops for districts and NECC Operation coordination respectively at a total value of M336,930.00. The details of specifications included among others, the Intel processors i5 6th Gen or Higher for laptops.

It was discovered from the records that upon receipt of the equipment, the Director-General ICT informed the Tender Panel Chairperson that the specifications of the supplied laptops deviated from the ones ordered as the supplier procured AMD r3 processors instead of the one stipulated in the order. Despite the concerns of the Director-General that the supplier having degraded the processors, the price should have been lower, a payment was made to Anway Rite Value Distribution & Wholesalers.

b) Breach of contract on dates of delivery

The contract signed between the Ministry of Health and New Horizon Surgical & Medical Supplies stipulated that deliveries should be done in accordance with the delivery schedules agreed with the purchaser, and the delivery period should be 21 days after receiving the letter of credit.

The contract was signed on 21st April 2020 for supply, delivery, and installation of medical equipment to the Ministry’s hospitals. The delivery schedule stated that the supplies should be delivered within 3 weeks after signing a contract while the Letter of Credit was signed on 3rd July 2020. The supplies were therefore supposed to have been delivered end of July 2020.

Contrary to the above, the supplies to the tune of M1,861,622.00 were delivered in batches in August, September and October 2020 which was after the schedule period and that constituted a breach of contract.

I advised Management to check credibility of suppliers before awarding contracts.

18.7 HUMAN RESOURCE ISSUES

18.7.1 Staff compliment of NACOSEC

In my last year’s report, I pointed out that the number of filled and vacant positions at NACOSEC could not be established, as staff compliment was not provided. After that audit, NACOSEC produced a staff compliment of 159 officers, comprising 115 Technical staff, 39 Drivers and 5 Office Assistants. However, the salary structure did not indicate number of positions under each category. Consequently the positions were filled with more than one person and there were also 40 filled positions listed below which did not appear in the salary structure.

Position	Number
Head Legal	1
Financial Management & Procurement	8
Human Resource	5
Information Technology	7
Communication & Publicity	9
Stakeholder Management	6
Economic & Social Impact	4
Total	40

18.7.2 Payment of allowances to public servants

According to a Memo of the Chief Executive Officer of NACOSEC dated 19th April 2021, the Cabinet Task Force on COVID-19 had granted authority to the CEO of DMA to pay allowances to public servants who were not assigned to NACOSEC but daily perform COVID-19 activities. The authority referred to public servants working in Accounts, Procurement, Human resources and Legal Department that perform COVID-19 functions as the direct recruited staff could not perform some functions as they were restricted by government procedures. CEO further indicated that it was resolved that they should be paid same allowances as the other public servants assigned to NACOSEC.

Allowances totalling M2,741,596.00 were duly paid to public servants redeployed at NACOSEC and those working from their ministries. However, the following audit concerns emerged:

- A copy of directive from Cabinet or Minutes granting approval of the allowances was not availed for audit verification.
- The Public Officers redeployed and those working from their respective ministries were given allowances ranging from M2,000.00 to M30,000.00 instead of Honorarium which should not exceed M5,000.00 payable once as per Government Policy.

18.7.3 Payment of Risk Allowance

a) Risk Allowances paid to CHAL Health Workers and Support Staff

In a meeting held between Health Professionals Association (HPA) representatives and Cabinet on 23rd July 2020, it was agreed that Health Care Workers and Support Staff be given risk allowances classified in the three categories as follows:

Category	Description	Number of staff	Rate (Maloti)
1	All workers that work in two Covid-19 isolation centres thereby taking care of confirmed cases, ambulance drivers who transport confirmed cases to centres and Lab personnel at NRL who conduct tests on swabs from Covid-19 suspects	233	3,500

2	Healthcare workers who work in non Covid-19 health facilities and work in direct contact with patients	3,155	3,000
3	Healthcare workers and support staff who work in non Covid-19 isolation Centres and do not work in direct contact with patients. This includes Pharmacists, Social Workers, Environmental and Administration	-	2,000

It was discovered that the lists of workers entitled to risk allowances stipulated neither their designation nor the health facility where they were located. Those lists were doubtful whether they were indeed from the health facilities as they were typed in Excel sheets with neither facility letterhead nor date stamp. The audit could not also determine whether the category used was in favour of the persons entitled for risk allowances.

It was further established that the total risk allowances paid to Health Care Workers and support staff amounted to M96,144,112.00 against the budgeted amount of M80,000,000.00 thus resulting into over-expenditure of M16,144,112.00 or 20%.

In the absence of letterheads or date stamps, workers entitled to risk allowance could not be verified and ineligible Health Workers could have been paid risk allowances hence overpayment of M16 million.

18.8 COMPLIANCE WITH TAX LAWS

18.8.1 Inconsistencies in deduction of Source/Withholding Tax

Section 15 of the Income Tax Act 1993 states that for services provided to the amount of M3,000.00 or more, source tax should be deducted at the rate of 5 percent from local companies and 10 percent from foreign companies respectively.

Contrary to the above, inconsistencies were observed for a number of procurement activities under subsistence allowance vote in respect of the caterers engaged by the NECC where 5 percent source tax was withheld and remitted to Lesotho Revenue Authority

(LRA) on some payments and neither deductions nor remittance made to LRA on other payments. Source tax not deducted amounted to M4,458,500.

18.8.2 Non remittance of PAYE to the Lesotho Revenue Authority

The Income Tax Act of 1993 requires that tax be imposed upon all persons earning income being individuals, partnerships, companies or other taxable entities. PAYE is tax charged by employer from the employee's earnings and remitted to Lesotho Revenue Authority (LRA).

It was discovered that PAYE totalling M3,682,966.14 withheld from salaries and allowances of NACOSEC staff, redeployed civil servants and civil servants working from their ministries was not remitted to LRA.

It was further established that out of PAYE totalling M2,978,614.63 withheld from temporary health workers' wages only M705,790.86 was remitted to LRA leaving a balance of M2,272,823.77.

18.9 PHYSICAL VERIFICATION OF MEDICAL EQUIPMENT

The Government of Lesotho and the World Bank entered into an agreement under the Lesotho COVID-19 Emergency Preparedness and Response Project (LC-19EPRP) where the bank provided a grant of USD7.5 million to procure medical equipment to various Government and Christian Health Association of Lesotho (CHAL) hospitals. The donor procured the equipment directly from the reputable suppliers outside the country. Upon arrival, the Procurement Unit of the Ministry of Health distributed medical equipment to all designated hospitals.

My office accompanied by the officer from the Ministry of Health made a follow-up to physically verify the existence and the condition of medical equipment and accessories delivered by the Ministry to the hospitals. It was noted that all medical equipment was duly received by the designated hospitals, however maintenance of fixed assets register appeared to be a general challenge as indicated below:

a) Maluti Hospital

The equipment was physically verified and the hospital maintains a fixed assets register. However, it was observed that some of the medical equipment was not recorded in the fixed asset register.

b) Berea Hospital

All the medical equipment was not recorded in the asset register. The audit team was informed that there were missing medical equipment at Berea Hospital and the matter has been reported to the Police on the 21 September 2021 per RCI No. 77/02/2021.

Missing equipment included:

- 1 x Electrocardiograph MAC 2000
- 2 x Physiologic Monitoring System (B125) (M73,935.51 each)
- 2 x Ultrasound Scanner Versana Active

Machines not functioning:

- 1 x Mobile X-ray
- 1 x Carescape V100 Vital Signs
- 2 x Phillips Everflow Concentrator 5m Cannula and Humidifier bottle

Machines in Berea Hospital from Mafeteng Hospital:

- x Airvo 2 Plus Humidified system

c) Motebang Hospital

All the medical equipment was not recorded in the inventory/assets register.

Missing machines and accessories:

- 2 x Phillips Everflow Concentrator 5m Cannula and Humidifier bottle

d) Scott Hospital

All the medical equipment was not recorded in the assets register.

e) Mafeteng Hospital

Machines transferred from Mafeteng Hospital:

- 3 x Airvo 2 Plus Humidified system transferred to Berea Hospital. However, there was no Transfer Note/Voucher of machines to Berea.

Machines not verified

- 2 x Ultrasound Scanner Versana Active. The auditors could not physically verify their existence as the doctors' offices in the Female and Male Wards were locked.

Management was encouraged to ensure that the District Medical Officers record all the medical equipment in the hospital assets register in order to prevent and detect fraud, track the value and the location of the asset.

18.10 IRREGULARITIES ON REFUELLING OF VEHICLES

As a control measure, GOL-IFMS system is used to monitor refuelling and consumption of vehicles. The system is linked to the billing system used by Engen Company.

The following irregularities were observed in relation to refuelling of vehicles engaged for COVID-19 related activities:

- Forty-eight (48) vehicles were not in the database for vehicles engaged on COVID-19 related activities. These vehicles consumed 16,581.20 litres costing M115,755.60 of petrol for the months of April and May 2020.
- Fuel and Lubricants were supplied to vehicles that did not have registration numbers.
- There were instances where vehicles were refuelled more than once in a day. In some of the cases the time intervals between refuelling were very short and/or the distances covered were too short. It also appeared that the recorded readings from the odometer were not accurate, as the differences did not make sense. Table 18.10 bears details.

Table 18.10 – Refuelling of vehicles

Date	Reg. No	First Fuelling				Second Fuelling				Differences and total litres of fuel consumed		
		Driver	Time	Litres	Odometer	Driver	Time	Litres	Odometer	Time Differ.	Total Litres	Odometer Difference

18.11 ACCOUNTABILITY OF COVID-19 FUNDS BY SPENDING UNITS

The ministries/spending units in their individual financial statements have accounted for total receipts of M550 million and total payments of M346 million on COVID-19 related activities.

Funds received were from the following sources:

Source	Amount
Government Funding	317,407,940
Grants	120,517,038
Donations	192,000
Other Assistance	112,328,029
Total	550,445,007

Those funds were applied on the following activities:

Activity	Amount
Compensation of Employees	118,151
Goods and Services	112,418,134
Acquisition of non-financial assets	10,561,854
Other Expenses	223,067,285
Total	346,165,424

CHAPTER 19: MANAGEMENT OF DONATIONS

My office also carried out audit of management of donations which focused on the extent to which the Ministry of Health and the National Emergency Command Centre (NECC) received and distributed COVID-19 related donations to the people mostly affected by the pandemic, at the right time and in appropriate quantities. The audit covered the period from March to August 2020.

19.1 RECEIPT AND DISTRIBUTION OF DONATIONS

The National Drug Service Organisation (NDSO) is mandated to distribute health commodities to hospitals and health centres in the country. NDSO also delivers to the District Health Management Teams (DHMTs) commodities for privately owned clinics, Non-governmental Organisations (NGOs) and clinical implementing partners. Health facilities and DHMTs then issue the health commodities to end users such as patients, community outreach programmes, Community Health Workers (CHWs) and health posts, packed as needed.

Donations were received through NECC and Ministry of Health from local business people, international organisations and development partners; and distributed to various people and sectors where there was need. The donations were stored at NECC, National Drug Service Organisation (NDSO) and Makoanyane Military Barracks.

Initially, the Logistics Cluster distributed donations as they received them, to all frontline workers as determined by NECC. A decision was made later on to forward all donations to NDSO to be distributed the same way they distribute health supplies. The criterion used for distribution of the received donations was the one already developed by the Ministry of Health.

AUDIT FINDINGS

19.3.1 RECEIPT AND STORAGE OF DONATIONS

Since COVID-19 declaration of state of emergency, donations of PPE and other COVID-19 related supplies were received from donors both locally and internationally. NECC and the Ministry of Health through Supply Chain Management (SCM) received the donations. All donations received by SCM and NECC were recorded and kept in a storage at 'Manthabiseng Convention Centre. Later on donations

were moved to NDSO to be stored and distributed together with other medical supplies.

Due to the unexpected arrival of COVID-19 pandemic and closure of Parliament during the peak period, the Government of Lesotho could not re-prioritise its budget timely towards COVID-19 response hence various commodities received in the form of donations served as the major source of medical supplies for the entire country.

a) Timely arrival of donations

It was noted that NECC and the Ministry of Health started receiving donations as early as the time COVID-19 was declared a pandemic and they played a vital role in combating the spread of infections. Interviews with health providers and security agencies revealed that during the early days of the pandemic, donations reached frontline responders on time; which brought a positive impact as they arrived at a critical time when there was shortage of medical supplies and PPE.

b) Identification of recipients

There was no particular criteria used to identify beneficiaries and all frontline workers were regarded as recipients of the donations. There was neither need assessment done nor requests made for any particular item to be distributed. When allocation and distribution of donations were made, the agencies that were identified as frontline responders in the response to COVID-19 were marked as priority. These included health sector facilities, Security services and all institutions providing services at the border posts. Apart from those agencies identified by NECC, some institutions kept approaching NECC for assistance with PPE and were all considered.

There were also in some cases where donors, especially local business owners gave donations to beneficiaries of their choice even without any consultation with NECC. An example was in Mafeteng where the government hospital received washing powder that they could not use because it did not have the strength to clean the hospital's soiled linen.

19.3.2 DISTRIBUTION TO INSTITUTIONS

NECC distributed earlier consignments received during the peak of the pandemic by itself with help from MOH SCM without any involvement of NDSO. This was attributed to the urgent need to distribute PPE to relevant end users soonest so that the then prevailing situation could be normalised as quickly as possible. NECC officers using the government vehicles that were assigned to NECC distributed the consignments.

The audit further revealed from NDSO that it was risky for NECC to have distributed the items without assistance from them, as storage and transportation of certain medical commodities required specialised handling and care. For example, hand sanitizers needed to be transported and kept in low defined temperatures, while surgical masks needed to be kept in a dry place and that all PPE generally needed not be exposed to potentially damaging conditions.

This could have led to distributed items being exposed to unfavourable conditions resulting in sub-standard PPE being distributed to end users. The spontaneous and/or impulsive distribution could have also caused other health facilities to have excess PPE, while others experienced shortages.

Scrutiny of records revealed that there were very few damaged items identified upon receipt but that the damages were only on the packaging and items were untouched. The items were still good for use and were included in the distribution lists.

a) Uneven Distribution

The team established through interviews the Scrutiny of records revealed that there were very few damaged items identified upon receipt but that the damages were only on the packaging and items were untouched. The items were still good for use and were included in the distribution lists. at there was no particular criterion used by NECC when distributing donations. The type and quantities of items distributed were determined by NECC without prior consultation with the recipients. It was therefore found out that there were some recipients who needed more than what was allocated to them, while others were given more than they required. For example, in March 2020 NECC received 10,908 units of household jik from Global Fund for distribution to frontline workers. It was established that District Emergency

Command Centres (DECCs) were allocated more household Jik (466 bottles each) than any other institution, and differing quantities for other recipients as randomly decided by NECC; whereas some of these institutions were more vital in the fight against COVID-19. A consolidated report of the Lesotho mounted Police (LMPS) revealed that LMPS was allocated only 602 bottles for all police posts in the country.

Consequentially, at the time of the audit, there was unused household Jik in some of the DECC offices, whilst the team discovered that some institutions had in fact encountered shortages. LCS Mohale's Hoek reported to have experienced shortages as they received 50 bottles that were shared between inmates and officials, whereas Mohale's Hoek DECC had received 466 x 750ml of household Jik.

However, on 27th October 2020 when the audit team visited the District Health Management Team (DHMT), there were 385 bottles of unused household Jik still packed in boxes at the offices.

b) Shortage of supplies at hospitals

According to interviews conducted at Ntšekhe, Motebang and Mafeteng Isolation Centres, it was revealed that initially the understanding was that donations received would be mainly for isolation centres. However, as there were still day to day activities going on at the respective hospitals and health centres, there was increased demand for PPE but there were no medical supplies being distributed due to procurement constraints. Donated supplies were therefore shared between hospital wards and the isolation centres. For instance, at Ntsékhe hospital it was revealed that, during the pandemic, the ordinary hospital wards had in fact experienced more infections than their isolation ward counterparts, hence more PPE had to be allocated to the wards. This could have led to shortage of supplies in isolation centres had there been a change in the outcome of events.

c) Unclear allocation of Cellular phones

On 13th May 2020, the Minister of Health accepted a donation of one thousand (1000) cellular phones donated by Vodacom Lesotho. During the same event, Vodacom Lesotho further pledged to donate 5G data and 120 calling minutes per month for three months per person, for six thousand health professionals. The Minister urged those who would be distributing the phones to target amongst others, frontline health professionals placed in different places countrywide and officers placed at different borders in the country. He said that would enable them to quickly communicate especially when people continued to cross into the country using illegal entry points. The models and number of the received cellular phones are as follows:

Model	Quantity received
Mobicel	640
Hauwei	250
Samsung A260F	6
Samsung A2	103
Total	999

The audit established that NECC decided that Ministry of Health be given all the cellular phones to distribute. The cellular phones were given to the then Deputy Principal Secretary for Health. Scrutiny of records provided by the Ministry of Health revealed the following discrepancies:

- Though it was mentioned during handover of the cellular phones and NECC report that the phones were 1000, records revealed 999 phones received, already short of one phone.
- There was a list of 732 people and their institutions to be allocated cellular phones. Two hundred and seventy-six (276) allocations were to be made to Government, CHAL and Private Health facilities in the ten districts while 456 were to be allocated to individuals, border posts and pharmacies.
- Of the 276 cellular phones for health facilities, 82 were allocated to the Maseru District Health Facilities and (seventy) 70 were signed for while it was not clear what happened to the twelve (12) that were not signed for.

- Also, out of the 456, records showed that only 11 cellular phones had been signed for, whereby six individuals signed for one each, one person signed for three while another from DHMT Leribe signed for two.
- Interviews with health workers in the districts visited revealed that the phones came with once off M300 airtime and some without any airtime.

My audit could not validate the allocation of 639 cellular phones from the list of 732 and furthermore, the whereabouts of the remaining 267 from 999 phones could not be determined due to absence of information.

d) Delay in distribution of some items

During the COVID-19 peak period some government agencies and essential services outside the health sector also turned to NECC seeking access to PPE, hence there was an increase in demand for PPE. Timely distribution of donations was critical for frontline healthcare workers and the other agencies supporting Basotho who needed critical care. Although shortages of supplies had been reported countrywide, there were undistributed supplies noted during a handover exercise to NACOSEC by NECC as presented on Table 19.3.2.

Table 19.3.2 - Un-distributed donations as at 30 June 2020

Donor	Item	Quantity received	Date received	Outstanding balance as at 30 Jun. 2020	Time kept in storage
Vertigo Supply	Mobile testing booth	20	10 Apr. 2020	6	12 Weeks
"	Mobile testing gazebo wall	2	10 Apr. 2020	20	12 weeks
"	Testing kits	2000	10 Apr. 2020	2000	12 weeks
"	Nitrile gloves	800	15 Apr. 2020	800	11 weeks
"	Safety goggles	36	15 Apr. 2020	36	11 weeks
Maluti Mountain Brewery	Hand sanitizers (100ml)	700	31 Mar. 2020	207	13 weeks
Limkokwing University	Surgical masks	9900	10 Jun. 2020	8000	3 weeks

Source: NECC handing over document compiled for incoming CEO

It was further established during the audit that the above items had since been distributed to various facilities across the country. However, late distribution of items that could have still been required by some frontline workers was not necessary.

19.3.3 INSTITUTIONAL RECEIPT AND STORAGE OF DONATIONS

Donations from NECC were received through delivery notes, recorded in waybills and distributed to end-users through stock movement cards. In all three DHMTs visited, the team established through sampled transactions that the procedure for receipt, recording and disbursement of donated items was followed accordingly. However, DHMTs appreciated that during the pandemic in order to coordinate distribution activities and ensure transparency they had to introduce additional measures. For example, in Mafeteng, the District Head Pharmacist introduced a ledger in which all ward attendants would sign for all PPE received. This was after realising that at the beginning of their shifts, nurses requested PPE without reconciling with their fellow colleagues, hence there was unaccounted for PPE in between shifts.

However, the team learnt through interviews with SCM Personnel that at health facilities, storage space remained a challenge. This resulted in some health facilities PPE being put in corridors or wherever there was space including at passageways where the temperature was not controlled and there was no guaranteed dryness. PPE donations could have been received with no recorded damages but may have reached end users in unacceptable conditions.

The audit team further learnt that safety of allocated items at some Health Facilities was compromised due to absence of relevant personnel to receive and safely store medical items. It was during this period that some donated items could not be accounted for. For example, at the Lepereng Health Facility (National Laboratories) in Maseru there was theft of donated PPE by the Cleaner and a Driver. A matter was reported to the Police and legal action was taken against such staff. That was one of the reasons that led the Minister of Health requesting the Lesotho Defence Force to receive and safely store the second consignment of donations from Jack ma Foundation before they were forwarded to NDSO for distribution.

19.3.4 AUDIT CONCLUSIONS AND RECOMMENDATIONS

My conclusion is that NECC and the Ministry of Health did not fully receive and distribute COVID-19 donations in the most efficient and effective manner due to the following anomalies observed:

- The control measures put in place were not always observed;
- There was no proper way of prioritising people mostly affected by the pandemic and their individual needs;
- Though identified recipients received the donations in time, the quantities delivered were not based on any standard or need; and
- Transportation and storage facilities were not well organised and posed a risk of theft and damage to the donations.

There is always a need for transparency and accountability vested upon public officers even in times of crisis and emergencies. In order to improve performance of the Government during the pandemic and for future similar circumstances, I made the following recommendations to tighten controls to prevent recurrence in future and minimize chances for wastage:

- Put in appropriate control measures to mitigate fraud risks especially during times of emergencies.
- Strengthen monitoring systems in all places where public funds and commodities are managed.
- Ensure that donations just like other government property are recorded correctly and stored properly.
- There should be compulsory reporting of usage of donations by recipients.
- Management and usage of received donations should be recorded and reported.
- Distribution of donations should be organised in an effective manner either directly to recipients or through appropriate distribution channels to ensure that donations would not be diverted to ineligible recipients.

PART 7

CORPORATE ISSUES OF THE OFFICE OF THE AUDITOR-GENERAL

CHAPTER 20: CORPORATE ISSUES OF THE OFFICE OF THE AUDITOR-GENERAL

19.1 INTRODUCTION

The Office of the Auditor-General (OAG), as the Supreme Audit Institution (SAI) in Lesotho, contributes to the efficiency, accountability, effectiveness, and transparency of public administration. The OAG oversight role bestowed through/in the Constitution of Lesotho requires the office to audit and provide information, advice and opinion on the Ministries, Departments and Agencies (MDAs) stewardship on public funds. The audits results assist government in improving performance in terms of financial management, application of laws and regulations, efficiency and effectiveness, fraud, corruption and accountability. These good governance elements are essential in creating a conducive environment for investment in economic and social development, which are critical in improving the livelihoods and wellbeing of the citizens.

The protracted effects of COVID-19 hit hard on public health, the economy, government systems, public and private sector and the citizens at large. This impacted negatively on the survival and coping mechanism on the livelihoods of the citizens.

Although OAG was not spared, it was imperative that it repositioned itself to respond to diverse accountability demands in order to be relevant and add value. This was achieved by strengthening its approach to audit, considering the prevailing COVID-19 atmosphere, coupled with resource limitation. The audit results presented in the preceding chapters attest to OAG tireless efforts to audit amidst the COVID-19 challenges, in pursuit of accountability for greater revenue mobilisation, sound public expenditure and effective service delivery within spending units.

19.2 LEGAL MANDATE

The Constitution of Lesotho and the Audit Act 2016 govern OAG. These legal frameworks require the Auditor-General to audit and report on the public accounts of the Government of Lesotho as well as all accounts relating to the Consolidated Fund public property and stores, in order to provide an overall opinion on the accounts. This is accomplished by the OAG conducting audits to determine whether:

- a) The public accounts of Lesotho present fairly the finances of the Government and the individual public bodies to which they refer.
- b) The financial transactions of the Government and public bodies comply with relevant legislation, the authority of Parliament and regulations issued by any relevant competent body.
- c) The financial affairs of the Government and public bodies have been managed with due regard to probity, and that their statutory and ethical duties to Parliament and the public have been met in an open and even-handed manner.
- d) Government ministries, departments and agencies carry out activities with due regard to economy, efficiency and effectiveness.

19.3 OAG BUSINESS MODEL

Our business model is built on the idea that excellence can be attained by leading and operating the office in a manner that ensures that human resources, processes, structure, and procedures are all in sync to produce high-quality products and services. The approach recognises the importance of creating excellent relationships with clients and stakeholders for audit impact and meeting their demands and expectations. The model requires putting in place continuous measures for performance improvement.

The model is aligned to the African Organisation of English-Speaking Supreme Audit Institutions (AFROSAI-E) Institutional Capacity Building Framework (ICBF), with its five development perspectives namely; Independence and legal framework; Organisational management and governance; Auditing standards and methodology; Human resource; and Communication and stakeholder management.

Performing against the framework's development perspectives ensures that the office follow good audit practice, as the framework serves as a yardstick for capacity development, performance improvement, and quality measurement.

19.4 STRATEGIC DIRECTION

In carrying out its legal responsibility, OAG established a strategic direction encapsulated in a five year strategic Plan 2019/20- 2023/24 that has identified a desired future and laid out a path to get there. The strategic direction encompasses the mission, vision and core values as follows:

Mission

To promote accountability, transparency and value for money in the use of public funds by providing quality audit services in order to improve the economic, efficient and effective service delivery to the citizens of Lesotho.

Vision

Spending units are accountable, transparent and deliver economic, efficient and effective services by 2025.

Core values

- Transparency and Accountability,
- Respect,
- Independence and
- Professionalism.

19.5 STRATEGIC FOCUS

In ensuring that a sustainable public accountability and transparency is achieved, OAG identified the following strategic focus areas implementable over a five-year period through annual operational plan:

- Capacity Building to ensure efficiency and increased audit coverage
- Sound legal framework to strengthen OAG independence
- Adopt a sound financial management to ensure accountability and transparency
- Deliver quality services and products in order to promote accountability and transparency of MDAs

The operational plan laid out the audit, support, and development objectives, which are then translated into annual activities. These were prioritised based on a risk analysis that enables the office to determine annual activities so as to focus resources on high-risk audits and other priority activities. The national priorities were also considered in determining annual activities to ensure that audits are relevant to the government priorities and stakeholders' expectations. Risk-mitigation measures were applied to facilitate the achievement of activities and objectives.

19.6 ORGANISATION OF WORK

The OAG has organised work into Audit and Support functions to assure the achievement of strategic goals and missions, as well as the fulfilment of its mandate, in order to promote accountability, transparency, and integrity of MDAs. The audit function is divided into three types of audits namely; Financial, Compliance and Performance Audits, and these were all performed in different MDAs during the year.

The audits were carried in line with the International Standards of Supreme Audit Institutions (ISSAIs), which guided the audit process. Adopting these standards provides assurance that audits are of good quality and follow good international audit practice.

19.6.1 Audit Function

- a) In financial audit the office performed independent examination of the accounts of the government of Lesotho, donor-funded projects and statutory bodies. This was aimed at obtaining a reasonable assurance that they are free from material misstatements and that expenditure is regular, applied for intended purposes; and that revenue and expenditure conform to the authority, which governs them. This culminated into expressing an opinion on the fairness and consistency in the presentation of these accounts.
- b) With regard to Compliance Audits, the office carried out an independent assessment of whether a given subject matter complied with applicable authorities and identified criteria. This involved assessing whether activities, financial transactions and information comply, in all material respects, with the authorities, which govern the audited entity.
- c) In Performance Audit, the auditors examined the activities of an organisation to assess if the operations were being carried out with due regard to economy, efficiency and effectiveness.

19.6.2 Support Function

The Audit function is supported by various functions that constitute corporate services. These ensure compliance with appropriate standards, uniformity of practice, and the implementation of ethical norms across the office, bolstering trust in OAG products and services. OAG ensures high-quality products and services through quality control and quality assurance. Other corporate services including Finance, Human Resource, Communications, IT, registry, Procurement, Legal, and administration services all have a role in ensuring that audits are carried out efficiently.

19.7 ANNUAL PERFORMANCE

During 2020/2021, the office examined the consolidated financial statements of the Government of Lesotho, donor funded projects and statutory bodies to obtain reasonable assurance that they were free of material misstatements and express an opinion on the fairness and consistency in their presentation. The audit of consolidated financial statements provides for 100% audit coverage.

As part of the audit strategy, auditors carried out inspections and reviewed transactions to ascertain whether ministries and departments conform to specific laws and regulations governing their operations. OAG also undertook performance audits where auditors examine objectives, government undertakings, programs or organisations regarding economy, efficiency and effectiveness, with the aim to improve accountability, performance and service delivery.

These audits were achieved despite the resource constraints in terms of human resource, funds for undertaking audit inspections, shortage of laptops and other communication facilities required for undertaking audits.

19.8 CAPACITY BUILDING

OAG is a member of the International Organisation of Supreme Audit Institutions (INTOSAI); African Organisation of Supreme Audit Institutions (AFROSAI); AFROSAI-E and Commonwealth Auditors-General. OAG therefore, participates in several training and knowledge sharing initiatives with other Supreme Audit Institutions worldwide.

The extent to which OAG can contribute to enhancing accountability with subsequent improvements to the lives of citizens is reliant on quality of audits borne from staff competence.

Through training programmes that include seminars and workshops, the AFROSAI-E actively aids its member Supreme Audit Institutions (SAIs) in improving staff capacity, work skills, and techniques. For the financial year 2020/21, training interventions and workshops were virtually held, which had its limitations such as network connection problems and less interactive. These interventions include but not limited to the following:

- Report writing
- Auditing in IT environment
- Performance audit
- Elevating SAIs to respond to COVID -19 challenges

19.9 STRENGTHENING OAG INDEPENDENCE

The Audit Act 2016 provides for the autonomous and independent status of the OAG, The office commenced the process of transition from the civil service to an autonomous and independent entity. Organisational independence necessitates the Auditor-Generals autonomy in terms of how the office is organised and structured, as well as the ability to appoint staff without the approval of the Executive. The Office has reached a significant milestone in the execution of the Audit Act's provisions in terms of organisational independence.

Staff shortages have arisen as a result of the transitioning process. This has put a burden on the existing staff's ability to carry out the office's mission, but the issue would be solved, as we are about to start the recruitment process in 2022/23.

In my last year's report, regarding financial independence, I stated the mechanisms of issuing funds from the Consolidated Fund were not yet established. The OAG has now ceased to be a Head of Expenditure from financial year 2022/23 and will be getting a subvention from the Ministry of Finance

19.10 INTERNATIONAL ASSIGNMENTS

The Office of the Auditor-General represents the country in the audits of international affiliate bodies. The office is serving as Chair of the Southern African Development Community (SADC) Board of Auditors. The office is also in its final year as an external

auditor for the Eastern and Southern Association of Accountants-General (ESAAG); and also of the Southern African Development Community Organisation of Public Accounts Committees (SADCOPAC).
